OUR STORY

AMADEO's journey is a testament to the power of vision and passion. It all started in the historic city of Vienna in 2014 when our founder, Ing. Michael Makivic, embarked on a mission to revolutionise the lock industry and guest journey. His unwavering vision and innovative spirit led to the creation of AMADEO, the company that continues to push the boundaries of technology and digitalisation, inspiring others to think beyond the conventional.

AMADEO

Beyond Access

AMADEO, a name that signifies 'blessed by God', is more than a mere company name. Our logo, with its robust pillar through the letter 'A', symbolises our steadfast commitment to innovation, quality, and integrity. Our vibrant, rejuvenating pistachio-green branding colour reflects our dedication to environmental consciousness and sustainability. With these principles at the core of our business, we aspire to inspire our customers and pave the way towards a greener future.

As we continued to grow, we realised that our brand claim needed to embody our unique positioning and philosophy. It had to be pure, aspirational, adaptable, and universally understandable. We aimed to create a scalable platform on which we could grow limitlessly, and so our tagline, “Beyond Access”, was born.

AMADEO

Beyond Access

OUR MISSION, VISION & VALUES

MISSION

At AMADEO, our mission is to redefine security solutions and revolutionise access management. We provide our clients with innovative, tailor-made access control systems that offer unmatched security, convenience, and control on a global scale. Together, we can forge a safer and more secure future for all.

VISION

At AMADEO, we envision a world where access control systems are redefined beyond conventional boundaries. We aim to lead the sector by developing trailblazing solutions that enhance the daily operations of users and managers worldwide. We aspire to empower every key with reprogrammable access permissions, advanced electronic locks, and wall readers with world-leading environmentally conscious technology.

OUR VALUES

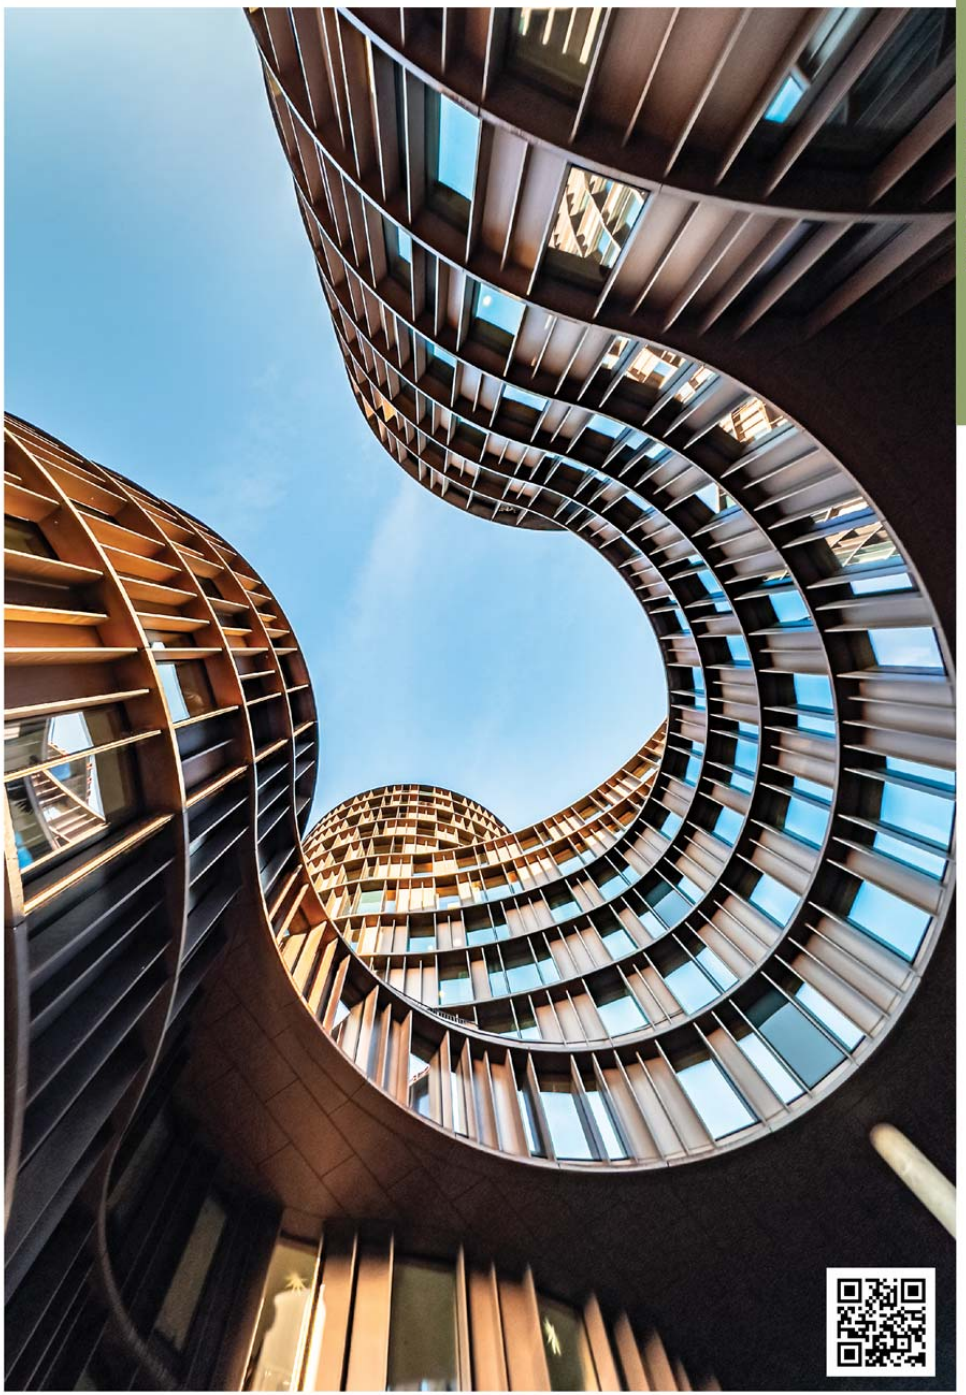

At AMADEO, our values are at the core of everything we do. They define Who We Are, guide our actions, and shape client relationships. We are deeply committed to integrity, and our solutions are practical, ethical, and responsible. Our values inspire us to create superior products and solutions, deliver exceptional services, and build lasting partnerships. Together, they form the bedrock of our operations, driving us to achieve excellence in everything we do.

SUSTAINABILITY COMMITMENT

At AMADEO, we believe that true innovation goes beyond creating access solutions. It means contributing positively to the world around us. Our commitment to sustainability is rooted in this belief: we recognise the urgent need to protect our planet and take responsibility for our environmental impact.

Through advanced technologies and best practices, we aim to reduce our ecological footprint, manage environmental risks, and enhance energy efficiency. By doing so, we hope to inspire others to join us in building a brighter and more sustainable future for all.

Our Premier Products & Solutions

AMADEO

Beyond Access

At AMADEO, we believe that security is not just about controlling access. It also empowers authorised individuals to move freely while protecting your assets and premises.

We have designed our product range with this philosophy in mind, ensuring that every solution we offer is secure, intuitive, and user-friendly.

Discover the essence of innovative security with AMADEO's comprehensive range of access control solutions.

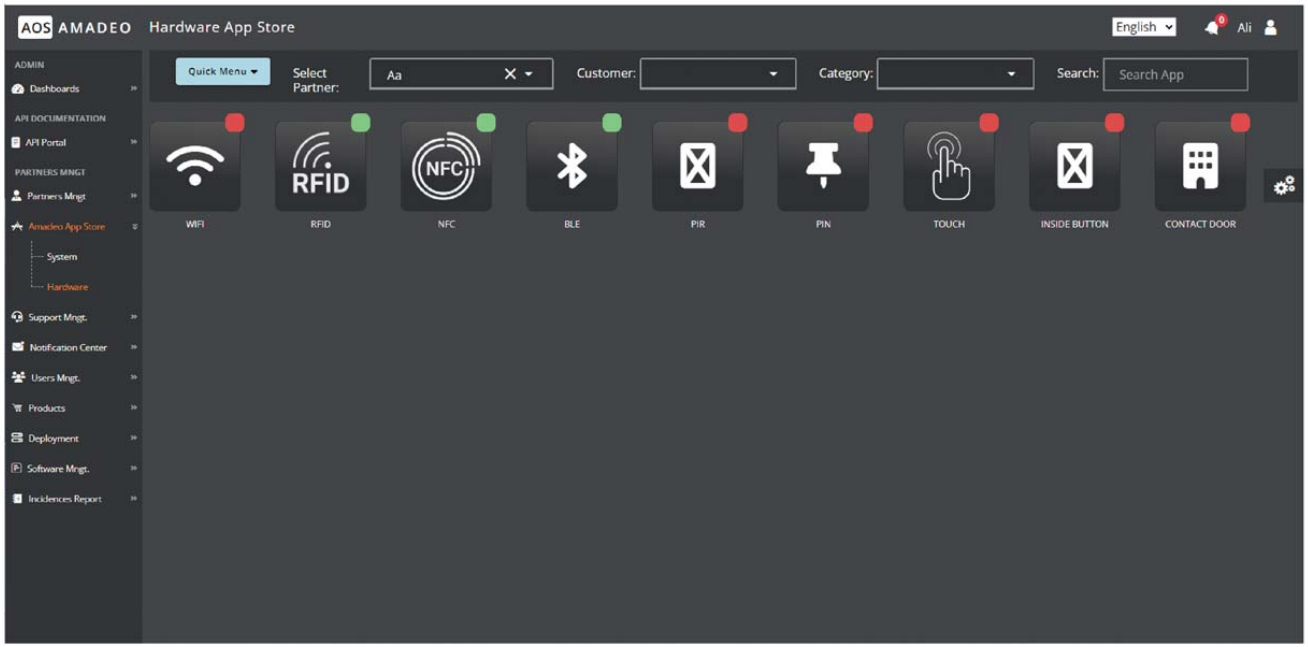

The AOS is a revolutionary platform that redefines multi-property management by making it efficient and intelligent. Powered by artificial intelligence (AI), it provides property owners and managers with an intuitive platform that consolidates access control into a single management tool. This enhances operational efficiency and security, making it a game-changer in property management.

The AOS is an excellent solution to the complex task of managing multiple island installations. However, the challenges of overseeing various hardware and software configurations, each tailored to the unique dynamic requirements of each property, coupled with unsynchronised upgrades of a subset of the systems over time, can be overwhelming for managers.

AMADEO

Beyond Access

The AOS empowers managers with real-time access to all the information necessary for making intuitive decisions regarding support and continuous improvement of their properties. By providing access to all firmware, middleware, software, network traffic, users, etc., and reinforcing it with automatic notifications about the health and performance of the systems, AOS offers a seamless experience.

Beyond monitoring, AOS is the centralised point for installing and upgrading the AMADEO access control solutions. Conducting all operations in one platform equips AOS with a data powerhouse that offers profound insights into the properties' performance and efficiency. It indicates areas for improvement, such as better staff allocation or attracting similar guest profiles in the future (for hotels). With AOS, managers can take their properties to new heights, breaking barriers and achieving new levels of success.

With a robust infrastructure leveraging Microsoft Azure servers strategically located across three continents, the AOS ensures continuous operation, making it a reliable and indispensable tool for multi-property management.

AMADEO

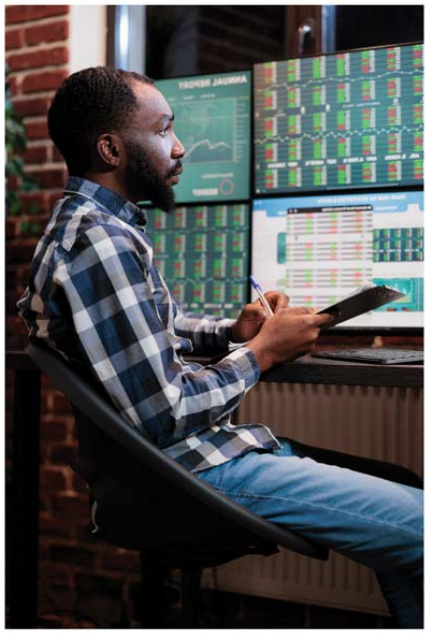

Beyond Access

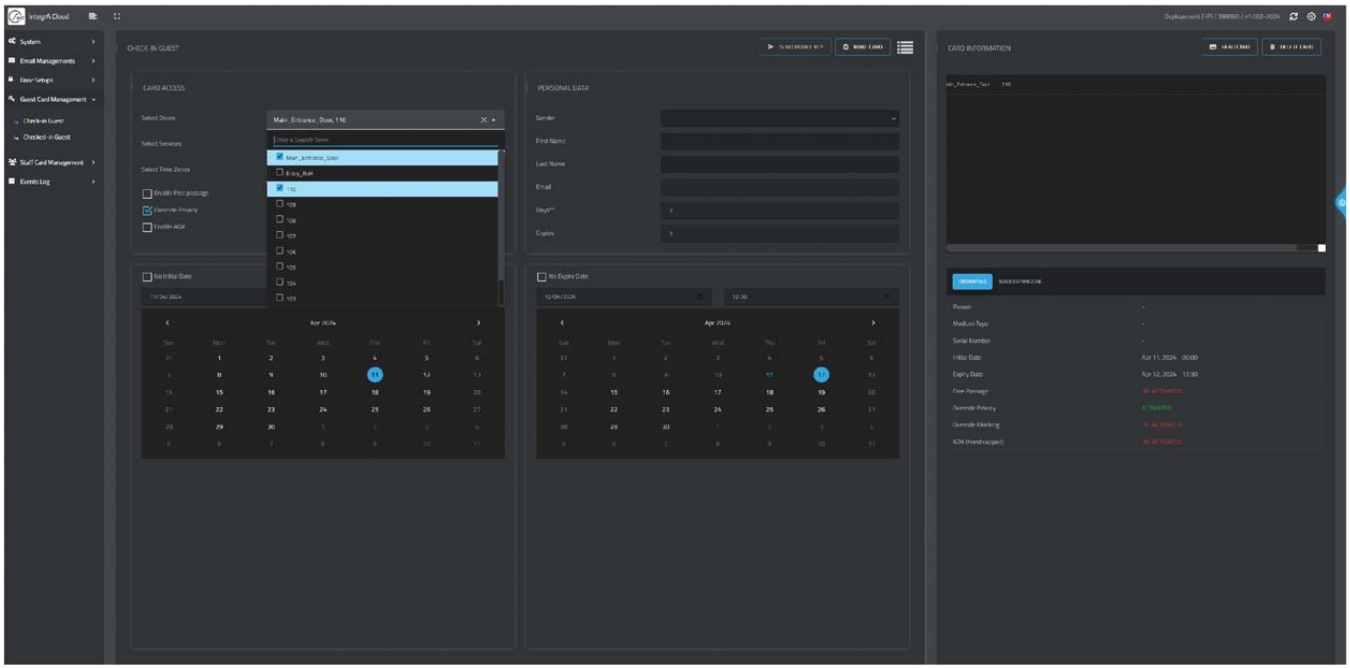

AMADEO
Cloud Software (IntegrA)

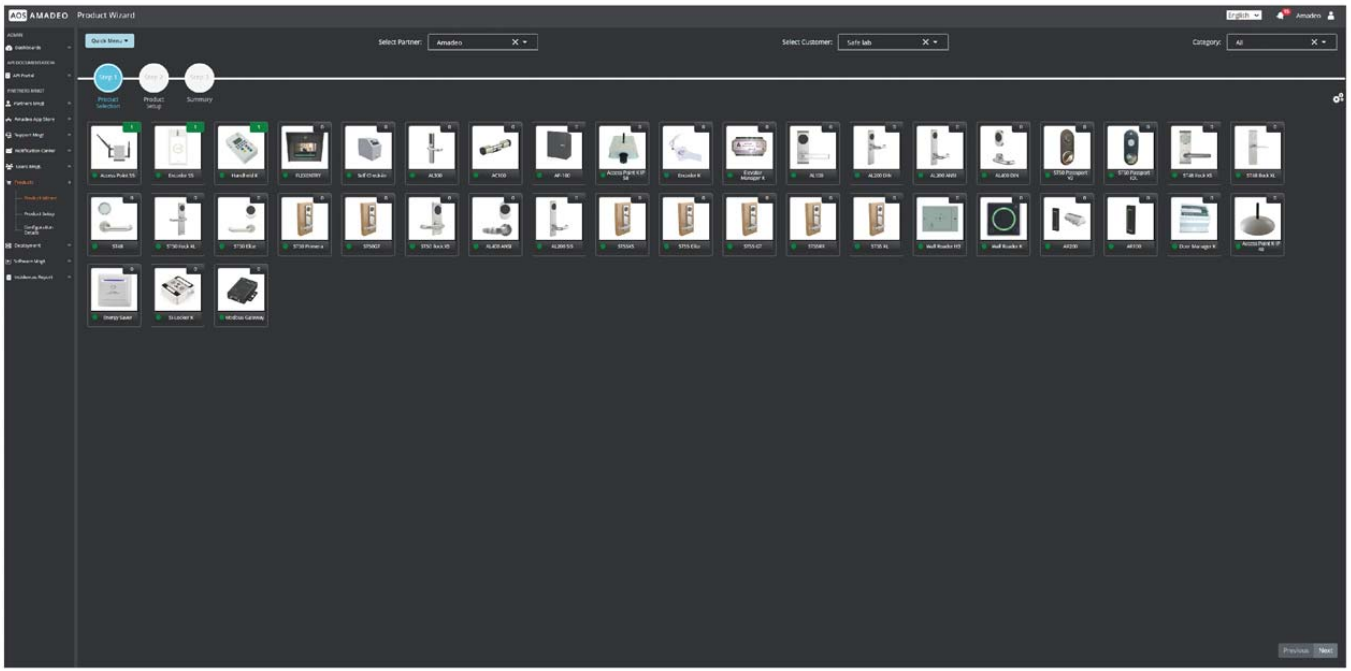

The IntegrA is an advanced access control system offering web-based access via laptops, tablets, and smartphones from anywhere. IntegrA brings a revolution in access control by liberating from the restrictions of on-site installations, which allows for a range of new solutions like remote encoding of keycards, remote opening, and monitoring the property from any corner of the world. This feature offers managers and staff unparalleled flexibility to carry out tasks efficiently.

The IntegrA goes beyond AMADEO's ecosystem, supporting robust third-party software integrations, including Property Management Systems (PMS), Point-of-Sale Systems (POS), Revenue Management Systems (RM), Booking Engines, lift controls, and CCTV systems that create cohesive access management environment. This enables you to manage complex hardware configurations and define intricate user groups, ensuring your system remains secure, efficient, and operational.

AMADEO

Beyond Access

IntegrA Marketplace provides managers easy access to a continuously expanding list of AMADEO solutions and improvements. This enables them to customise their properties according to their unique preferences and requirements without dealing with inflexible, preconceived, and often inaccurate packages and prices.

AMADEO Electronic Locks redefines access control by offering a perfect blend of security, versatility, and convenience. They are designed to meet the needs of various industries, from securing a hotel room to fortifying a commercial or residential property; AMADEO delivers solutions that go “Beyond Access”.

With AMADEO, you get more than just a lock; you are investing in a future-proof solution that enhances security, operational efficiency, and user experience. Our electronic locks are crafted to fit any door type seamlessly, ensuring perfect integration with your existing infrastructure. This adaptability eliminates the need for extensive rework or cover plates in most scenarios, providing a straightforward upgrade or installation with minimal interruption to your operations.

AMADEO Electronic Locks are not just about securing doors but also about opening new possibilities for intelligent access control across industries.

E-Locks
Key Features

- Multiple Technology: BLE, NFC, RFID, PIN code, and Wireless Online
- Full integration with AMADEO IntegrA Cloud
- Real-time access monitoring
- On-door check-in
- Mobile access via the AMADEO app - BLE or PWA
- API for easy third-party integration
- Variable encryption for enhanced security
- Access status with optical signals in green, red, and blue
- Unlimited audit trail in online mode
- Unlimited time zones
- Firmware update via NFC
- EURO-DIN or ANSI mortise locks compatible
- Optional override key feature via the FreeFlex
- Long-lasting power with an extendable standard three-year battery life
- Battery status alerts in offline and online mode
- Interchangeable set-up for left or right door configurations
- Panic function for emergency exit
- Door contact and privacy function detection
- Wide wireless coverage with EU868 MHz and US915 MHz
- Up to 25m lock-to-access point communication
- Up to 10m BLE reading range
- Clutchable lever for effortless operation
- Tested with a 96-hour salt spray for corrosion resistance
- 4-elements (Air, Water, Earth & Fire) resistant grade available
- Operates reliably in temperatures from -20°C to 60°C
- Operates reliably in humidity levels from 0 to 95%
- IP66-compliant version for outdoor available
- Anti-vandalism, anti-drilling, and bulletproof models available
- Made from durable stainless steel and Makrolon polycarbonate
- Wireless Charging (Coming Soon)
- Proudly manufactured in Austria

Electronic Cylinders

AMADEO Electronic Cylinder
is revolutionising the access control industry by offering a versatile and robust solution that seamlessly integrates into any door environment. With their innovative design, these cylinders perfectly fit your existing setup, eliminating the need for extensive modifications or additional cover plates.

Whether upgrading an old system or installing a new one, AMADEO Electronic Cylinders offer a seamless transition for a modernised access control solution.

AMADEO Electronic Cylinder offers a battery-powered locking solution with high-end RFID technology and robust mechanics for optimal access control security and efficiency.

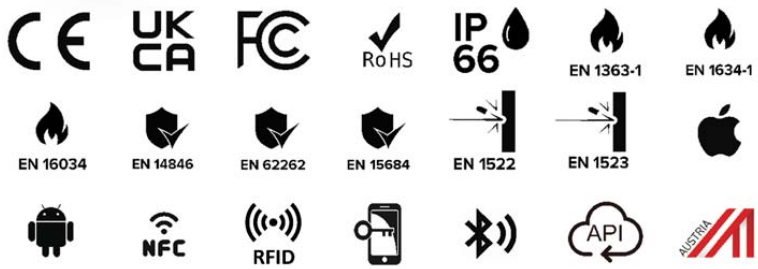

E-Cylinders
Key Features

- Variable encryption for enhanced security
- Access status with optical signals in green and red colours
- Unlimited audit trail in online mode
- Unlimited time zones
- Firmware update via NFC
- EURO-DIN or ANSI mortise locks compatible
- Registered emergency access device
- Minimum one-year battery life
- Battery status alerts and easy replacement without disassembly
- Secure communication by using a frequency of 13.56 MHz
- Up to 20m cylinder-to-access point communication
- Up to 5m BLE reading range
- 4-elements (Air, Water, Earth & Fire) resistant grade available
- Operates reliably in temperatures from -20°C to 60°C
- Operates reliably in humidity levels from 0 to 99%.
- IP66-compliant version for outdoor available
- Modular system for flexible configuration and easy installation
- Troubleshooting via the app

Wall Readers

AMADEO Wall Readers are the epitome of efficiency and versatility, making them an indispensable component of any access control system. These compact wall readers offer a seamless integration solution that simplifies access management, provides robust security, and enhances operational efficiency across various environments. With their straightforward installation process, AMADEO Wall Readers embody the spirit of innovation and progress, offering an ideal access control solution for any building.

AMADEO Wall Readers empower you to take control of your access control system in a versatile, reliable, and secure way. Their compatibility with a wide range of devices and credentials, indoors and outdoors, ensures you have the flexibility you need to create a seamless and cohesive system.
With AMADEO Wall Readers, you can harness the power of real-time data to enhance both your security and operational efficiency, while an offline version provides the same benefits cost-effectively and flexibly.

Wall Readers
Key Features

- Multiple Technology: BLE, NFC, RFID, PIN code, and Wireless Online
- Full integration with AMADEO IntegrA Cloud
- Real-time access monitoring

- Mobile access via the AMADEO app – BLE or PWA
- API for easy third-party integration
- Variable encryption for enhanced security
- Access status with optical signals in green, red, and blue colours
- Unlimited audit trail in online mode
- Unlimited time zones
- Firmware update via NFC
- Powered via Power over Ethernet (PoE) or an external power supply
- Embedded server for OEM integrations
- POS ready
- Motor bridge on board for motorised devices
- Wide wireless coverage with EU868 MHz and US915 MHz
- Up to 25m lock-to-access point communication
- Up to 10m BLE reading range
- Up to 4cm efficient reading range
- Electrostatic discharge protection of ±1000V
- Two programmable inputs and one built-in output relay
- 4-elements (Air, Water, Earth & Fire) resistant grade available
- Operates reliably in temperatures from -20°C to 75°C
- Operates reliably in humidity levels from 0 to 80%.
- IP68-compliant version for outdoor available (AR200)
- Anti-tamper switch and Anti-vandal model available

The FreeFlex

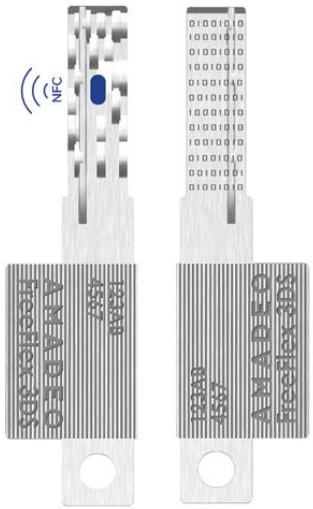

AMADEO FreeFlex cylinder represents a new era of digital locking technology. This system empowers you to easily manage your access, allowing you to adjust permissions and dynamically grant or revoke access.

With its high-security 96-bit encryption, the digital key is at the heart of the FreeFlex, offering an unparalleled range of unique keys. Its 12-disc mechanism provides dual-side key scanning for unmatched security, while its stylish and intuitive design is sure to impress. The optional NFC chip adds even more versatility to this remarkable system.

The FreeFlex
Key Features

- 79,228,162,514,264,337,593,543,950,336 unique keys guaranteed
- Anti-bump, anti-drill, anti-pick, anti-snap and bulletproof
- Full protection against unauthorised key cloning or copying
- 12-disc mechanism providing dual-side key scanning
- Modular system for flexible configuration and adjustment
- The FreeFlex cloud planner to make a dynamic locking plan and online ordering
- GPS tracking via QR code
- Reversible key system
- Elegant key design with its aesthetic appeal and functional ergonomics
- An optional NFC chip expands the key's functionality
- An optional magnet pill to detect the metal key
- The FreeFlex cylinder is made from durable Stainless Steel
- The standard key is made from Nickel Silver
- The Elite key is made from durable stainless steel in luxury colours
- The Elite key is the world's Only Nickel-Free and Lead-Free key
- Proudly manufactured in Austria
- Patent protection until 2040

Access Point

AMADEO Access Point epitomises cutting-edge wireless communication technology that seamlessly integrates with AMADEO's electronic locks and wall readers. This device extends the capabilities of access control systems by offering robust coverage and facilitating efficient management of wireless communications across properties.

AMADEO Access Point is more than just a device; it is a gateway to advanced, secure, and efficient access control management. Whether installed indoors or out, it represents a pivotal enhancement to AMADEO's access control solutions, promising ease of use, reduced infrastructure costs, and the reliability needed to protect your premises.

Access Point
Key Features

- Wide wireless coverage with EU868 MHz and US915 MHz
- Up to 25m device-to-access point communication
- Proprietary AES-encrypted UHF technology
- Ethernet (RJ45) network connection
- Powered via PoE or an external power supply
- An energy-efficient component with a low power consumption of 1W
- Operates reliably in temperatures from -25°C to 75°C
- Operates reliably in humidity levels from 0 to 80%
- IP40 and IP66 rating for indoor and outdoor
- Made from high-quality ABS housing material
- Proudly manufactured in Austria

Handheld

AMADEO Handheld is an essential component of our wide-ranging access control system, designed to simplify and enhance its functionality. This multi-purpose device empowers you to efficiently perform critical tasks, including initialising locks, downloading inspection protocols, conducting emergency openings, and updating electronic devices' firmware through NFC communication. With its emphasis on security, all data transmissions via the Handheld are encrypted, protecting your sensitive information.

AMADEO Handheld now features a mobile app for smartphones. This addition allows for seamless access control management directly from your mobile device, offering unparalleled flexibility and ease of use in the palm of your hand.

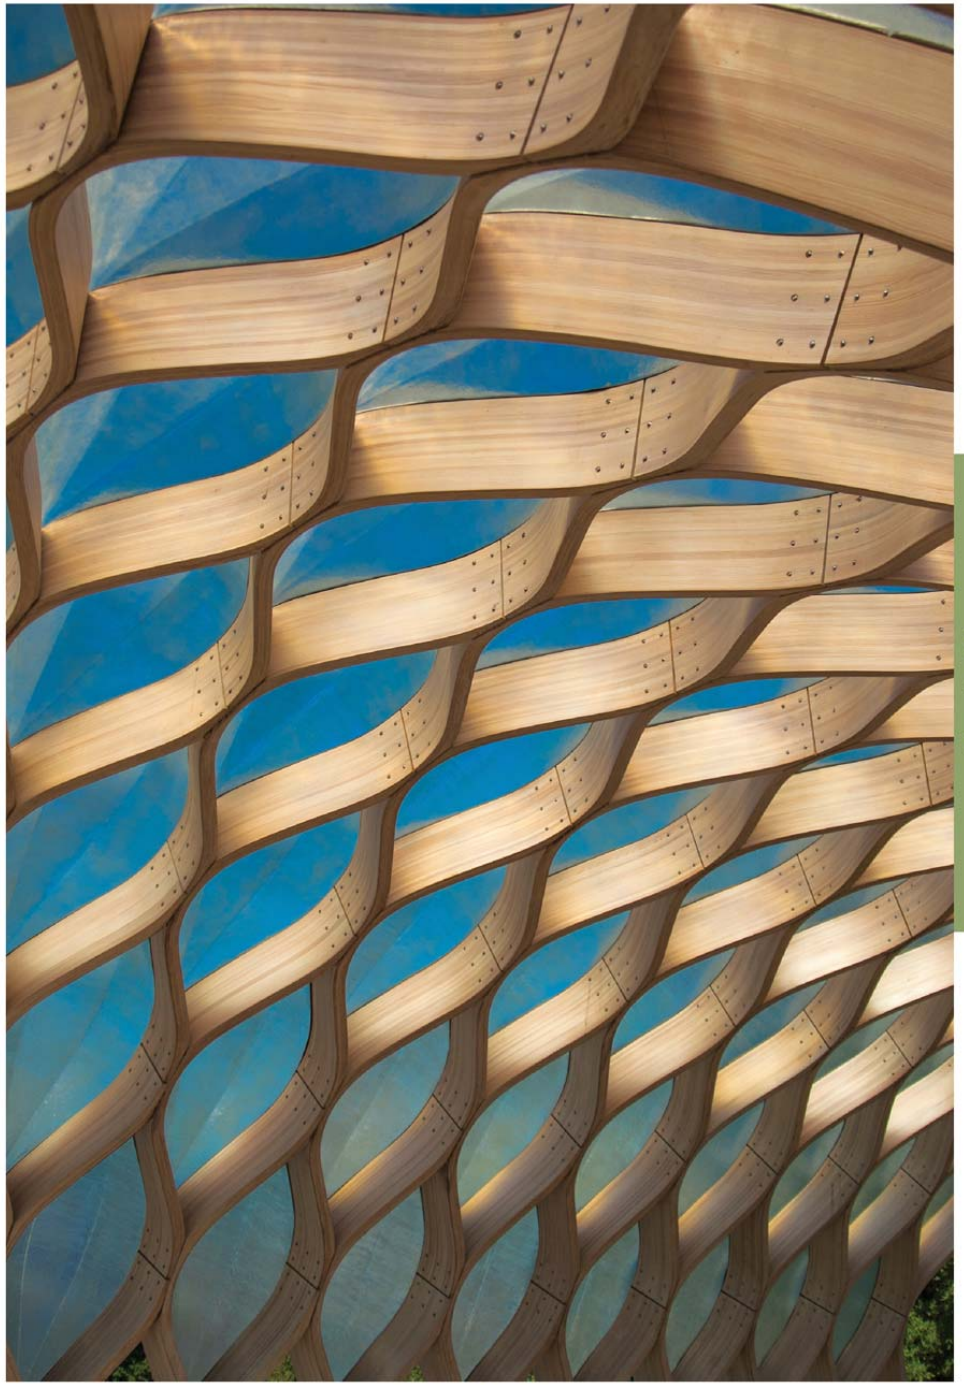

AMADEO

NFC Encoder

The AMADEO NFC Encoder is a PC-linked contactless smart card reader/writer developed on the 13.56 MHz RFID technology to meet the dynamic needs of secure access management.

The AMADEO NFC Encoder is the world's first CCID-compliant contactless card reader/writer that follows both ISO 14443 and ISO 18092. This device is designed to support Mifare and ISO 14443 Type A and B cards, and NFC tags. With this device, the possibilities for secure and efficient transactions are endless.

AMADEO

Beyond Access

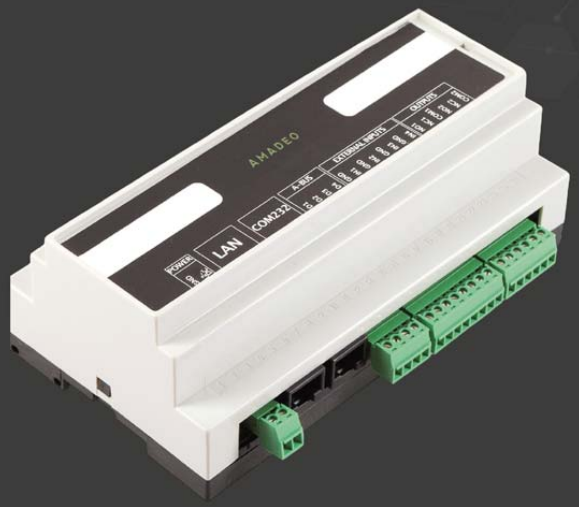

NFC Encoder
Key Features

- USB 2.0 Full speed interface
- CCID-compliant
- Up to 424 kbps read/write speed
- Up to 50 mm card reading distance with a built-in antenna
- ISO 14443 type A and B cards, Mifare Classic, and all four types of NFC
- A built-in anti-collision function
- User-controllable bi-colour LED (red and green)
- User-controllable buzzer
- Application programming interface supports PC/SC and CT-API
- A plug-and-play USB device
- Compact size with a user-friendly design
- Operates reliably in temperatures from -20°C to 60°C
- Operates reliably in humidity levels from 0 to 90%

AMADEO

Door Controller

The AMADEO Door Controller is an advanced door and lift access control solution. It integrates seamlessly with external peripherals, including electric strikes, energy savers, and lifts. It operates as an online, real-time system, ensuring efficient communication and installation, harmonising with the broader objectives of sophisticated access control. This device merges the latest in RFID and RF technology, standing as a cornerstone of secure and efficient lift access management.

AMADEO

AMADEO

Beyond Access

At AMADEO, we are driven by our dedication to providing exceptional access control solutions that are not only highly secure and efficient but also customised to meet the unique needs of each industry we serve. We believe that by putting our customers at the centre of all we do, we can inspire trust, confidence, and lasting partnerships that drive success for everyone involved.

At AMADEO, we believe that businesses and organisations should be empowered to operate on their preferred platforms without compromising security. That is why we have designed our security solutions to integrate with any ecosystem seamlessly. Be it hospitality, commercial, healthcare, residential, education, or any other industry, we are committed to providing effortless integration that allows you to focus on what you do best.

AMADEO

Beyond Access

COMMERCIAL

We empower diverse commercial environments with comprehensive solutions that elevate safety and operational efficiency. Our industry-leading security solutions, including the IntegrA software, electronic locks, electronic cylinders, and wall readers, ensure seamless access control and robust security. We strive to make your workplace a haven where you can achieve your best without compromising safety.

COWORKING SPACES

We are proud to be at the forefront of the movement towards flexible working arrangements. Our innovative solutions for coworking spaces make it easy for you to provide your clients with a modern and efficient workspace designed to meet their ever-changing needs. With cutting-edge technology, hassle-free mobile check-ins, efficient access management, and detailed user activity tracking, you can easily manage all aspects of your coworking space.

DISTRIBUTION & LOGISTICS

In the dynamic world of distribution and logistics, we balance operational efficiency and stringent security. Our innovative access control solutions, including wireless online and mobile check-ins, enhance productivity and ensure secure access management.

AMADEO

Beyond Access

EDUCATION

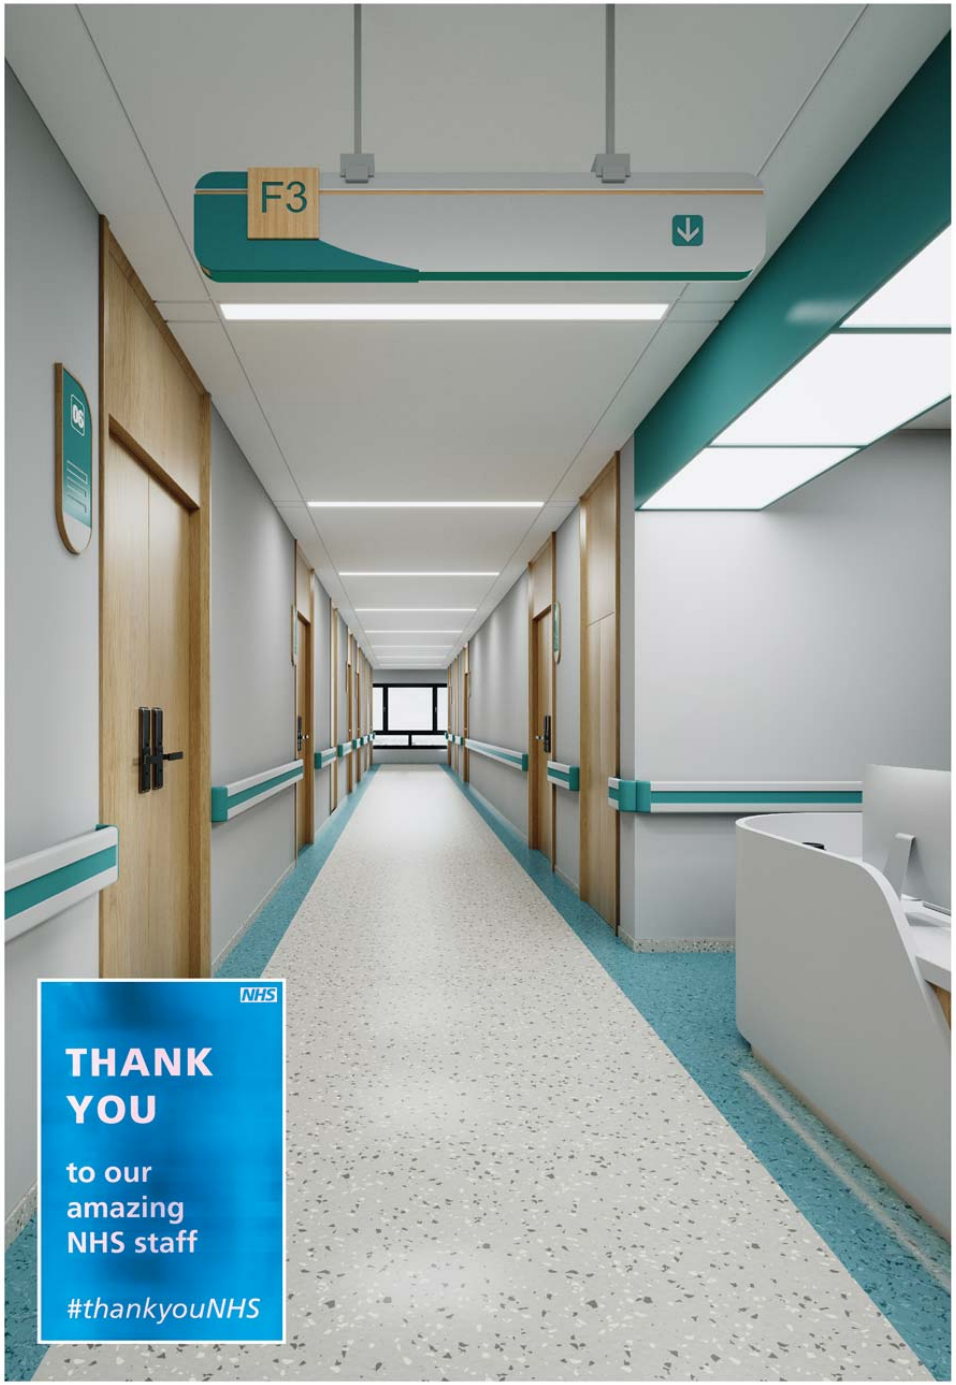

At our core, we are driven by a singular purpose - to ensure the safety of those within educational institutions. Our intuitive access systems serve as a beacon of protection, securing doors and equipment and monitoring movements. Our tailored solutions empower multi-campus institutions to create safe and secure environments that foster growth, learning, and success.

FINANCE & BANKING

Our unwavering commitment to ensuring top-notch security in the finance and banking industry is driven by a deep understanding of its critical importance. Our solutions are designed to comply with the sector's strict regulations, and we leverage the power of cloud software to safeguard sensitive data and assets. Our robust access control system and real-time reporting empower our users to respond instantly to any security threat.

FITNESS & GYMS

With our unified card solutions and mobile key options for fitness and gyms, we are breaking down barriers and unlocking opportunities for users everywhere.
Our solutions are designed to integrate seamlessly with other platforms, making it easier than ever to enhance operational efficiency.

AMADEO

Beyond Access

GOVERNMENT

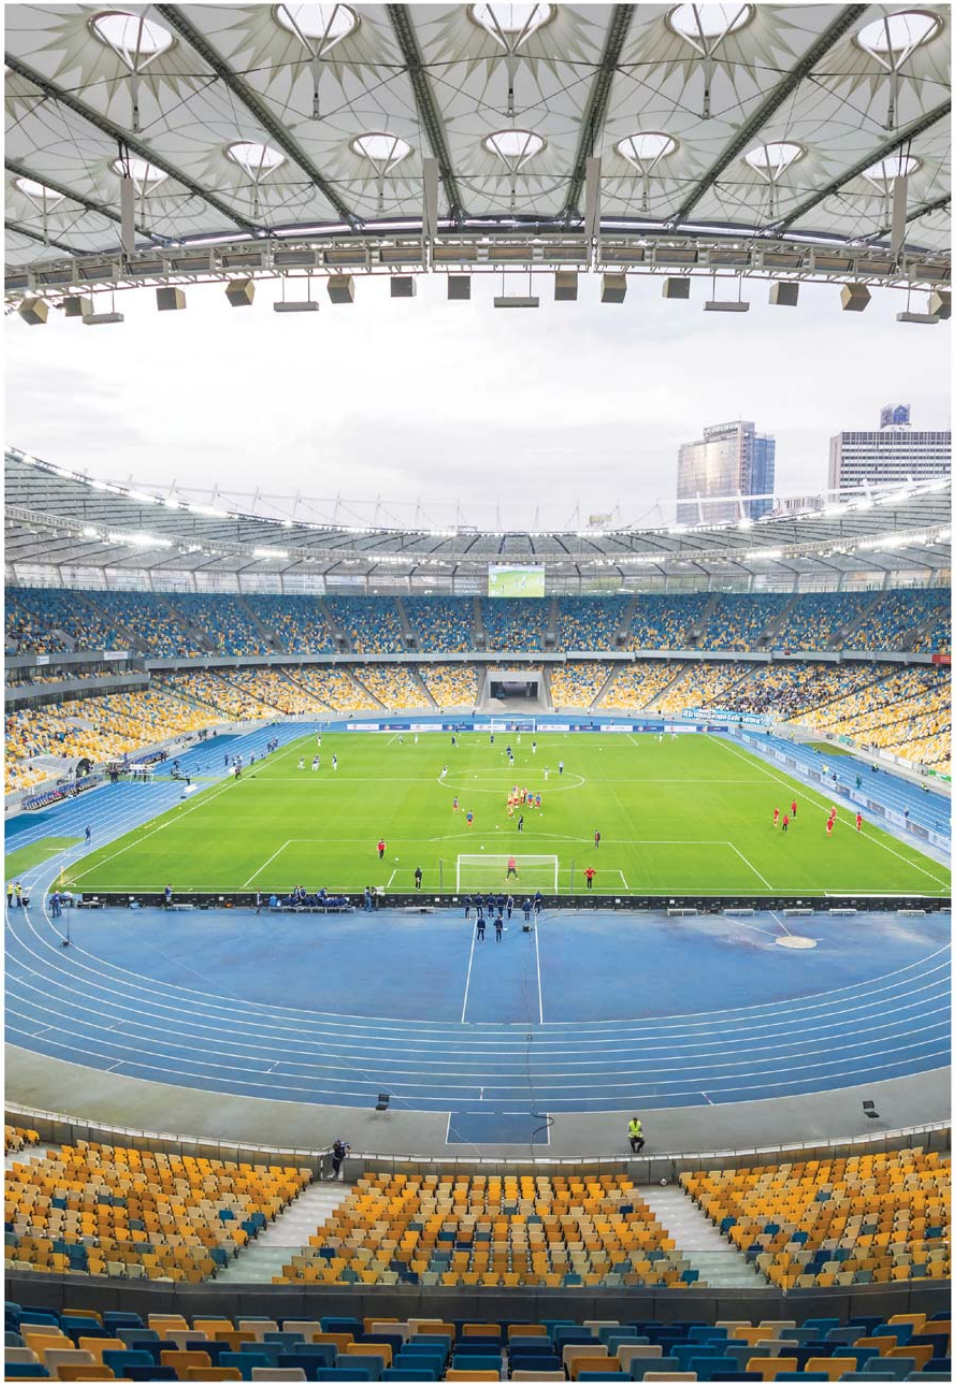

Our access control solutions for government buildings inspire confidence and peace of mind. We seamlessly integrate high-level security measures with daily operations, managing access and tracking activity to safeguard people and property.

HEALTHCARE

We are committed to delivering the best healthcare solutions, with a focus on security and accessibility. We aim to provide healthcare professionals with the tools they need to deliver exceptional patient care.
We understand that every healthcare setting has unique requirements, and we strive to offer a range of options that balance the need for security and confidentiality with the importance of accessibility.

HOSPITALITY

We are enthusiastic about redefining the conventional guest experience by providing exceptional solutions that cater to the needs of modern guests. We understand that today's guests value a seamless, personalised journey that is free of hassle and friction. That is why we have developed innovative solutions that enable guests to bypass queues and proceed directly to their rooms, saving them valuable time and effort. Our wireless online solutions provide real-time information to our clients, allowing them to offer customised service offerings that cater to each guest's unique needs and preferences.

AMADEO

Beyond Access

PUBLIC FACILITIES

Our commitment to excellence is reflected in the meticulous design of our systems, which are tailored to meet the diverse needs of public facilities. Our hardware and software components are carefully selected to ensure maximum durability, efficiency, and performance. From busy airports to bustling malls and crowded train stations, our systems can easily manage high foot traffic while providing seamless access control and uncompromising safety.

RESIDENTIAL

Our solutions for residential properties are designed to provide unparalleled peace of mind and a perfect balance between user convenience and high security. We achieve this by deploying state-of-the-art access control systems customised to meet each property's specific needs. Our access control solutions are highly adaptable and can be integrated with advanced technologies such as smart locks, biometric authentication, and surveillance cameras. With these systems, residents can monitor and control access to their homes and properties in real time, anywhere, and anytime.

TRANSPORTATION

The vast transportation infrastructure networks are critical to our modern way of life, but they can be challenging to secure. We believe in safeguarding these access points to empower site personnel and operations managers with the flexibility they need for a fluid workforce. Our systems are designed to easily manage even the largest and most complex sites.
