

SonoTAP® II

*Echogenic, Non-Stimulating
Single Shot Plane Block Needle*

Plane blocks like TAP, QL, ESP etc. are gaining momentum and are a valuable alternative to Epidural Anesthesia or General Anesthesia. However, these blocks rely solely on users experience and needle shaft and tip echogenicity. With SonoTAP II, Pajunk has developed a special plane block needle for ultrasound guidance only, which includes the patented Cornerstone Reflectors for best needle echogenicity possible, irrespective of the insertion angle.

Non-Removable Injection Tubing

- Closed system
- No leakage

Colour-Coded Needle Hub

- Easy identification of
needle size

Depth Markings

- Easy to read and identify

Echogenic Needle Tip

Facet tip with two inclination angles

- Improves needle tip visibility under
ultrasound

Cornerstone Reflectors

360 degree graduations on the first 20mm of the needle.

- Optimised ultrasound visibility of needle shaft¹
- Reliable and optimised needle visualisation at any angle^{2,3}
