

Datadog Platform Co-Pilot

Our Datadog engineering expertise, on demand

Platform Co-Pilot gives you access RapDev's Datadog expertise with more flexibility than ever, enabling you to automatically monitor & improve your Datadog deployment.

Monitor the health of your Datadog platform

Automatically detect security vulnerabilities, audit costs, & reduce MTTR

Platform Hygiene	Ensure your platform is clean & efficient with visibility into the staleness of your tags, monitors, notebooks, dashboards, & service catalog
Real-time insights	See overages, unused components, & wrong log ingests with instant notifications via email/chat, plus weekly/monthly summaries & monthly account reviews with recommended actions
Continuous Monitoring	Instantly identify issues , including broken integrations, unresponsive agents & EOS/EOL agents, API keys, users, & more
