

AI in Higher Education

The Future is Now

AI

Sarah J Lewis, PhD
Barry University

Difference?

1

Google

A roadmap through the information landscape

Hours

A

2

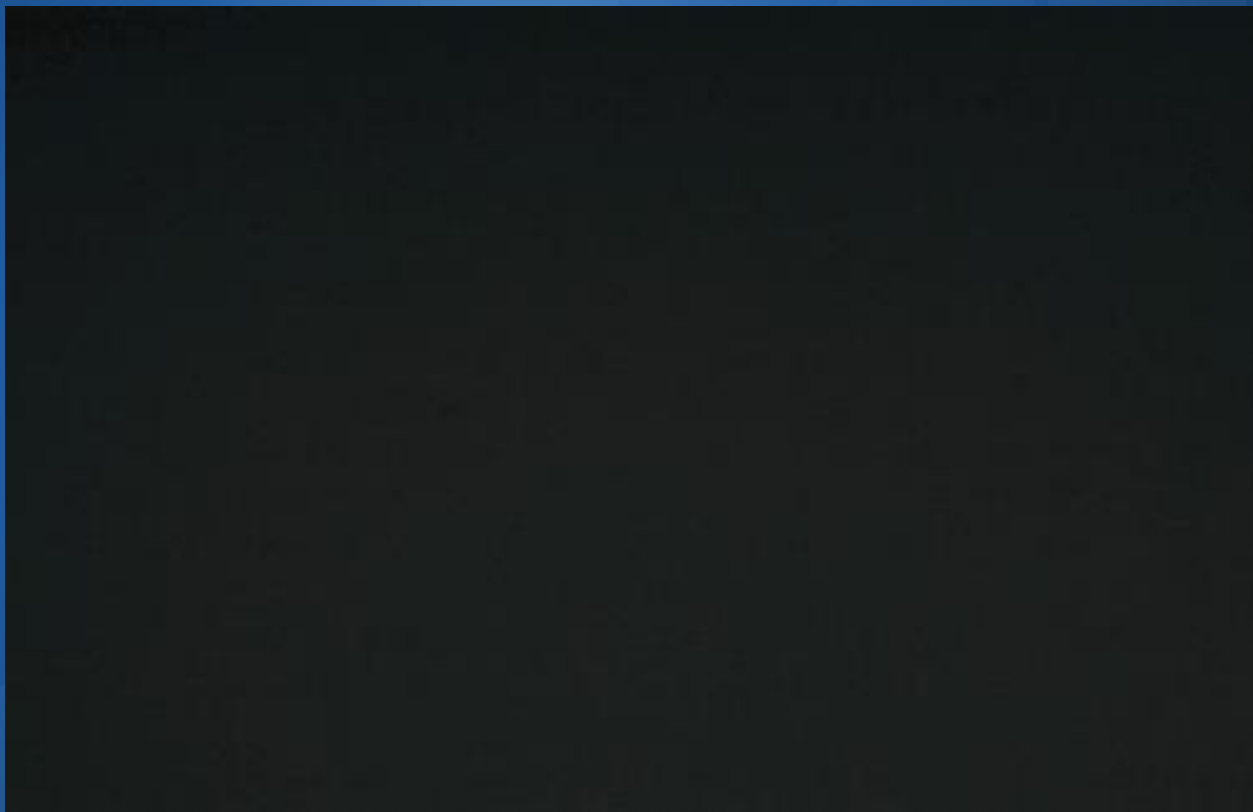

GPT

A teleporter to specific points of knowledge

Nano seconds

B

Hmmm efficient, but is it effective?

AI Use Cases

1

Pre-GPT

We have all been using AI for years! Alexa, Siri, Grammarly, Scholarcy, etc.

Short Video A

2

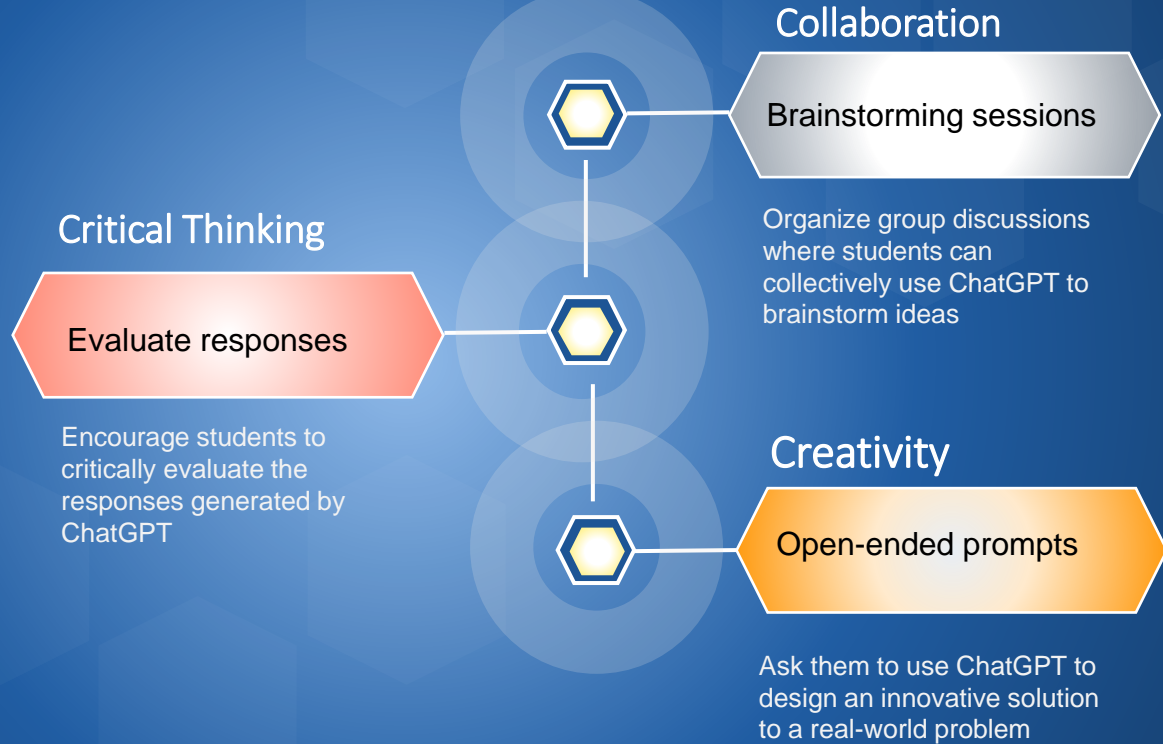

GPT

Let's take it for a spin!

Demo B

We have been using AI for years – in and out of the classroom.

Explore & Create

Reasons to Use

Problem Solving

Additional perspectives, evidence-based practices, innovative ideas, promoting thoughtful approaches

Higher Order

Engage in debates on controversial topics or analyze complex issues stimulating analytical and evaluative abilities

Engagement

Spark interest and curiosity by providing interactive discussions, personalized feedback, and real-time responses

Personalized

Tailored explanations, additional resources, and varied approaches to cater to diverse learning styles.
