CUSTOMER HIGHLIGHTS:

- Increased **productivity** and **reduced costs**
- New range of **custom workwear** and **safety gear**
- **Dataspace** online apparel management platform
- Fast, reliable **delivery** all over Australia
- **Local** customer service team

CUSTOMER SUCCESS STORY: APA GROUP

APA powers ahead with integrated RWW solution

RWW stood out during the tender process when they asked APA “What do you need from us?”. This enabled RWW to provide a flexible and custom apparel solution built around the needs of APA, not the other way around.

Once appointed, the RWW team focused on delivering a seamless and easy transition, with open communication and the engagement of APA team members from head office to work sites.

A new, custom range of workwear and safety apparel was very well received right across the business, with stylish new items that created an increased sense of pride for the APA workforce.

The APA team immediately noticed a marked improvement in speed of delivery, from order to arrival on site (and even including home-based workers). The can-do attitude of the RWW customer service team, along with the fact they are based locally in Australia, has helped streamline communication and resolution of any questions.

One area in particular has stood out for the APA team since appointing RWW – technology. The innovative Dataspace apparel management platform, developed by RWW, has made ordering, order tracking, accessing invoices, and managing all their apparel needs, much easier than ever before for APA.

Easy integration with the Oracle Supplier Network (OSN) has added another level of functionality to Dataspace and provided a single, accurate view of apparel management, ordering and expenditure.

RWW have shown they have the energy and commitment to deliver for the APA Group well into the future.

“RWW have proven to be a great choice of partner for all our apparel and safety needs. They have a can-do attitude and a culture of continual improvement. The partnership with RWW is a great fit for our business.”
