**GLOBAL-ENV.COM**

Tailored environmental engineering  
to meet unique project requirements  
and navigate an evolving compliance  
landscape.

Navigate regulatory waters with compliance experts and uncover insights to ensure remediation accountability. We're evaluating tomorrow's environmental impact, today.

## COMPLIANCE

---

Your technical site partner in navigating ever-changing environmental laws, regulations, standards, and permitting for federal, state, and local environmental compliance.

- Stormwater permitting
- NPDES, DMR, monitoring, & reporting
- Required sampling events (air, water, soil)
- Pollution prevention (SPCC, PIPP)
- Underground storage tank removal

## INVESTIGATION

---

Our environmental investigations characterize the extent of groundwater and soil contamination, then guide monitoring and corrective action.

- Feasibility assessments
- Conceptual site model development & enhancement
- Implementation of remedial or corrective action

## ASSESSMENT

---

We conduct environmental due diligence prior to acquisition of contaminated property to reduce state and federal liability for prospective buyers.

- Phase I: Environmental Site Assessment (ESA)
- Phase II: Environmental Site Assessment (ESA)
- Baseline Environmental Assessment (BEA)
- Brownfield project management
- Due care obligations
