### Annual Volume Down Slightly, Albeit in a Strong Second Half in 2018

The regional M&A volume increased slightly (1.2%) to 164 transactions in the second half of 2018. This compares to a total of 162 transactions during the first half of 2018. The annual regional M&A volume decreased slightly (1.8%) to 326 transactions in 2018. This compares to a total of 332 transactions in 2017. The year-overyear M&A volume is reflective of broader national trends including fierce competition, which continues to drive up multiples, forces financial buyers to be more selective, and makes deal economics look less attractive. Nonetheless, transaction volume remained strong as both financial and strategic buyers had large amounts of cash to invest

Strategic buyers completed 89.0% of all transactions (290) in 2018 as compared to 92.2% (306) of all transactions in 2017. Strategic buyers had a large amount of cash on their balance sheets and continued to buy into markets. However, several factors drove higher acquisition rates by financial buyers during 2018, including a record amount of global dry powder (over \$1.0 trillion) that needed to be put to work, an increasing trend of secondary sales amongst private equity groups as an exit strategy, and a trend toward bolt-on acquisitions as a way to grow PE platform portfolio companies.

In the second half of 2018, regional M&A activity was primarily concentrated in the following sectors: Industrials (30%), Financials (12%), Health Care (10%) Consumer Discretionary (10%), Communication Services (9%) Materials (9%), and Information Technology (7%).
