

# Achieve Operational Excellence with DMS ERP

## Meet Discovery Solutions: Your New Partner in Success

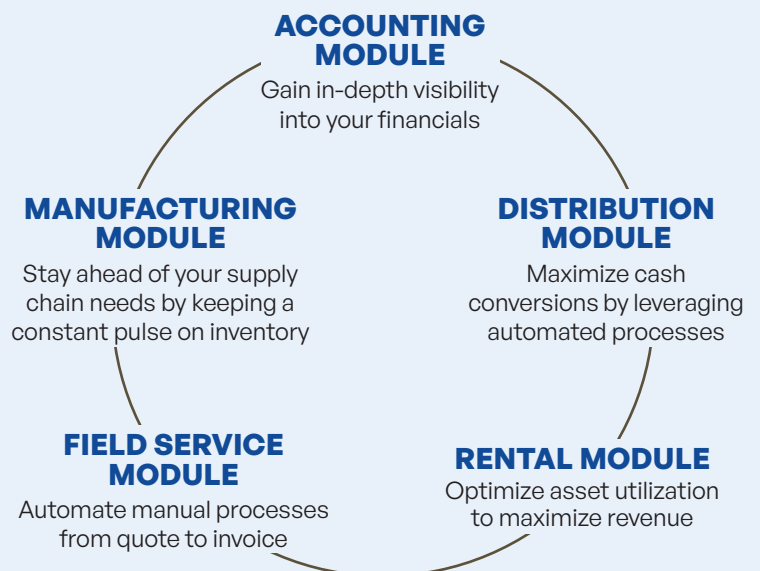

We are Discovery Solutions - a software development company with **40+ years of experience** headquartered in the heart of Calgary, Alberta. Our flagship software, Discovery Management Software® (DMS) ERP, **is the first and only oilfield-specific Enterprise Resource Planning software on the market.** Unlike other ERP software companies, our veteran team has acquired a thorough and direct understanding of the unique operational challenges faced by small and medium-sized businesses within the Oilfield Services industry. We pride ourselves on displaying this expertise through industry-specific tools, insights, and solutions that collectively result in achieving true operational excellence.

The growing operational complexities across companies within the Oilfield Services industry continue to intensify. From accounting to sales and field services, it can be difficult for various company departments to collectively work together as a well-oiled machine.

Manual and outdated processes are time-consuming and error-prone, leading to inefficiencies across these departments. Furthermore, inadequate systems commonly contribute to siloed data, poor inventory management, delayed processing, and ultimately, unsatisfied customers.

If you are looking for a single fully-integrated software to simplify and streamline your business operations, you have come to the right place.
