

JOB DESCRIPTION

Senior Heat Network Consultant

Ref: CT008

October 2023

Ready to make a positive impact?

Firstly, thanks for taking the time to show an interest in Reheat. I hope that reading this letter from me is the first step you make towards being part of our growing team and helping us collectively to play a part in the urgent global response to climate change.

When Neil and I established Reheat in 2011, we didn't want to sell the most renewable heating systems or even be the biggest business in the market. We set out to provide the right solutions and deliver the highest performing systems we possibly could. The best. Not the most.

These values still guide us today.

We don't cut corners or do things that don't feel right. In fact, we've probably said no thanks to more projects than we've said yes please to. That's not always the easy path to take. It sometimes means ripping up our work and starting again. It means not settling for good enough but continuing to look for better answers and to seek out opportunities to improve. Our business is driven by our values:

Powered by people
Different and dynamic
Make opportunities meaningful
High performance. Always.

We are powered by exceptional people who care about the work we do and the meaningful difference we make. People who are dynamic, challenge each other, perform to the highest standards and are genuinely having a positive impact on the planet.

If this sounds like you, then please read on. We'd be delighted to start a conversation.

Best regards,

Ben Tansey
Managing Director, Reheat

2.0 Role Description

Senior Heat Network Consultant

Are you passionate about playing your role in shaping a sustainable future by accelerating the transition to renewable energy? Would you thrive working alongside a dedicated team in a welcoming and forward-thinking environment? If so, Reheat has the perfect opportunity for you.

We are looking for a Senior Heat Network Consultant to join our consultancy department and become an integral part of a collaborative and dynamic team.

Interesting and meaningful projects

As part of a growing team the candidate will have a varied role that will lead and support the provision of consultancy services. We are looking for a motivated individual that is committed to delivering high quality service to our clients and will go the extra mile.

At Reheat we work across multiple sectors and have a wide ranging clientele from Local Authorities and Housing Associations to large manufacturers to Historic And Charitable organisations. As a highly motivated individual the successful candidate will be flexible and willing to work across a diverse range of projects.

There is scope to play a leading part in developing the technical capabilities within the team and widening our service offerings.

For over a decade, Reheat has been recognised for transforming the energy landscape with a different approach to renewables that is rooted in forestry. You will have the opportunity to be an important part of our dynamic team, collaborating on innovative projects across low carbon, renewable heat and heat network projects. Your expertise and enthusiasm will contribute to the development and adoption of sustainable energy solutions, improving energy efficiency and mitigating climate change.

Joining Reheat means being part of a team that is passionate about driving change, reducing carbon emissions, and creating a sustainable future for businesses and communities alike. As a member of our team, you will have a multifaceted role that offers variety, challenge, growth and the chance to make a meaningful difference.

If you are looking for a challenging and rewarding opportunity that combines technical expertise and project management, please apply now.

Applying for this role

At Reheat, our Powered by People value means we are built on a foundation of family, support, compassion, and trust – creating a safe and happy work environment for everybody. Our relationships are upheld with respect, inclusivity, and ethical behaviour for our colleagues, the people we engage with and as part of our wider contribution to society.

The same applies to our recruitment, whereby we accept people as they are – their personal beliefs, individual traits, and diversity of thought - which helps us to be better people and a better business.

To apply:

- Please send your CV and covering letter to: careers@reheat.uk.com stating the Reference number (CT007) and job title in the e-mail subject
- You can also contact us directly to discuss the role using the same e-mail address, or by calling 01655 655 040

If you are interested, but unsure if this role is right for you, we would still encourage you apply as we will always consider it for this opportunity, or other roles we may have in future.

3.0 Key Accountabilities

- Lead on the delivery of heat network feasibility studies and energy masterplans.
 - Lead on the development and delivery of community heat projects
 - Project management and delivery of a diverse range of consultancy projects
 - Undertake performance reviews of heat networks and provide optimisation recommendations and reports.
 - Provide technical and commercial advice to clients on renewable energy and heat network projects
 - Identify new business opportunities and support the development of new service offerings to support business growth
 - Develop relationships with clients to support business development and identify new opportunities
 - Provide clients with early phase project advice through to contract management of complex energy projects
 - Develop heat network projects from initial strategies and masterplans through to full feasibility studies
 - Collaborate closely with internal teams, providing technical guidance and expertise throughout project durations.
 - Mentoring junior team members and supporting their development, providing them with technical input and advice.
 - Keep abreast of relevant legislation and policies
 - Become key stakeholder for clients and grow professional networks.
-
