School Theatre Lighting Installation at Coleg Cambria

The Requirement

Coleg Cambria, a further education college in Wrexham, were looking for a basic LED lighting system for a small, refurbished dance/drama studio.

Whilst lots of companies say that no job is too big or small, we actually mean it. Coleg Cambria selected Adlib as their supplier as we were the only one company willing to invest the time needed to attend a site visit and fully understand the requirements of this relatively small project.

The Solution

At the site visit, we discussed what Coleg Cambria wanted to achieve, made sure we fully understood their requirements and then specified appropriate products to meet their current and future requirements including making sure the equipment supplied was compatible with their larger theatre.

We recommended Osram Kreios LED Pars which are exceptionally bright for their money and an ETC ColorSource 20 lighting desk to control them.

The Result

As a dealer for both Osram and ETC we were able to offer the best possible prices.

Despite the request being very last minute (the first discussions took place in August and the equipment needed to be installed by September) we used our yoga-like flexibility to complete the project on time despite, technically, being fully booked until October.
