

# SKiN Workflow – Mapping Catchments

## **Geoplan Spatial Intelligence Limited**

## **Changing the label of Catchments**

Once you have Catchments added as a layer to your project you can use the **Catchments Panel** to control the appearance of the layer, as well as the data associated with it. The following instructions will give you a step-by-step guide on how to switch on/off Catchment labels, how to change the labels that are displayed and how to add additional labels.

## Before you begin

Before you start styling your Catchments, make sure that you have your data set up in a saved project. If you need assistance getting the data into SKiN please refer to the following sections:

- Catchments Steps Create Project
- Catchments Steps Import Data

## Switch on Catchments layer labels

• To switch on your Catchment layer labels, **Open an existing project** and then select **My Data**, click on the label icon which can be found to the left of your Catchments layer name. The Catchment labels will then be displayed.

#### **Style a Catchments layer**

• To style your layer, open the layer editor by clicking on the name of the Catchments layer that you want to change.

#### **Select Catchments to update**

• In the **Select** section of the panel, you can control whether to update all Catchments in the layer or just a single Catchment. To update all Catchments, make sure that the **All** button is selected. To select an individual Catchment, click on the **Catch** button, then start to type the Catchment Identifier in the text box and select the required Catchment from the drop down list.
