Overview

You can embed a Barista widget on any portal or webpage. This widget allows easy access to the chat window by simply clicking on the Barista icon without having to leave the current page. To restart a conversation, click the **Restart** button. To hide the Barista widget, click on the **X** button.

We currently are required to safelist domains where the embedded script is going to be hosted. We already have **servicenow.com** and **jira.com**. For other domains, please inform your Customer Success representative, so we can add them to our safelist.

Sample Code

In this section, you will find the sample codes required to add the Barista widget and a description of the values involved. When you embed this script on your webpage, it will load all the Barista chat components, including the avatar image, and all the Barista chat behavior.

The snippet needs to be placed before the closing body tag `</body>` of your html document.

Barista Widget Script

Use the script that best fits your needs and replace the elements according to the table below:

Name of Library	Value	Description
<code>data-color</code>	<code>#0082C8</code>	This establishes the color of the Barista icon.
<code>data-position</code>	<code>top left</code> <code>top right</code> <code>bottom left</code> <code>bottom right</code> <code>bottom</code> <code>right</code>	This indicates the location of the Barista widget on the webpage.
<code>src</code>	<code>https://{tenant}.espressive.com/embed/index.js</code>	This is the tenant's URL. Replace the placeholder <code>{tenant}</code> with your tenant's name.
<code>data-message</code>	<code>'</code> – leave empty for no message <code>"Custom Message"</code>	This indicates the message to add. Replace the placeholder <code>Custom Message</code> with any message you want the Barista widget to convey.
<code>data-bot-name</code>	<code>'CustomBot'</code>	This is the Barista widget's name. Replace the placeholder <code>CustomBot</code> with the name you want for the widget.

Sample Code with Default Settings

<https://share.getcloudapp.com/lluoBGDE>

This code allows the Barista widget to display the default configurations and chatbot message:

```
<script
  data-color="#0082C8"
  data-position="bottom left"
  src="https://{tenant}.espressive.com/embed/index.js"
>
</script>
```

Sample Code with No Message

<https://share.getcloudapp.com/lluoBG91>

This code allows the Barista widget to show the default configurations and no chatbot message to aid as to the chatbot's purpose:

```
<script
  data-color="#0082C8"
  data-position="bottom left"
  src="https://{tenant}.espressive.com/embed/index.js"
  data-message=''
></script>
```

Sample Code with a Custom Message and Bot Name

This code allows the Barista widget to customize both the message and the bot name:

```
<script
  data-color="#0082C8"
  data-position="bottom left"
  data-message="Hi! Do you need help?"
  data-bot-name='CustomBot'
  src="https://{tenant}.espressive.com/embed/index.js"

>
</script>
```
