

DiveWallet

Your next-gen crypto wallet.

Whitepaper v2.0

Disclaimer:

All information stated in this Whitepaper document is tentative to change and modification. This document's sole purpose is to provide general information and reveal the goals and future plans of **Dive**Wallet as a company; it should not be viewed in any other capacity whatsoever.

In no way does this document constitute financial or investment advice, nor should it be treated as such. Additionally, although we believe our goals to be realistic, statements within this document do not guarantee future goods or services, as the crypto space is very volatile and unpredictable.

We thank you for reading and are glad you're here to learn more about us and our company.

Sincerely,

The **Dive**Wallet Team

Gavin, Andrew, Eve, Jeremy, Hailey, and Jake

What is **Dive**Wallet?

DiveWallet is an all-inclusive, user-focused, intuitive, cross-chain mobile wallet that is committed to keeping your crypto assets safe and secure from malicious web3 dApps and scams.

We know just how difficult the crypto space can be, including its steep learning curve and rampant scams, so we decided to create a wallet based around user experience, to keep crypto holders everywhere happy and secure from attackers, while also managing their funds efficiently and effectively.

We're excited you're here to see what we're all about. We're extremely confident that we can help make the world of crypto more practical and safe. We've traversed the toughest of markets and built the best wallet out there. Now, we're doing all that we can to bring our incredible product to market across the world.

What makes **Dive**Wallet Special?

Our users are always our top priority. **Dive**Wallet's innovative features take practicality and asset security to the next level.

Some of **Dive**Wallet's core features include:

- Dynamic banner alerts when your wallet is connected to any web3 address
- Ability to choose your price source from PancakeSwap, Uniswap, CoinGecko, or CoinCap.io (more coming soon!)
- Automatic disconnect from all web3 addresses 30 minutes after connection is established*
- Ability to purge all web3 connections with a simple click of a button
- Intuitive user interface to greatly increase ease of use for both experienced and novice traders
- Complete application decentralization to heighten user security (we never sell user data, and we never will!)
- In-app dApp browser for ease of use when interacting with web3 websites.

DiveWallet Token Information

A simple token that drove the creation of the **DiveWallet** community as well as helped raise the capital needed to develop the wallet that we all want.

Why launch a token?

To build our wallet, we needed help. We needed a strong community of people who believed in the end goal of this project, **DiveWallet** itself. Without utility being developed, a token is nothing. Over the last year, we have built an incredibly strong community and have released an amazing product, all thanks to our community.

DiveWallet Token has driven this community together and is the lifeblood of our project. We intend on continuing to create utility around DWT as time goes on.

Token Launch Information

The **DiveWallet** Token launch consisted of three phases: Private Sale, Pinksale Presale, and Public Launch in March of 2022. We are now live on all platforms. though we suggest buying DWT on the [Novation](#) exchange.

DiveWallet Token Breakdown

DWT Tokenomics:

15% Buy/Sell Tax

- ▶ 13% BUSD Reflections 
- ▶ 1% Market Stabilizer (LP)
- ▶ 1% **Dive**Wallet NFT Holders

That's it. Nothing else. We know that our tax is higher than some, but it allows us keep things simple and extremely rewarding for holders, as our reflections grant passive income for our community even in times of low volume. In addition to this, our NFT holders gain access to an extra 1% of all token volume, distributed to them periodically.

Our BUSD reflections serve as both a "bonus" to **Dive**Wallet token holders and allow the team wallets to build capital without a per-transaction team tax.

DiveWallet Token v2 Allocation

Total Supply: 100,000,000 DWT

DiveWallet Token Staking

Staking is available for **DiveWallet** Token holders at stake.divewallet.net at a standard fixed 10% APR. NFT holders are granted an extra 3% APR as a bonus.

Diver's Club by **Dive**Wallet

Diver's Club By **Dive**Wallet is a collection of 5,000 NFTs living on the Binance Smart Chain that combines impressive art and real utility into one collection.

Being a part of the Diver's Club grants you access to an extra 1% of all volume, which is periodically distributed amongst **only** our NFT holders. In addition to this, holding a **Dive**Wallet NFT grants 3% extra staking APR, upping the rate

All NFT investments go directly towards wallet development and expansion cost, so your money is being put to good use. It helps us while also directly benefitting you as an investor (plus, they look really cool)!

Mint your own **Dive**Wallet NFT at www.diversclubnft.com

App Information

DiveWallet can be downloaded on both the Apple App Store and the Google Play Store. Please consider downloading our application and leaving a review.

DiveWallet Apple Download

DiveWallet Android Download

DiveWallet currently supports BTC, ETH, BSC, POLY, CRO, SOL, MAXX, AVAX, and Optimism.

As we continue to grow as a company, we plan to greatly expand wallet functionality to include various features and blockchains. We are also extremely open to community suggestion and implement many features that originate as community suggestions.

DiveWallet also lists token logos in-app for a much cheaper rate than any of our competitors. If interested in in-app listings, please contact one of our team members on telegram, or by email (info@divewallet.net).

Team Values

Transparency

Our team values transparency. This means that the community will receive frequent updates on token and wallet development along with any other updates on important events or information. Our token contract has been audited and is extremely secure, and we will frequently seek feedback and suggestions from the community.

Security

DiveWallet is fully decentralized and secure. All of the core safety and practicality features have been effectively implemented and are ready to help make our users' crypto experience simple and secure. Our decentralization also keeps all user data away from centralized servers, meaning we manage none of it. We will never sell or collect any user info or data, and we never have access to any seed phrases or funds.

Community

Although our core team is busy creating the best user experience possible, we also believe that community involvement is the key to success for any project. Our team enjoys being involved in various crypto communities and will continue to be heavily involved within our own crypto family. Never be afraid to ask a question, even to a developer or core team member. We take great pride in our community.
