## Who We Are?

PPL Post-Tensioning is based in Atlanta, Georgia, renowned as an industry leader specializing exclusively in advanced and cost-efficient post-tensioning solutions, encompassing both bonded and un-bonded strands and tendons, tailored to diverse structural and application needs. Our service footprint extends across the United States, delivering expert structural design, precise shop drawings, comprehensive material supply, precise PT shop drawings, on field technical assistance, PT stressing and PT repair. At PPL, our unwavering mission is to excel, providing clients with the highest caliber of post-tensioning services at competitive rates, cultivating enduring client satisfaction, and upholding the utmost standards of professionalism and integrity in all our interactions.

**PPL Post-Tensioning:** Where excellence meets precision in every post-tensioning endeavor.

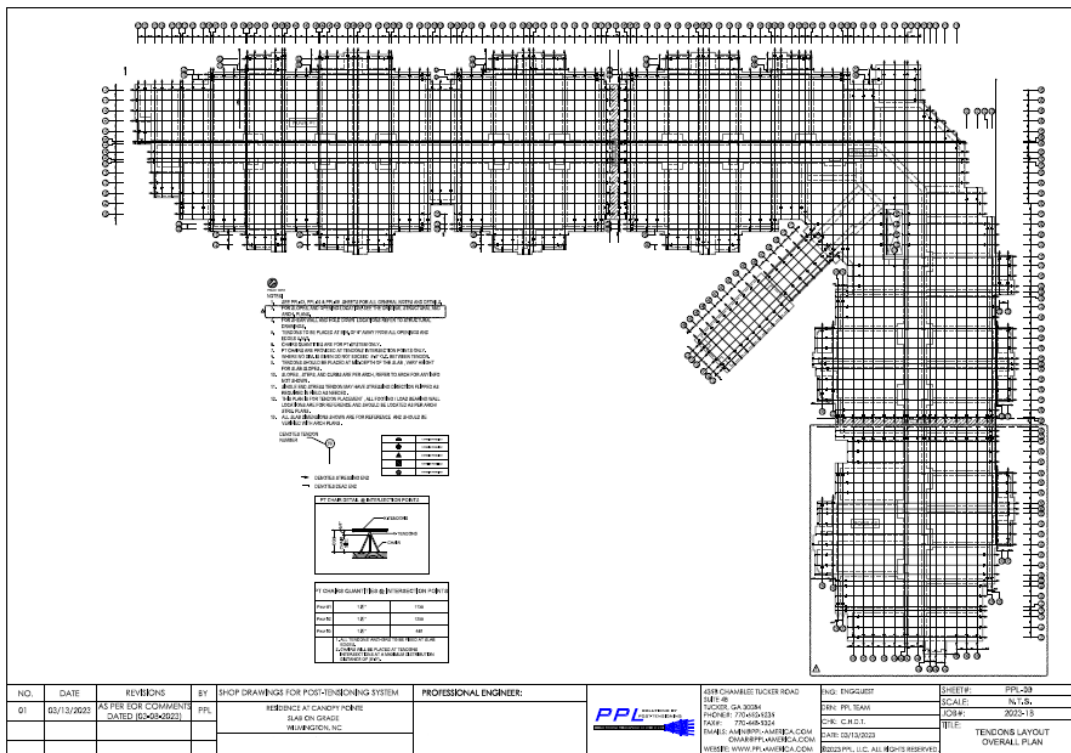

# Services:

- **Post-tensioning Design and Shop drawings:**

Philadelphia Post-tensioning Co. (PPL) provides services in the post-tensioning field by increasing the loading capacity of concrete elements such as beams, slabs, bridges, silos, slabs on ground etc. This is done by exploiting the force of high tensile steel to make concrete in continuous compression. This will help with:

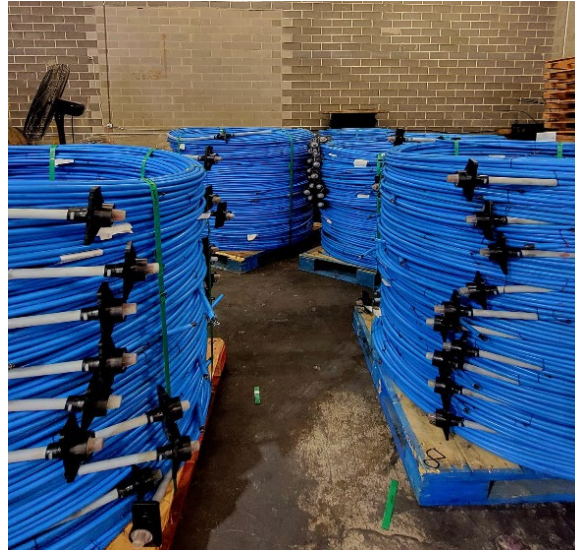

1. Avoiding any cracks to appear in the concrete.
2. Reducing concrete usage that will lead to lighter structures and enhancing their resilience against the impacts of earthquakes.
3. Producing economical and deflection controlled structures.

- **Post-Tensioning Material supply:**

We supply the highest quality of Post-tensioning materials that meets the industry standards.

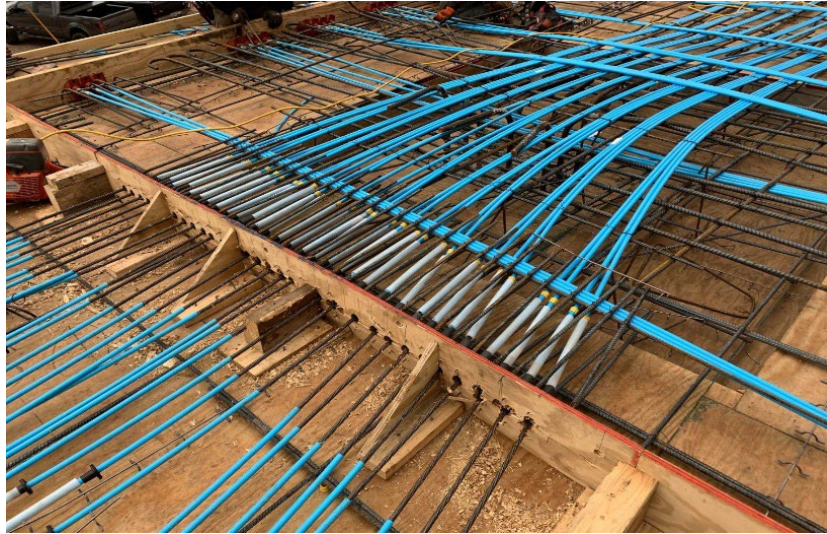

- **Post-Tensioning Technical Supervision:**

Our services extend to providing expert post-tensioning technical supervision, ensuring the precise and safe implementation of post-tensioning techniques in construction projects.

- **Post-Tensioning Stressing:**

We offer professional post-tensioning stressing services, expertly handling the tensioning of steel tendons within concrete structures to enhance their structural integrity and load-bearing capacity.

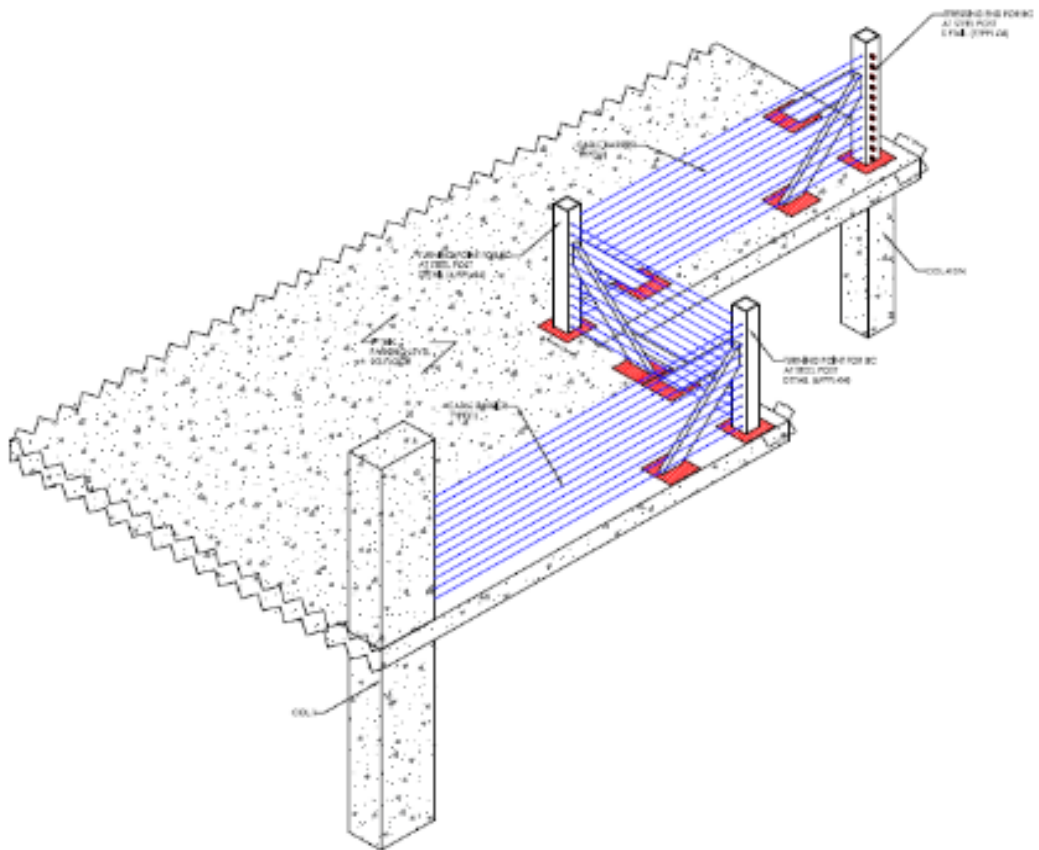

- **Post-Tensioning Repair:**

We specialize in providing comprehensive post-tensioning repair services. Our expert team is dedicated to inspecting, diagnosing, and remedying issues in post-tensioned structures to ensure their continued safety and functionality.

- **Cable Barriers:**

We deliver cable barriers integrated with advanced post-tensioning cables, offering effective safety solutions that combine cutting-edge technology with reliable protection.

**Projects:**

**CastleBerry Park Mixed Use (Atlanta, GA)**

**542 Boulevard (Atlanta, GA)**

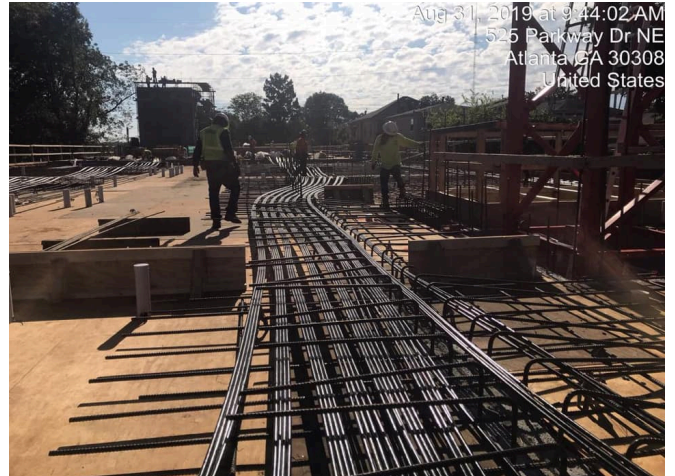

## 126 Renaissance Parkway Drive (Atlanta, GA)

## 525 Parkway Drive (Atlanta, GA)

## Hollet (Atlanta, GA)
