Business case. Dynamics 365 Finance & Operations deployment in Cloud in 3 month
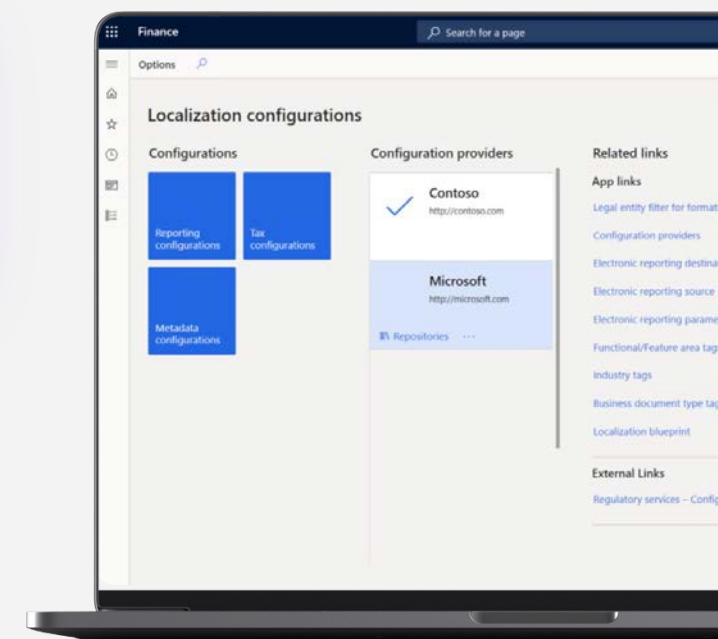

Client

Financial Services Company: Best Boutique prime broker, EU awards 2021

Revenue	Countries	Employees	Industry
$ 327 mln	**3**	**1 000**	**Finance**

Goal
Increasing operational efficiency by accounting automation in Cloud

Challenge

10 000+ transactions per hour. Financial reporting online in several currencies

Master data sync in real time in 3 countries: UK, Russia, Cyprus

3 month - project duration

Approach

Start work with system «at the next day»

High requirements to Cyber security

Green cloud opportunities: always on the latest system version

Workshop with business for fast design & release features

Solution

Power BI Embedded analytics & reports (P&L, GL Turnover, TB)

Maximum standard functionality of Dynamics 365 Finance Cloud with minimal designing (300 hours)

N.Progression's solution AIMA decrease duration of extension testing in 3x

Product: Microsoft Dynamics 365 Finance (Cloud)

For this project, we were looking for a partner with experience in implementing similar solutions from Microsoft in financial institutions. The N.Progression team was able to quickly immerse themselves in the specifics of our work, understand the features of business processes and take them into account when implementing an ERP system. The result of our work with N.Progression was the launch of the solution into commercial operation as soon as possible.

***** *****, project manager

Success

2x **Faster search for the necessary information**

3x **Simplification of reports preparation**

Business case. Cloud implementation of Microsoft Dynamics 365 Field Service in 1 month

N.Progression

Client

Manufacturer & Distribution: manufacturer of professional equipment and machines

Revenue	Entities	Employees	Industry
$ 470 mln	**27**	**900**	**Manufactury**

Goal

Improve service planning efficiency and reducing costs for the service department

Success

400 Satisfied users

+ 9% Utilization time of field service

- 30% Service Response Time

Microsoft awarded as Project of the Year 2020

Challenge

30+ business units with different business processes and different methodology of KPI calculation

Migration to the Cloud in 1 month

2 days - users downtime
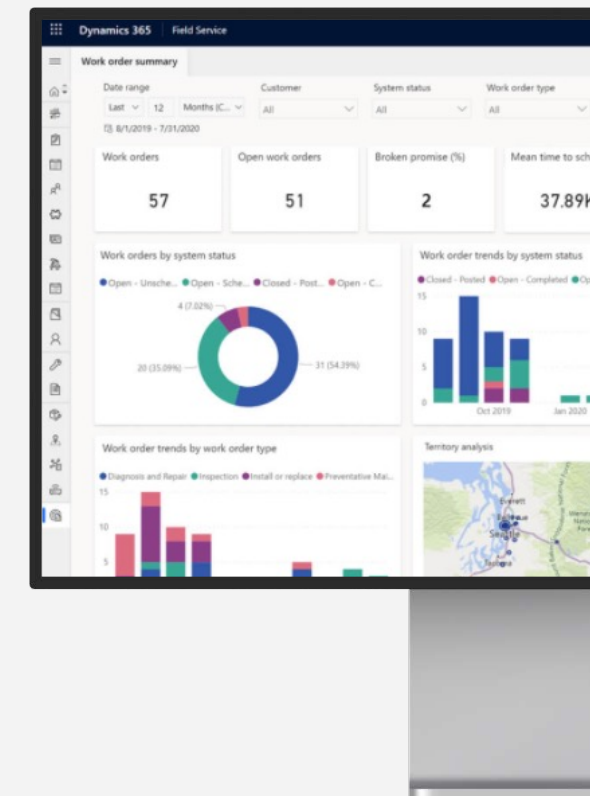

5 month – project durable

Solution

Online access to the assigned tasks with full necessary information for field employees

Tracking engineers work online for managers

Real-time automotive KPI calculation

Online time sheets for service administrators

Integration Microsoft Dynamics AX 2009 c Microsoft Dynamics 365 Field Service

Product: Microsoft Dynamics 365 Field Service, Microsoft Azure
