

Clyde – LD3 Dollies

The Clyde LD3 dollies are container trailers. They are available with either two-wheel steering or four wheel steering. As an option, under carriage protection is available. A long tie rod, casters, and rollers are protected from the impact. Because these containers can rotate without complicated mechanisms, this means there is less maintenance for the operator. There is a max tow speed of 15 mph (24 kph).

Specs:

- Two wheel steering (15F2810)
- Four wheel steering (15F2805)
- Under carriage protection (optional)
- Long tie rod protected from impact
- Casters and rollers protected from impact
- Containers rotate without complicated mechanisms = less maintenance
- Max tow speed of 15 mph (24 kph)
