AANAPISI Meeting
November 21, 2023

Attendees: Jose Perales, Dominique Bealin, Shajuan Young, Patricia Nicandro, Jane Baron, Sabrina Salvador, Alisia Eckert & Li Jin

Application
- Last year, application was released end of January - middle of February.
- Expected to be the same time period for 2024.
- Amanda and Ali will lead the efforts in writing the application. Will need to reach out to others on the committee to obtain data needed to complete the application.

DATA Needed
- DePaul has some retention reports that individuals are beginning to use. Jose will share the reports with the committee.
- Reports look at the number of students who are matriculating for the winter quarter.
- Is there something that comes to mind right now that we feel we need now to help improve our students’ retention?
  - For example, we requested data from IRMA about Theatre Schools for the HSI Taskforce. We requested information about strategy and marketing and how we target Hispanic students.
  - Recruitment and transfer process.
  - Student experience.
  - HSI Taskforce discovered we have two student government representatives and they suggested we include other student voices. Since then, we invited other students to attend Task force meetings. Students can share information that we don’t have. We are also planning focus groups and surveys as a way to get more engagement from other students.
  - Identify some students who may be able to do the same for the AANAPISI committee.
  - Jane and Sabrina could assist with identifying students and can also put a formal request into SGA to identify students who would be interested in participating.
- What is out there for Native American students? This may be where we capture their voices/needs. Native American students requested a space for themselves since they currently share a space in the Latinx center.

Committees
- Committees were formed when Liz served as VP. We can look at old notes to see if they were documented.
- How do we want to structure the ANNAPISI committees?
  - Examples of HSI committees:
    1. Recruitment, Transfer and Marketing
    2. Community Engagement
    - Internal and external community
    3. Student Experience Committee
Task force agreed that we will wait to form committees until we have more information on the areas that need to be focused on.

**Logic Model**

  - When HSI met in September, ideas were captured and then when they met in October, they created columns, they filled the data and it let the committee see how they are serving students and what they could do to improve.
  - Ally, Amanda and Jane will meet to help provide content for the application.
  - Asset mapping and logic model will be beneficial to bring in students for focus groups.
  - HSI started created questions for focus groups, Jose can send to Jane to spark ideas for the focus groups.
  - Question asked: Who has access to the federal systems? Decided that Research Services probably does. Jose will reach out to Lauren Miller and Sarah Weisz in Research Services to confirm. Will need to get this information soon so we can ensure the correct people have access.
