- **Better pricing** with consolidated purchasing approach
- Dataspace provides **easy-to-use** online ordering and management
- Staff **place orders directly** and track their own deliveries
- Outstanding customer service ensures **seamless implementation**

## CUSTOMER SUCCESS STORY: LMS ENERGY

### LMS Energy reduces waste with help from RWW

LMS Energy is a specialist Australian bioenergy company that owns and operates 50 biogas facilities across the country, collectively generating over 500,000 MWh of renewable energy each year.

A landfill biogas business with more than four decades of experience, LMS Energy is helping to promote the transition to a circular economy by recovering over 1 million tonnes of contaminated organic waste every year and converting it into a valuable source of renewable energy.

Operating in a fast-moving industry, LMS Energy was dealing with long lead times and unsustainable pricing for uniforms and safety gear for their workforce located on project sites all over Australia.

With a very clear brief to save time and money, RWW responded with a new, efficient purchasing model for LMS Energy that included faster, more reliable delivery, better pricing and an automated, online ordering system.

For a business dedicated to reducing waste and creating a more sustainable future, RWW's innovative online ordering platform Dataspace has helped LMS Energy save time and money.

The Dataspace App has made ordering uniforms and safety gear very easy for staff at different worksites around the country, who can track delivery right to their door. RWW ensured an easy and smooth transition with seamless implementation and a focus on customer service.

A renewed and refreshed product range has LMS Energy staff right across Australia looking their best. They now waste a lot less time manually ordering and following up uniform and safety gear orders.

As a result, they can focus their energy on converting waste to renewable energy, reducing emissions and supporting the circular economy – important work that is changing the face of the waste management landscape and helping to protect the environment.

**“Moving to RWW has been a revelation for our business. Staff love the ease of ordering and tracking delivery, and having the right gear at the right price delivered to the right address has made my life a whole lot easier.”**
