

Carbon Reduction Plan

Publication date: 13 December 2023

Commitment to achieving Net Zero

Medwing (UK) Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: December 2024	
Additional Details relating to the Baseline Emissions calculations.	
We have only been trading for since 2020, and have this year designed our Carbon Emission Reduction Plan. This has seen our company implement methods to measure and monitor our CO2 reduction targets. Therefore, we have restructured our organisation to be accountable for achieving these measures.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	Not recorded December 2024
Scope 2	Not recorded December 2024
Scope 3 (Included Sources)	Not recorded December 2024
Total Emissions	Not recorded December 2024

Current Emissions Reporting

Reporting Year: 2023 have not been calculated as above	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	Not recorded
Scope 2	Not recorded
Scope 3 (Included Sources)	Not recorded
Total Emissions	Not recorded

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 7000 tCO₂e by 2029. This is a reduction of 30%

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2024 baseline. The carbon emission reduction achieved by these schemes equate to 0 tCO₂e, a 0%ge reduction against the 2024 baseline and the measures will be in effect when performing the contract are itemised below:

We are currently based in a serviced office, therefore, unable to control some of the energy saving measures such as energy supplies. The measures we are taking to date, include working towards 100% paperless office, using digital assets and transactions.

In the future we hope to implement further measures such as:

- business travel policy to be implemented, preference for public transport where practical.
- Segregate waste for disposal avoiding landfill.
- Recycle and refurbish all WEEE, with a focus on the circular economy and re-use back into the communities we serve, re-distributing to disadvantaged families.
- Replace current electric vehicles with new electric vehicles when due.
- Within the next five years, we will be moving away from serviced offices and into our own premises. We will install and implement energy efficient energy sources, including heating, lighting etc.
- Apply for ISO14001 certification status.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of Medwing (UK) Ltd:

Johannes Roggendorf
Managing Director
