Café Curtain
Measurement Guide

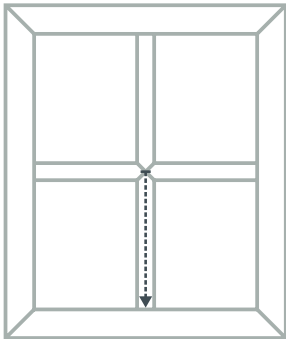

How to measure for Inside Mount Café Curtains

IMPORTANT: You will need a minimum of 3/4" of flat mounting depth in order to mount Inside Mount Café Curtains and for them to function properly.

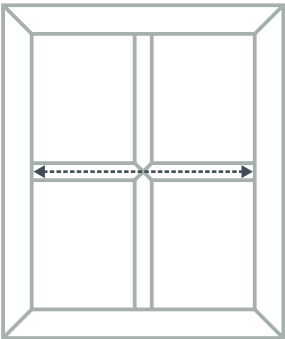

1. Measure Mounting Height*

Starting from the approximate mounting height found, measure the length from that point down to the bottom inside edge of the window, rounding down to the nearest 1/8" of an inch. Record the measurement below.

2. Measure Total Width

Along the approximate mounting height found, measure the width from inside edge to inside edge of the window, rounding down to the nearest 1/8" of an inch. Record the measurements below.

3. Choose Panel Configuration

Single or Double Panel. We generally recommend Double Panel for Café Curtains.

*Everhem Experts recommend mounting at the vertical halfway point on your window. If there are grid lines on your windows, we recommend mounting in line with the horizontal grid line that lands closest to the vertical halfway point.

How to measure for Outside Mount Café Curtains

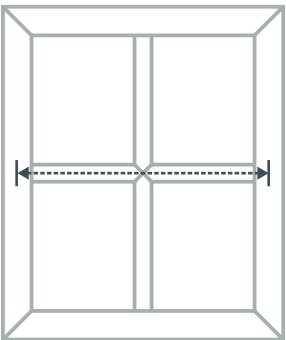

1. Measure Mounting Height*

Starting from the approximate mounting height found, measure the length from that point down to the bottom inside edge of the window, rounding down to the nearest 1/8" of an inch. Record the measurement below.

2. Measure Total Width

On the flat part of your window's trim, locate the centerpoint of your trim's flat mounting space. Along the approximate mounting height found, measure the width from trim centerpoint to trim centerpoint of the window, rounding up to the nearest 1/8" of an inch. Record the measurement below.

3. Choose Panel Configuration

Single or Double Panel. We generally recommend Double Panel for Café Curtains.

*Everhem Experts recommend mounting at the vertical halfway point on your window. If there are grid lines on your windows, we recommend mounting in line with the horizontal grid line that lands closest to the vertical halfway point.
