Migrating to Datadog from Sumo Logic

Migrate confidently & quickly with RapDev

RapDev helps ensure complex tool migrations to Datadog are on-time, on-spec, and on-budget.

High complexity does not have to mean high risk

Efficient & Intelligent
Data-driven approach to dashboard prioritization for seamless cutovers

De-risk & Accelerate
Industry-leading expertise in migrating complex, mission critical services

Increase your ROI
Optimize your logging strategy and workflow while reducing costs

Case Study | Global Leading Retail Brand enriches visibility & reduces MTTR with Datadog

	BEFORE — sumo logic	AFTER
Cross-team troubleshooting collaboration	Complex navigation for troubleshooting	United Platform Reduced MTTR by 50%
Adoption and Users	Challenging and difficult to ramp new users	Enabled multiple business units upon implementation
Lacking metric coverage	Blind spots in infrastructure	700+ native integrations providing full-stack visibility

PHASE 1 | Discovery

Can we migrate in time before our upcoming renewal?

How do we ensure no gaps in visibility during the migration?

How do we know or decide what should be migrated? What should be given priority?

PHASE 2 | Implementation & knowledge transfer

How do we drive a shift in culture so we make the most of observability?

How do we implement with best practices while maintaining the views we already have in place?

Do we have the right team for the work? Do they have the bandwidth?

Ready to get started?
