

Manometer

Manometer for CSF Pressure Measurement

As the manufacturer of the world's first atraumatic spinal needle, Pajunk takes the diagnostic spinal tap as an integral part of its core competences. With the SPROTTE® Lumbar needle and our Manometer, Pajunk provides the complete equipment for diagnostic CSF sampling and pressure measurement. The Pajunk spinal manometer allows for measurements up to 54 cm H₂O (with the additional extension tubing) and is available in LUER and NRFit®.

- A solid, transparent tubing allows for easy measurements up to 34cm H₂O
- Easy and secure assembly with Luer or NRFit connection
- Extension tube available separately allowing for measurements up to 54cm H₂O

Manometer	Size	Item no.	NRFit Item no.	PU
	3–34 cm H ₂ O	001151-38G	001163-38F	1
	Extension 20 cm H ₂ O	001152-38G	001152-38G	1
