INSIDE MOUNT SHADE  
MEASUREMENT GUIDE

# How to measure for Inside Mount Shades

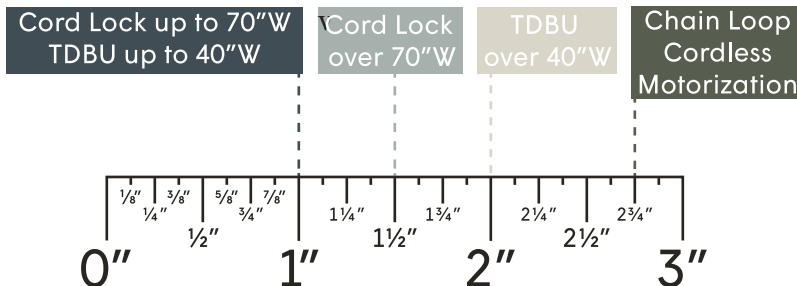

1. Rounding down to the nearest 1/8 of an inch, measure the inside edges of the window frame width in 3 places and record the measurements.

2. Rounding down to the nearest 1/8 of an inch, measure the inside edges of the window frame length in 3 places and record the measurements.

3. Keep in mind the depth of your window determines which Custom Control you can choose for your Inside Mount shade. Using the ruler below as a guide and rounding down to the nearest 1/4 inch, measure the flat mounting surface available on your window.
