

PCMS Atlas™ for Workers' Compensation

POLICY ADMINISTRATION | BILLING & ACCOUNTING | CLAIMS MANAGEMENT |
AGENT PORTAL | MANAGEMENT & STATUTORY REPORTING

Struggling to Navigate Through Outdated and Inefficient Systems?

Today's workers' compensation insurers are facing a rapidly evolving industry, from changing workforce demographics, inflating medical costs, to a rise in complex claims, along with ever-changing regulation and expanding coverage requirements.

Investing in the right technologies is critical to staying competitive and being able to navigate through these disrupting industry challenges.

PCMS understands investing in new technology is a major strategic decision and should be treated accordingly. Let us help you build a stronger, more efficient insurance operation through simple, affordable, flexible, results-driven, cloud-native solutions.

"The Atlas solution enabled us to grow faster than we've ever grown before. Because we eliminated the need for redundant data entry, our underwriters can now concentrate on doing their jobs to rate and underwrite policies."

– TRIANGLE INSURANCE

AT-A-GLANCE

- ➔ Robust out-of-the-box functionality and user centric experience
- ➔ Accelerate productivity with intelligent workflow and rules-based automation
- ➔ Automated FROI/SROI
- ➔ Support benefit calculations and multi-version reserve worksheets
