

The Durovac logo is a yellow hexagon with the word "DUROVAC" in blue, bold, sans-serif capital letters. The background of the entire advertisement features a blue-tinted image of a vacuum hose and nozzle being used on a pile of gravel. The top and bottom of the image have a light beige background with a repeating white geometric pattern.

DUROVAC

THE DUROVAC DIFFERENCE

We know more about vacuums than you'll ever want to.

www.durovac.com

The Reliability Your Team Expects

We are often asked, what makes DuroVac different? The answer is simple: With more than 30-years experience, we deliver each vacuum system with extreme confidence.

With DuroVac you can expect a premium experience right from the beginning.

Precision Quotes

As technology leaders, DuroVac is able to deliver precise quotes over-the-phone. From simple to complex applications - our quick quoting accuracy is a major advantage of working with DuroVac.

Zero-cost Warranty

Each of our vacuums comes with a zero-cost warranty guarantee. If your vacuum isn't working out, we've got you covered — along with filters and free shipping to boot.

Heavy-duty Engineering

Every DuroVac vacuum is built like a tank. With intensely durable, abrasion-proof steel, our vacs come ready to work. They're engineered with as few parts as possible, ensuring that less can go wrong and keeping downtime at a minimum.

“ At DuroVac®, our every day mission is to make our customers happy and that all project stakeholders feel like heroes. ”

Anh-Tai Vuong, President, Corporate Sales & Business Development

Industrial Vacuums for Any Application

Go ahead and challenge us! We have designed, fabricated, and installed heavy-duty central and portable vacuum systems for industrial customers worldwide.

From one operator moving 15 TPH to 100 operators using palm sanders, our team will configure the exact system for your needs.

CUSTOM VACUUMS

With combined design experience of more than 160 years, the DuroVac team creates industrial vacuum systems to move “tough-to-handle” material. Have a unique application? Not all vacuums are created equal.

Vacuum packages and filter separators can be adapted for:

- Liquid pick-up
- Hot material conveying
- Fibrous and fluffy materials
- Combustible material handling
- Corrosive applications or electromagnetic environments

LOOKING FOR THE RIGHT FIT?

INDUSTRIAL VACUUM TOOLS & ACCESSORIES

DuroVac accessories are selected for industrial applications based on years of experience in the field. Our suite of flexible accessories optimize your vacuum's performance on the job. Lightweight & ergonomic, these tools are durable enough to hold up on any job site.

Portable Vacuum Systems

POWERLIFT™ SERIES

Industrial Vacuums with Massive Suction

The Powerlift line of industrial vacuums is composed of two main sub-series. The 'PL' series and the 'EL' Series.

Both series offer huge suction with astonishingly small footprints and are designed for easy material disposal or reclamation.

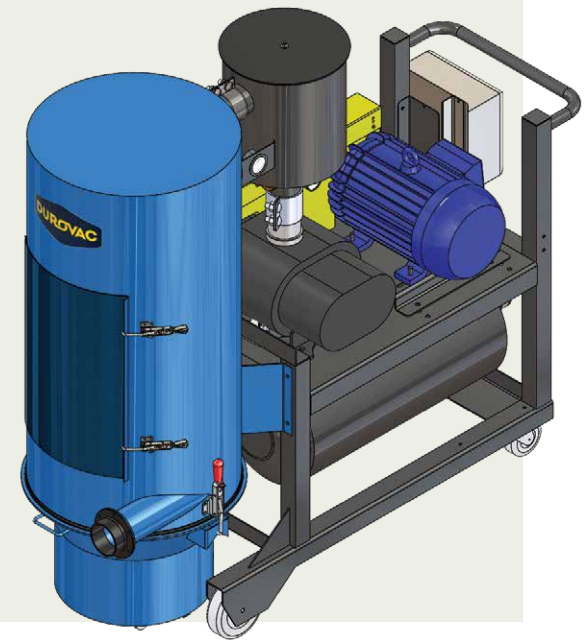

DV SERIES

Powerful Portable Industrial Vacuums

The Lightning line of industrial vacuums is composed of two main models: DVR Portable and DVP Portable.

Both offer super-efficient filtration so there is never a drop in performance as the canisters fill. This means less production down-time for your plant.

“ We use the PL753P to clean up everything from light dust to heavier compacted product, and even lumpy material. ”

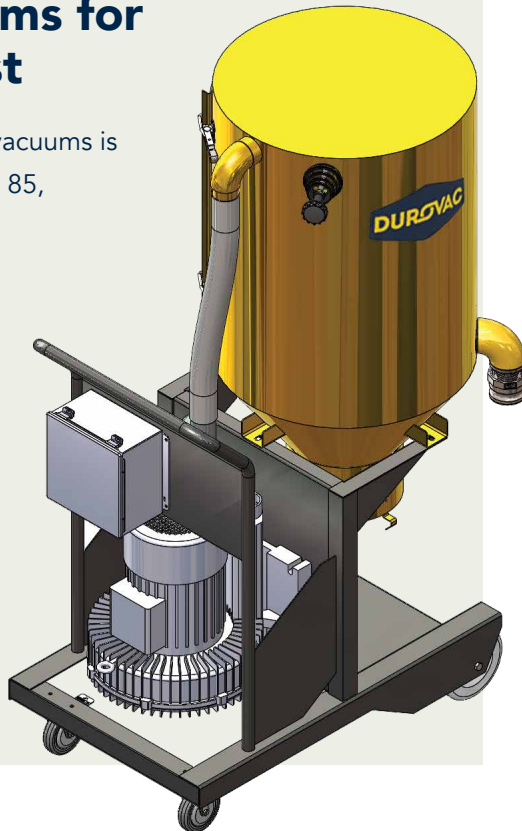

Robin Anderson, Mosaic Potash

LIFETIME™ SERIES

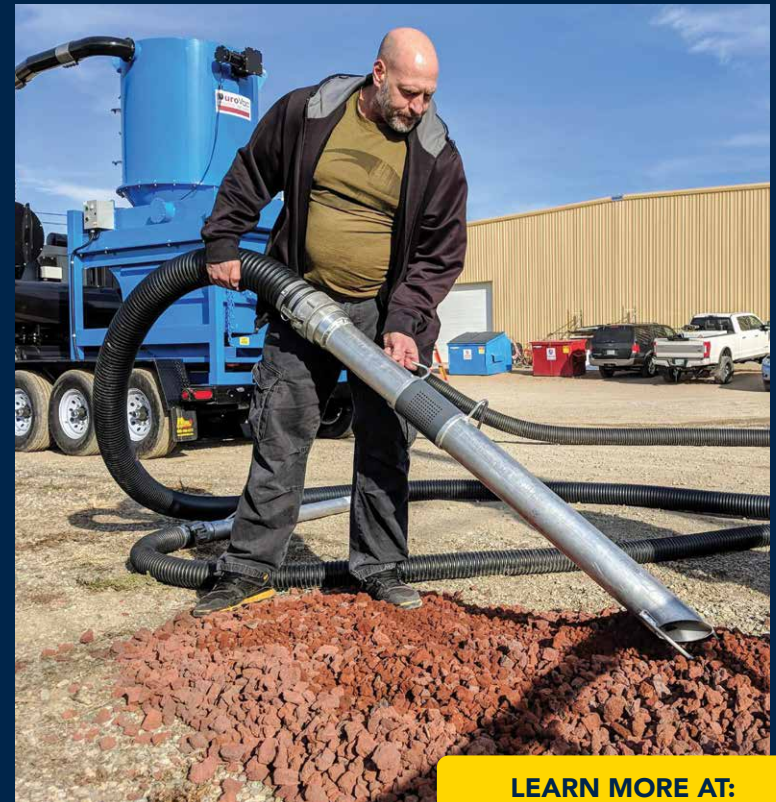

Industrial Vacuums for Silica Laden Dust

The Lifetime line of industrial vacuums is composed of four models: LTS 85, LTP 85, LTS 3 and the LT 110.

All vacuums are engineer-controlled and comply with OSHA's silica regulations. HEPA comes standard with 99.97% filtration for worker safety.

140hp Diesel Engine/Trailer-Mounted Industrial Vacuum for Potash

Central Vacuum Systems

MULTI-OPERATOR CENTRAL VACUUMS

Continuous Suction Throughout Your Plant

Multi-operator vacuums provide consistent performance even as the number of operators increase.

Each filtration system is engineered and designed to never clog with material. This provides a practical cleaning solution throughout your plant, eliminating the need of multiple, portable vacuums.

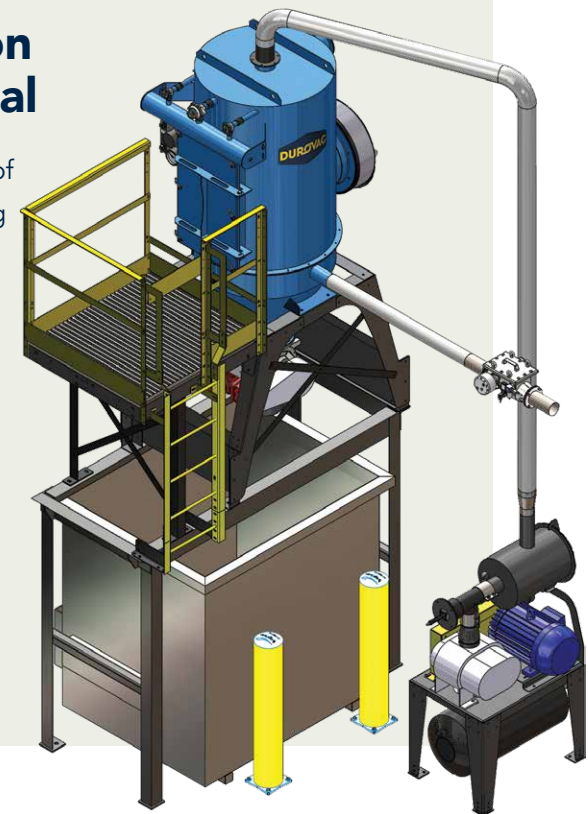

MATERIAL LOADING CENTRAL VACUUMS

Powerful Suction for Easy Disposal

Save hundreds of thousands of dollars annually by eliminating vacuum truck rentals as these vacuums move high tonnage of material. No more “all-day shoveling” for your workers.

These central vacuums offer heavy-duty, continuous suction through positive displacement vacuum pumps which pull harder as the job gets tougher.

“ The system is running very well and we have been getting positive feedback on the quality of product we are making now as well. ”

Brian Balkwill, Engineering Manager, Jamieson Laboratories

SMALL STATIONARY CENTRAL VACUUMS

High Flow, High Vacuum, Low Cost

Small stationary central vacuums provide a budget-sensitive alternative for your plant without sacrificing performance.

“All-in-one” designs offer fast installation at minimal cost. These systems come standard with a 27 U.S. gallon canister, although option cyclones or hoppers are also available for greater storage.

60 HP 10-Operator Fixed Central Vacuum System for Pet Food Plant

Industries

OUR VACUUMS MAKE HARDWORKING INDUSTRIES HAPPY

You know what they say about breaking an egg to make an omelet. Your industries make the materials, food and buildings our society needs to function, which often translates to a heavy-duty mess. Nothing we can't handle. Find out how DuroVac industrial vacuums help your industry run smoothly at www.durovac.com.
