VIRAL MITIGATION SOLUTIONS

Signature HealthCARE is proud to announce our Virus Mitigation Solution. This program brings a multifaceted approach to virus control within our facilities.

SCREENING STATION

Device consisting of three components;

- Thermal mirror that takes a temperature remotely, without physical contact
- "Pass" sticker for entrance issued only to persons who pass temperature and questionnaire screening

UV LIGHT SHOE SANITIZER

- Scientifically proven to kill over 99% of pathogens
- Shoe sanitizer that disinfects the soles of shoes within eight seconds
- Installed at facility entrance screening area

UV LIGHT SANITIZING EQUIPMENT

- Scientifically proven to kill 99% of pathogens
- Used to fully clean all facility rooms and areas after our normal cleaning process
- Disinfects all furniture, fixtures, and equipment in rooms and areas
- 120 minutes to complete the sanitizing process

ELECTROSTATIC MIST SPRAYER

- Scientifically proven to kill 99% of pathogens
- Disinfectant spray to mitigate virus presence on commonly touched surfaces
- Safe to apply near people
- Wiped from surface within 10 minutes of application

PLASMA GENERATOR

- Ions emit to kill pathogens, VOC's, allergens, odors, and other particulates
- Installed in all facility rooftop and floor HVAC systems
- Eliminates approximately 70-75% of air particulates after 24 hours of use

- Each facility has a designated Infection Preventionist who:
 - Completes a 19-hour training course specific to long term care
 - Has training developed by the Centers for Disease Control and Prevention (CDC) in partnership with the Centers for Medicare and Medicaid Services (CMS)
- The Infection Preventionist is responsible for:
 - Overseeing the facility Infection Control and Antibiotic Stewardship Programs
 - Collaborating with the Medical Director on facility infection control measures and processes
 - Monitoring facility, resident, or other infections
 - Tracking, trending, and analyzing Infection and Antibiotic data
 - Actively participating in the facility Quality Assurance and Performance Improvement (QAPI) program
 - Educating facility on infection control
 - Updating current infection control guidelines into facility's infection control program
 - Collaborating and communicating with the local county and state health departments
 - Maintaining the employee health program

ONSITE RAPID TESTING

- Signature HealthCARE can offer multiple means of COVID testing
- Our testing capabilities allow us to help keep our residents, staff members, and families safe
- Our facilities have either a BD Veritor or Quidel machine for Point of Care testing in the facilities
- Both options provide results within 15 minutes
- Some facilities also have Abbott Point of Care tests available for rapid testing, which are antigen tests with results within 15 minutes

VACCINATION PROGRAM

- Signature Healthcare expects our staff members are vaccinated for COVID-19
- There are currently 3 vaccines approved for use in the United States:
 - Pfizer, a 2-dose vaccine series, spaced 21 days apart
 - The effectiveness is approximately 95%
 - Moderna, a 2-dose vaccine series, spaced 28 days apart
 - The effectiveness is approximately 95%
 - Johnson & Johnson, which is a single dose vaccination
 - The effectiveness is approximately 66% for contracting the virus and 85% for preventing severe disease caused by the virus
 - Effectiveness is reached approximately 28 days after vaccination
- Signature partnered with Walgreens and CVS pharmacies to provide Pfizer and Moderna vaccines
- Signature is working with a vaccine participating pharmacy that services long term care to continue providing our residents and staff members available vaccines
