Netsuite, Tailored to the Needs of the Life Sciences Industry.

From effortless vendor onboarding to robust contract life cycle management, the bundle offers specialized modules that handle everything from financial accruals to clinical operations. With features like built-in governance, dynamic program naming, and seamless DocuSign integration, this platform not only enhances efficiency but also ensures compliance and financial integrity. It's the ultimate tool for Life Sciences companies looking to optimize their operations without compromising on flexibility or security.

Vendor Onboarding Simplified

Our Supplier Onboarding Module revolutionizes the way you bring new vendors into your ecosystem. With a simple registration link, vendors are directed to a comprehensive form where they can input all necessary details to set up their profile. This information is then automatically fed into NetSuite, where it awaits approval.

Approval Workflows

With your Life Sciences Bundle, the approval process becomes streamlined and efficient, with the vendor application being routed to the designated approver at the subsidiary level. This ensures that the right people are involved in the decision-making process, enhancing accountability and control.

Responsibility & Governance

With our NetSuite Life Sciences Bundle, the responsibility for maintaining an up-to-date vendor record lies squarely with the supplier. This not only reduces your administrative burden but also ensures data accuracy. Our built-in governance mechanisms act as a financial safeguard, preventing bills from exceeding the agreed-upon contract amount.

“From vendor onboarding to financial accruals, we've engineered every feature to meet the unique challenges of the Life Sciences sector. With Zanovoy's NetSuite Life Sciences Bundle, you're not just managing your operations—you're mastering them.”

Contract Life Cycle Management

Navigating the complexities of Contract Life Cycle Management in the Life Sciences sector is no small feat. That's where Zanovoy's NetSuite Life Sciences Bundle comes in, offering a dedicated module that provides a holistic, 360-degree view of your CRO and CMO contracts. From the moment a contract is initiated to the time it expires, our user-friendly platform ensures that every aspect—be it setting terms, monitoring performance, or managing renewals—is handled with precision and ease.

Approval Workflow

The approval process becomes streamlined and efficient, with the vendor application being routed to the designated approver at the subsidiary level. This ensures that the right people are involved in the decision-making process, enhancing accountability and control.

Responsibility & Governance

With our NetSuite Life Sciences Bundle, the responsibility for maintaining an up-to-date vendor record lies squarely with the supplier. This not only reduces your administrative burden but also ensures data accuracy. Our built-in governance mechanisms act as a financial safeguard, preventing bills from exceeding the agreed-upon contract amount.

Accruals and Financial Management Automations

Zanovoy's NetSuite Life Sciences Bundle offers an advanced Accruals and Financial Management module designed to give you unparalleled control over your financial planning and accounting. Whether you're looking to distribute payments evenly or allocate specific amounts to particular milestones, our system provides the flexibility you need.

Our Accruals and Financial Management Automations offer you the control and flexibility to tailor your financial planning down to the finest details. From program financial planning to accrual automation, we ensure that your financial records are not just accurate but also insightful.

Program Financial Planning

Our bundle offers robust financial management features that handle both planned payments and accrued payment amounts. You have the flexibility to distribute amounts evenly across payment periods or allocate specific sums to particular milestones.

Accrual Automation

The system automatically tracks accrued amounts owing, even when a bill hasn't been received. This ensures that your financial records are always accurate. Over or under accrual is virtually eliminated as the system automatically books the appropriate journal entries.

Program Management

From the moment a contract is initiated to the time it expires, our user-friendly platform ensures that every aspect—be it setting terms, monitoring performance, or managing renewals—is handled with precision and ease.

Dynamic Naming

Our Program Management module dynamically creates program names by concatenating various elements like Indication, Area of Spend, Phase, and an Auto-Generated number. This makes it easier to track and manage multiple programs simultaneously.

Clinical Operations Management

Our specialized Clinical Operations Management module is tailored to meet the unique challenges and requirements of Life Sciences companies. From patient recruitment to trial management, every aspect is covered.

An Industry Aligned Solution for New and Existing NetSuite Users

For New NetSuite Users: A Smooth Onboarding Experience

If you're new to NetSuite, you're in for a transformative experience. Zanolvoy's NetSuite Life Sciences Bundle is designed to offer a smooth onboarding process that minimizes disruptions and maximizes benefits.

Quick Setup

Our quick setup process ensures that you can start leveraging the power of NetSuite in the shortest time possible.

Guided Transition

Our team of experts will guide you through the transition, ensuring that data migration and system integration are executed flawlessly.

Initial Training

To get your team up to speed, we offer initial training sessions that cover the basics and best practices of using NetSuite in the Life Sciences sector.

For Existing NetSuite Users: Enhance Your Capabilities

Already a NetSuite user? Zanolvoy's Life Sciences Bundle is designed to seamlessly integrate with your existing setup, offering specialized features that are aligned with the unique needs of the Life Sciences industry.

Feature Enhancement

Our bundle adds a layer of specialized features to your existing NetSuite environment, from advanced financial management to robust program management.

Data Continuity

Worried about your existing data? Our system ensures seamless data continuity, so you can transition without losing any valuable information.

Advanced Training

For teams already familiar with NetSuite, we offer advanced training sessions that focus on the specialized features of our Life Sciences Bundle.
