

The interactive learning community for business incubators and accelerators

COMMUNITY MEMBERSHIP

Spring 2024

UBI Global is an **interactive learning community** for business incubators and accelerators, founded in 2013 in Stockholm, Sweden. In 2023, we acquired the tech startup Global Innovation Studios and its **portal of tools** designed to contribute to excellence among the organizations in our community.

We now offer two (+ one extra) membership plans through a member portal that provides an explorer tool to discover other organizations around the world. It also gives access to our research library, articles, events, and announcements. Members are able to submit their own news and events for publication on the portal. There is also a corporate matching tool to connect startups and alumni with exciting opportunities. The Benchmark Tool is available as an add-on to any membership plan.

Becoming a *Basic* or *Premium* member unlocks many more features and functions, allowing you to...

Get Connected

Expanded networking with international peers and partners

Get Benchmarked

Designed to increase your performance and impact globally

Recognized

Celebrating success of top-performers and high achievers

Get Educated

Learning to become an effective business incubator accelerator

MEMBERSHIP SERVICES

DEVELOPED FOR INTERACTIVE LEARNING

Benchmark Tool - Incubator Impact and Performance Analytics

A powerful tool developed by UBI Global for *Basic* and *Premium* members that wishes to define, measure, understand, and communicate their impact and performance, along with learning through insights and international best practices. Read more here

World Benchmark Study

A biannual study that offers business incubators and accelerator to become more efficient, sustainable, diverse, and competitive. Participating UBI Global members can obtain national and international recognition as a top-performing organization in the world. Read more at <u>worldbenchmarkstudy.com</u>

Corporate Matching

UBI Global collaborates with corporations to create 'corporate calls' for community members and their startups. *Basic* and *Premium* members can nominate startups for any corporate call with no limitations. Additionally, we invite *Premium* members to share their own calls for startups - free of charge (value $\leq 3,500$).

Incubator Explorer

Available in the member portal it helps business incubators and accelerators to customize a search to find peer programs for networking, sharing best practices, and forming collaborations. The feature is reflection of the number one reason business incubators and accelerators join the UBI Global community - networking.

UBI Speaker at your event

The incredible amount of fresh data and insights on global incubator accelerator data and best-practices - from research studies as well as conferences - allows UBI Global team to contribute as great speakers for events, workshops, or webinars. Speaking fees are waived for *Premium* members.

FREQUENTLY ASKED QUESTIONS

FAQs

Why should we become a member of the UBI Global community?

Membership - either Basic or Premium - with UBI Global provides access to features and content specifically curated and created for business incubators and accelerators. Many of our members join for the networking possibilities, while some join to learn from the world's top-ranked organizations and access UBI Global's original research and historical data. Still others want to add on the power of the Benchmark Tool to guide them in improving their organization to be recognized for excellence.

Whatever your main reason for joining our community, we believe that business incubators and accelerators are stronger together as an interactive global sharing community and we'd love to welcome you.

What is the difference between being a Basic and Premium member?

Premium members are open to 10 team members to explore and interact with other incubators and accelerators, with inportal messaging features, gain valuable knowledge from the content library, and nominate startups for corporate matching. Premium members can also contribute to the portal by submitting opportunities for open innovation from their own organization or their corporate partners twice per year. Additionally, premium members gain access to original research and premium content.

We have participated in the world benchmark study, why should we sign up for membership and get the Benchmark Tool add-on?

The World Benchmark Study is a static look at the global performance of business incubators and accelerators. Tied to the Benchmark Tool, this data will expire for you after your trial version is over. While you'll still have access to the PDF of your results, the data will not work in a dynamic way. When you sign up for membership and add on the Benchmark Tool, you open a whole new set of possibilities to help you continuously seek improvement in your program using valuable communication tools and on-demand Benchmark capabilities. This enhances your performance and guides you forward. Who knows, it may just lead to a World Ranking.

Can I get the Benchmark Tool full version without being a member?

The short answer is no. Our studies are and will always be for free. You'll receive access to a limited and trial version of the Benchmark Tool as part of your impact and performance result.

Premium members get a 10% discount on the Benchmark Tool add-on.
