Kailash Singh

Chairman & Managing Director - Tefla's
& Organiser Globoil India

Dear Globoil Community,

It's a moment of immense pride as we mark the 26th year of Globoil India. It feels like just yesterday when we began this remarkable journey, and the strides we've made since then have been truly extraordinary.

Globoil has always been more than just a platform; it's been a hub for knowledge, innovation, and collaboration in the Global Edible Oil Industry. Our commitment to fostering dynamic ideas and market insights remains unwavering. The increasing recognition of Globoil underscores the growing significance of India and its neighbouring regions in the global marketplace. Over the past 26 years, Globoil has not only set high standards but has also evolved into a pivotal gateway for the global edible oil sector.

This year, we are thrilled to elevate the conference experience further. Globoil India 2023 promises enhanced networking opportunities, enriching interactive content, and a plethora of promising business prospects.

To all our delegates, speakers, exhibitors, and sponsors - you are the heartbeat of Globoil. Your unwavering support and contributions have been instrumental in elevating Globoil to its current stature. As we gather today, my heart is filled with gratitude for the trust, guidance, and encouragement you've bestowed upon me throughout this journey.

I eagerly look forward to the insights and discussions that await us. Here's to a fruitful conference, a memorable experience, and a pleasant stay in Mumbai.

Thank you for being a part of this legacy.

Warm regards,

Kailash Singh

The Solvent Extractors' Association of India

The Solvent Extractors' Association of India was formed in 1963 to help and foster the development and growth of Solvent Extraction Industry in India. At present the Association is having 875 members including about 350 working solvent extraction plants having combined oilcake/oilseed processing annual capacity of about 30 million tonnes.

The Association is an all India body to solvent extractions industry and premier vegetable oil Association in the country having wide representative membership consisting of processors of Rice bran, Oilcakes, Minor Oilseeds and Soybean.

Main Objectives of the Association

- a) To promote and protect the trade, commerce, manufacturing and exporting, trading and other activities of the solvent extraction industry.
- b) To encourage and promote the use of solvent extracted oil and their byproducts in India and abroad and with that aim to publicise, propagate and advocate their uses through various publicity media including organising seminars/conventions.
- c) To represent and make known members point of view and the interests of the solvent extraction industry as a whole before governmental and quasi-governmental authorities trade or industrial bodies, chambers of commerce, foreign trade and industrial interest and other organisations.
- d) To establish, promote, operate, maintain, increase and encourage directly or indirect steady and stable expansion of the export of deoiled cakes/meals and for that purpose to carry on such activities and implement such schemes by such methods as may be necessary.

The main purpose of the Association is to foster the development and growth of the solvent extraction industry in particular and overall development of Veg. oil industry in the country in order to increase vegetable oil availability in the country, to make the country self reliance in vegetable oils to meet the growing demands of the large population, with scientific outlook.

NOURISHING LIVES. NURTURING THE NATION.

FULLY INTEGRATED AGRI BUSINESS FOR ADDED VALUE

Apical

Apical is a leading vegetable oil processor with an expanding global footprint. Our vertically integrated mid-stream refining and value-added downstream processing makes us an integral supplier that supports the needs of various industries namely food, feed, oleochemicals and renewable fuel, including sustainable aviation fuel (SAF) which enables a great reduction of CO₂ emissions.

With integrated assets in strategic locations spanning Indonesia, China and Spain, Apical operates numerous refineries, oleochemical plants, renewable fuel plants and kernel crushing plants. Through joint ventures and strategic partnerships, Apical also has processing and distribution operations in Brazil, India, Pakistan, Philippines, Middle East, Africa, USA and Vietnam.

Apical's growth is built on the foundations of sustainability and transparency, and motivated by our strong belief that we can contribute to a circular economy for a more meaningful impact, even as we continue to grow our business and deliver innovative solutions to our customers.

LET'S CONNECT

Let's create together

U.S. Soy: Delivering superior oil value.

With oil prices and crush margins on the rise, buyers, crushers and refiners must evaluate soybeans on the value of the oil. A study called "Processing Characteristics of Soybeans from Different Countries" found that U.S. soybeans:

- Produced high-quality crude soybean oil
- Had the lowest cost of refining and the highest refining rate
- Had lower damage rates on arrival
- Were more consistent

U.S. soybean oil has the highest refining rate, which reduces input costs for refiners. Add it up, delivers superior value. You can see this value in real time by using the Soybean Oil Value Calculator to analyze refining yield, cost and revenue potential for soybeans of different origins.

Find greater value for you, your customers and the planet at USSOY.org/solutions.

We currently offer
Non-GMO soybean meal, soy
lecithin, refined soybean oil &
shea butter, shea meal, ricebran
meal, ricebran oil, palm kernel oil,
palmkernel meal

We export our products to
three continents across
the globe - **Asia, Europe
and North America**

Crushing capacity of
250,000 MT
Refining & oil milling
capacity of
100,000 MT respectively

WASIL has partnered with **DFID's
Business Innovation Facility** and
the **Bill and Melinda Gates
Foundation** to enhance
sustainable long term self-reliance

WE ARE PIONEERS IN HI-PROTEIN SOYBEAN MEAL AND RICE BRAN PROCESSING FACILITIES IN WEST AFRICA

WASIL is investing \$40 million in its expansion plan over the next 2 years.

In the 2nd phase of expansion, we are setting up new oil milling plant
with a capacity of 110,000 MT annually and solvent extraction plant with
a capacity of 150,000 MT annually.

In addition to this, we are also setting up a Refinery for Rice Bran Oil
as well as a flash desolventisation system, which are both first of their
kind in West Africa.

The product range will then include Shea Butter, Refined Ricebran Oil,
Palm Kernel Oil & Food Grades include Soy Flour, Grits and Nuggets.

Aspiring Towards A Sustainable Future

At Sime Darby Oils, we believe in exploring every possibility and pursuing every new opportunity to fulfil our customers' business needs. We contribute to our customers' success by offering a great customer experience and developing sustainable solutions via our own plantations today for what they need tomorrow through our global operations in 12 countries.

Sime Darby Oils is a single, integrated solutions provider of oils and fats across the entire value chain. From plant through packing, we offer a variety of oils and fats across the globe, across product categories, including commodities, specialty products and our own manufactured products.

Our cohesive and holistic sustainability blueprint aims to strengthen further our commitment towards exemplary standards on environment sustainability, social responsibility and corporate governance. Furthermore, we aspire to inspire the world towards sustainable living with our endeavours to develop solutions for a sustainable future through edible oils, palm oil-based biodiesel, nutraceuticals and other palm oil derivatives. Let us take the first step towards a partnership built on success.

End-to-end Cost-efficiency

- Secured plantations allow better prices and supply when sourcing seeds.
- High-quality oils don't require further refining, translating to customer cost savings.
- Directly managing demand and supply means less wastage and better logistics management from plantation to product making.
- End-to-end management means more leverage on strategic relationships and better negotiations with the supplier.

MINIMISE YOUR RISK & ENHANCE YOUR PROFIT

TransRisk is a commodity exposure and risk management software that automatically imports daily trades from various sources and provides analytical insights for procurement, trading and risk management teams

Do You Have ?

- » Multiple products/SKUs
- » Multiple commodities
- » Necessity of accurate data
- » Reports to be driven by a system
- » Easy access to historical data

Do You
Want To
Improve
Your
Decision
Making?

YES

What Do We Address

- » Enhanced Visibility of your Profit & Loss
- » Calculate the hidden risk in your open exposure
- » Internal transfers with clear Profit & Loss
- » Simulate what-if scenarios
- » Curtail the delay in monthly MIS
- » Complete view of our daily MtM reporting

Data Driven Decision Support

TRANSGRAPH

INDIAN VEGETABLE OIL PRODUCERS' ASSOCIATION

Established in 1977, IVPA has been a stalwart advocate for the Indian Oils & Oilseeds Industry.

In 2019, we evolved into the "Indian Vegetable Oil Producers' Association" to encompass all facets of the edible oils and oilseeds value chain.

Meet Our Leadership

Sudhakar Desai
President

Amrendra Mishra
Vice President

V K Jain
Vice President

S P Kamrah
Secretary General

OUR MEMBERS

IVPA proudly brings together prominent manufacturers, processors, oilseed crushers, de-oil cake exporters, refiners, and various other stakeholders within the vegetable oils and fats industry.

OUR VISION

Promote Sustainability, Economic Growth, and Excellence across the entire edible oils and oilseeds value chain in India.

OUR MISSION

- To continue to be the Credible voice for the Edible oils and oilseeds sector.
- Enhance stakeholder value.
- Drive economic growth.
- Ensure the sustainability of supply chains.
- Deliver safe & healthy products for India's growing population.

OUR VALUES

We uphold:

- CREDIBILITY
- INTEGRITY
- INCLUSIVENESS
- RESPONSIBILITY

MIURA GRAVITY SUPER FILTER (SELF-CLEANING)

For Dewaxing & Winterizing of Edible Oil

Designed By MIURA Engineering Co.Ltd. JAPAN

Manufactured & Marketed By

Creative Engineers & Consultants, Bangalore
(sole Licensee for Miura Engineering Co.Ltd. Japan)

System Advantages :

- ★ Energy saving and highly efficient automatic de-waxing filter.
- ★ Compact in construction, yet meets the required larger filtration area and needs less space for installation.
- ★ Need not to be installed in the cold room for de-waxing process.
- ★ Wax removal after the filtration process is possible in a short time without opening the filter.
- ★ No spillage of oil around the filters and area remains clean.
- ★ Cooling of filter to the desired operating conditions achieved in less time, so that the next cycle can be quickly started.
- ★ Filtrate discharge outlets attached to each leaf, therefore it is easy to detect a defective filter leaf.
- ★ No filter aid is required.
- ★ Filter element can sustain more number of cycles and need not be replaced frequently.
- ★ SUPER FILTER operation can be manned by single person.
- ★ Utility consumption is minimum.
- ★ Maintenance is easy.

Available Miura Gravity Super Filter Variants:

1. 200 Sq. mtr filtration area.
 - a. Launder with Lever assembly (standard design)
 - b. Closed wax & product drain system.
2. 300 Sq. mtr filtration area.
 - a. Launder with Lever assembly (standard design)
 - b. Closed wax & product drain system.

INTERNATIONAL 2024

10-11 SEPTEMBER 2024 | ROTTERDAM | THE NETHERLANDS

10-11 September 2024

Rotterdam Ahoy Convention Centre
The Netherlands

Solutions in processing, trade & logistics

Brought to you from the same team behind the leading global magazine, **OFI International 2024** will bring together the commercial and technical oils and fats worlds under one roof at the Rotterdam Ahoy Convention Centre on 10-11 September 2024.

OFI International 2024 will offer 'Solutions in Processing, Trade & Logistics', with parallel conferences on trade & transport, and processing & refining, along with an exhibition of suppliers to the industry.

Market leaders will present their views on key feedstocks, along with food, fuel and sustainability trends.

And in a first for the oils and fats industry, **OFI International 2024** will bring together experts to talk about the key role that shipping, logistics, transport and freight play in the oils and fats supply chain.

The Port of Rotterdam is home to six vegetable oil refining complexes, as well as biodiesel plants, and oils and fats storage terminals. As part of **OFI International 2024**, site visits will be organised to some of the major companies located in the port, giving visitors first-hand experience of their operations.
