## I. Welcome to Our Adventure

### 1) Why have we created this project?

**Limited return on investment for players:** Currently, games offer satisfying experiences, but once the game is finished, players derive little tangible benefit from it. Competitions are often reserved for the best players, leaving the majority without any reward.

**Limited immersion between games:** Today's video games often target specific audiences, limiting immersion for players who enjoy a variety of game mechanics. In addition, limited connectivity between games prevents players from moving from one universe to another without losing immersion.

**Flaws of Play-to-Earn (P2E) models:** Although Play-to-Earn (P2E) models are popular, many P2E games neglect the player experience by focusing solely on the financial aspect, resulting in a limited gaming experience.

**Metaverse limitations:** Today's Metaverses are often reduced to marketplaces or visual experiences, leaving players unsatisfied. An attractive Metaverse needs to offer much more than a simple commercial or visual transaction.

**Underestimation of Non-Fungible Tokens (NFTs):** NFTs are often perceived as speculative tools. However, we believe in their potential to bring a community together and enhance the gaming experience far beyond financial gain.

In creating **Oxelta**, we aim to solve these problems and revolutionize the video game industry by offering an immersive, connected and fair gaming experience, while harnessing Web3 technology to create an unprecedented gaming experience.

### 2) Why do we exist?

**Oxelta** was born out of our passion for Web 3 and video games. Our goal is to redefine video games by eliminating barriers. We see the Metaverse as the future, a space where players from all over the world can connect and share unique adventures. **Oxelta** presents itself as an implementation of the latest technologies in a universal, comprehensive video game with infinite possibilities.

We firmly believe that the P2E models supported by Web 3 go far beyond the simple pursuit of financial profit. Our vision is to create an ecosystem where rewards encompass the enhancement of the gaming experience, community building and the personal development of players.

We're here to meet gamers' expectations, put them first, and revolutionize the industry in the process. Our global approach to video games is fundamentally transforming the way gamers experience gaming.

### 3) Our vision

#### "Breaking down barriers"

At **Oxelta**, our vision is to release more than just a game, but an experience that breaks down the barriers between today's digital world and the real world, using Web 3 to make our impact real. We're going even further by actively inviting our community to participate in the creation of this universe, by connecting tokens, characters and a multitude of other elements.

We use NFTs to provide each user with a personalized and valuable experience, enabling everyone to stand out from the crowd within our Metaverse. By fostering the connection between various game mechanics and distributing wealth equitably within our community, we are removing current limits. Our ultimate goal is to place our players at the heart of our development, rather than focusing exclusively on corporate interests. Our aim is for **Oxelta** to become an integral part of our users' daily lives, bringing a dose of fun and change to the way they play and, more generally, the way they live and perceive the world.

### 4) Our mission

#### "Liberate Gaming"

We aspire to transcend video game conventions by pushing back the boundaries of the gaming experience. For us, "Unleashing Gaming" means much more than providing entertainment. It means breaking down the barriers between the virtual and the real, exploring new technological frontiers, and above all, enabling every gamer to become an essential player in our universe.

We're committed to unlocking the potential of gaming through innovative use of Web 3 and NFTs. Our mission is to offer an experience where every player can stand out, where tokens, characters and other elements are connected to create a captivating Metaverse. By fostering connection between game mechanics, distributing wealth equitably, and placing our players at the heart of our development, we're breaking down current barriers to create a transformative gaming experience.

With **Oxelta**, we liberate gaming from conventional constraints, bringing pleasure, change and a new way of perceiving the world through the lens of play. Our mission goes beyond the video game industry to create a revolution in the way we play, live and interact with the virtual world.

## 5 Our objectives

**1. Create an Immersive Metaverse:** Our main objective is to develop an innovative Metaverse that redefines gaming experiences, offering a connected and captivating universe for everyone.

**2. Personalized P2E experience:** We aim to provide a unique experience for every player by using NFTs for personalization, so that every user is unique within our Metaverse.

**3. Fairness and Prosperity:** We believe in decentralization and aim to fairly redistribute the wealth generated by our ecosystem, fostering a thriving and active community.

**4. Promoting Web 3:** We encourage the adoption of Web 3 by demonstrating its benefits in video games, raising awareness of blockchain and NFTs, and making the experience user-friendly for all.

**5. Continuous Innovation:** We are committed to staying at the forefront of innovation by exploring new technologies and game mechanics.

## 6.Action Plan

To realize this ambitious vision, we have a multi-stage plan:

**Creation of our Token:** Our Metaverse will have its own Token, at the heart of our ecosystem to encourage participation and wealth creation.

**Creation of Character NFTs:** We will develop unique NFTs to enable players to personalize their experience and stand out from the crowd.

**P2E Mobile launch:** A first P2E experience on mobile will offer a glimpse of our Metaverse and stimulate participation.

**Community Competitions:** Tournaments will bring our community together, strengthening bonds between players and demonstrating our commitment to a unique, immersive experience.

With these steps, we will inevitably progress towards our vision of revolutionizing the video game industry by putting gamers first. Join us in this adventure, in this video game revolution that is taking shape thanks to **Oxelta**.

## II. The Oxelta Ecosystem

The **Oxelta** ecosystem is the foundation on which our Metaverse and P2E will be built.

**Oxelta's** ambition is to transform the gaming experience through Web 3, exploiting its potential while offering users the option of not interacting with this technology if they prefer. The easy creation of an account via Google will make it possible to associate a Polygon address for participation. Purchasing our NFTs in euros/dollars will be possible without the need for a dedicated account. Web 3 will remain discreet in the background for users unfamiliar with its use.

### 1) Our Basic Ecosystem

**1. OXELTA account:** The first step in participating in Oxelta is to create an account. This operation will initially take place on our website, assigning a Polygon address to the customer's account if they don't already have one, and will then continue on our application. Unlockable titles will be associated with player accounts in the form of non-transferable NFTs, adding a unique dimension to the player experience.

**2. Access to Oxelta games:** To enter our games, users will need an Oxo Warrior in NFT format, the main element of our universe. There are two ways of acquiring an NFT Oxo Warrior: primary sale or the Marketplace, where a simple account will suffice. The NFT Oxo Warrior allows you to take part in **Oxelta's** first P2E.

**3. OXLT Token:** Our OXLT Token will be required to use the features of our gaming platform. The Token will be the reward for our P2E, allowing you to acquire goods and participate in its economy. OXLT will be available at the start of the Oxelta project, with part of its business model dedicated to P2E. OXLT will be available through private sales, ICOs, AirDrop, exchanges (CEX and then DEX) and, of course, through our games.

**4. NFTs and equipment:** At **Oxelta**, users will be able to equip their Oxo Warriors NFTs with special equipment, which will also be NFTs. These pieces of equipment will form an important part of the gaming experience, offering players the chance to customize their characters and improve them over time. Other elements will also enrich this dimension.

**5. Oxelta Application:** Our Application will act as a hub for users, enabling them to track their activities, manage their accounts and access mobile P2E games and the Marketplace. The Application will evolve in parallel with the development of the Metaverse.

**6. Community and tournaments:** Our aim is to create a dynamic Metaverse where a community of players come together, collaborate and compete. With this in mind, we'll be organizing highly competitive tournaments with tempting jackpots for the winners.

In short, our core ecosystem is the first step in paving the way for the future Metaverse.

## 2) Our Metaverse and its games

Access to our Metaverse will be automatic when you own an Oxo Warrior NFT. We'll also include the possibility of renting your NFT Oxo Warrior. We want the Metaverse to be a place where players come to share, create and discover new opportunities.

The visual aspect of our Metaverse will be designed in relation to the Oxo Warrior families. At its center will be Sir Oxo's castle, surrounded by 20 different neighborhoods. We'll be creating events in the Metaverse, such as concerts, art exhibitions and events directly linked to **Oxelta**. Some spaces will be in the form of NFTs, allowing individuals to acquire them and define an economy directly linked to their assets. The customization of purchased locations will be visible on the map and will influence the player's experience.

Our aim is to connect as many players as possible simultaneously. Reality will force us to spread players over different sessions of the Metaverse map, but we always group friends together to share the gaming experience. We'll be giving more details on this technical part later, but we're working hard to get all players together simultaneously.

At launch, a story will unfold across the entire virtual world we've created. This MMO RPG (Massively Multiplayer Online Role-Playing Game) in PVE (Player versus Environment) will be offered in team or solo mode, based mainly on the lore of **Oxelta**.

This adventure will be the first part of the Lore of Oxelta game, aimed at better understanding **Oxelta** and its history.

Later on, we'll be creating more complete P2E games. We plan to create games with different mechanics, allowing players to change mechanics while remaining in a connected universe. These PVP (Player versus Players) games will offer OXLT rewards. In addition, we will allow players to wager with OXLT tokens, within reasonable limits, to increase the potential revenue from each game.

Oxelta will also offer short-term competitions for all players, with substantial rewards for the winners. We'll be challenging the community with ephemeral events, an idea directly inspired by Sir Oxo's Tournament, Oxelta's first community event.

Oxelta doesn't want to remain in a closed universe. We'll also be inviting development teams to create games and events. The best ones will work directly with the Oxelta team to integrate them into our world. In addition, we'll be partnering with existing games to integrate them directly into our Metaverse. Of course, we'll be adding a Web 3 and P2E dimension to keep things in line with Oxelta's own dynamic, rewarding with the OXLT token.

Our Metaverse is an ambitious vision, but players, wouldn't you like more? We'll keep you informed of developments and upcoming games. When the Oxelta Metaverse arrives, we promise to listen to the community and evolve for you, the players.

### III. OXLT token

#### 1) Token

**Oxelta**, in order to boost its games and reward its community, issues a Token on the **Polygon** Blockchain. This Token, named OXLT; is a utility token. It is required to access the gaming platform's services. All uses will require consuming OXLT tokens. The OXLT token will be consumed by the community only within the project. With a maximum total quantity of **10,000,000,000**, **OXLT** is designed as a **fixed token**, where the number of Tokens in circulation cannot be changed.

The Polygon Blockchain offers a secure, scalable and decentralized environment, which will enable **Oxelta** to implement its gaming and rewards ecosystem seamlessly and efficiently. What's more, the Polygon blockchain is EVM compatible, making it possible to consider partnerships with projects established on other EVM blockchains.

We will explore in detail the different aspects of the OXLT Token: utility, distribution, cliff, vesting, community engagement.

#### 2) Utility Token

The Token plays a central role in our ecosystem, as an essential element of all transactions and interactions. It is designed to offer versatile utility and promote user engagement in our Metaverse. Here are the main uses of the token:

##### a) Utility before Metaverse

**P2E mobile:** The OXLT Token will be used to access additional games and also to acquire one resurrection per game, reinforcing the competitive dimension of our first two mobile games.

**Sir Oxo Tournament:** Each player has the opportunity to enhance the power of his Oxo Warriors NFTs by using OXLTs during duels. This increases strength, giving all participants a fair opportunity to improve their chances in a Community Tournament duel. Details of this mechanic can be found in Part VIII: Sir Oxo's Tournament.

**Marketplace:** Our Marketplace will enable peer-to-peer (C2C) transactions with our Token. Users will be able to buy, sell and trade their NFTs, creating a dynamic economic ecosystem.

**Player's title:** We'll be introducing honorary titles to reward actions carried out on. The titles will be associated with specific OXLT-related achievements, recognizing users' contributions (see Player Title Annexes).

## b) Utility after Metaverse

For phase 2 of our development, we plan to introduce new features and benefits for our Token:

**Special skins for certain games (B2C):** Users will be able to acquire special skins with their Tokens to customize and/or transform their characters, enhancing their gaming experience.

**Game advantages:** the Token will offer unique advantages on certain games, making the gaming experience even more immersive and competitive.

**Participating in Special Missions:** Users will be able to use the Token to participate in special missions, expanding gameplay possibilities and offering unique rewards.

**Betting Against Other Players:** The Token will enable participants to bet against other players during certain activities, adding a further competitive dimension to our Metaverse.

**Combat Pass per Season:** Oxelta will be introducing seasons accompanied by a Combat Pass. This will be acquired via our Token. Possession of a Seasonal Combat Pass will unlock exclusive rewards as you progress through the levels.

By encouraging user/player adoption and engagement, the Token creates a dynamic and stimulating economy within our platform. These multiple use cases ensure that the Token plays a central role in the user experience, both in the initial and future phases of **Oxelta's** development.

## 2)Token Economics

OxLT distribution:

Categories	Token	%
Private Sale	500 000 000	5%
ICO	1 000 000 000	10%
Liquidity	1 200 000 000	12%
Aidrop Early	300 000 000	3%
Sir OXO Tournament	200 000 000	2%
Blocking Plan	1 000 000 000	10%
P&E Reward	2 500 000 000	25%
Marketing & Community	1 000 000 000	10%
Team	800 000 000	8%
Treasury	1 500 000 000	15%
<b>Total</b>	<b>10 000 000 000</b>	<b>100%</b>

### a) Private sale

At the public launch of our Token, our first initiative will be to organize a private sale. This will represent 5% of the total allocation and will be detailed in section IV, including its price, cliff and vesting. This private sale marks the inauguration of our token on the market and will be accessible to a maximum of 150 investors carefully selected by Oxelta.

### b) ICO

After the private sale, we will launch the ICO, during which we will make available 10% of the total quantity of our token. This ICO will take place over a period of 60 days, subject to a limited allocation of tokens for this phase. It is important to note that we will offer three different prices for the Token, justified by different cliff and vesting periods. In addition, the Token price will increase linearly over time to encourage community participation in the ICO.

We are offering our community a unique opportunity to become actively involved in our project by acquiring Tokens and contributing to our collective success. For more details, please see section IV on the ICO.

### c) Liquidity

We are allocating 12% to liquidity. Our first action is at the end of the ICO, 30% of the funds raised will be used to form a liquidity pool managed by **Oxelta**.

In the event of maximum sales during the ICO, we plan to build up a liquidity pool of around \$500,000, made up of 2.63% of the total supply, thus facilitating trading. The DEX price will be determined by the last ICO price.

The remainder of the liquidity tokens will be held for proposal to centralized exchange platforms (CEX) in order to list the OXLT on these platforms and make it as accessible as possible to all users.

### d) Airdrop Early

To boost our project, we are organizing an Airdrop with 3% of the supply destined for 7,500 people on the Zealy platform. This AirDrop will be competitive with a ranking system, with players gaining experience through their actions.

This Airdrop takes place over a period of activity that begins with the announcement of our ICO and ends with the end of the ICO. However, to ensure a fair and stable distribution of tokens, we use an initial Cliff mechanism of two months, followed by a Vesting period of three months.

Airdrop distribution table :

Ranking	% Supply	%/User	Token	Token/User
<b>1-10</b>	0,07%	0,0070%	7 000 000	700 000
<b>11-110</b>	0,40%	0,0040%	40 000 000	400 000
<b>111-1110</b>	1,20%	0,0012%	120 000 000	120 000
<b>1111-7500</b>	1,33%	0,0002%	133 000 000	20 814

### e) Sir OXO Tournament

As part of the Sir Oxo Tournament, which represents our very first community competition, we have set aside 2% of Tokenomics for rewards. The distribution of these Tokens is transparent and straightforward. The maximum number of duel phases allowed in the tournament is 43, as detailed in the tournament rules. The first two stages of the Heaven of Ascendants, the Land of the Fallen and the final will not give rise to OXLT rewards.

For each duel, a fair share of 2.5% of the Sir Oxo Tournament tokens is at stake. The duel winners share this 2.5% share of the tournament tokens equally. This process is repeated until the final. You'll find a detailed payout table in the appendix.

It is essential to note that some dueling phases may be cancelled for two reasons: the number of Oxo Warriors sold before the start of the Sir Oxo Tournament, which influences the number of duels in the first arena in the Heaven of Ascendants, and the fact that arenas in the Land of the Fallen, linked to the equipment of a Sir Oxo Grace (NFT not compulsory), may vary according to participation. OXLTs not distributed at the end of the tournament will be allocated to "P2E Rewards" for subsequent redistribution to the community.

OXLTs won in Sir OXO Tournament duels will be subject to a 6-month vesting period from the end of the tournament.

These OXLTs will not be associated with the portfolio of the player who won with an Oxo Warrior. They will be attributed to the portfolio holding this Oxo Warrior at the time of the transfer of part of the OXLTs.

### f) P2E Rewards

**Oxelta** is an ecosystem dedicated to P2E (Play-to-earn). We will regularly introduce new activities and games, offering users the chance to earn OXLT tokens.

This category of tokens represents 25% of the total offer. These Tokens will be distributed to players according to their commitment and active participation in our games.

Oxelta will not be able to sell this category of Tokens by any means. They are strictly reserved for players and can only be acquired through participation and interaction in our games.

The P2E reward category has a waiting period with a cliff of one month, and will be subject to a vesting period of 50 months.

The aim is to create a consistent distribution of P2E rewards. In this way, a disconnect is established between the release of Tokens and the quantity that can be earned. Once the balance of OXLTs has been used up in the P2E rewards address, we ensure the sustainability of the P2E model by enriching the value proposition within our games.

The use of OXLTs will allow funds to be accumulated and reallocated within P2E, ensuring the sustainability of **Oxelta's** model.

### g) Marketing & Community

We reserve 10% of the total offer to support our marketing initiatives, including giveaways on social networks, targeted promotions, partnerships with specialized content creators and compensation for our active Discord members.

Of this 10%, 5% is made available to **Oxelta** and will be partially used for ICO affiliation, followed by a 19-month vesting period. This vesting is designed to limit excessive marketing actions and protect OXLT holders against a flood of Tokens.

We value our community and are committed to using these resources responsibly to drive the growth and visibility of our project.

### h) Blocking Plan

**Oxelta's** Blocking Plan is designed to reward members of our community who choose to retain their Tokens in anticipation of the Metaverse launch. Under this program, 10% of the total supply of OXLT Tokens has been reserved.

We would like to highlight the key rules of this program:

- **Eligibility for the Blocking Plan Program:** To be eligible for this program, you must receive OXLT tokens as part of the following actions: private sale, ICO, AirDrop, Sir Oxo Tournament, P2E Reward, the blocking plan itself, Marketing-Community, Team. The acquisition of tokens outside these actions does not offer the advantage of the blocking plan.
- **Quantity of Tokens Eligible:** The quantity of Tokens eligible for the blocking plan will be determined and 1.5% of this quantity will be distributed each month.
- **Capitalized interest:** Tokens acquired via the blocking plan will increase the quantity of eligible Tokens, creating compound interest.
- **Transparency:** We will publish monthly updates to keep you informed of the status of the program.
- **Smart contract:** The blocking plan is based on a smart contract that tracks transactions between Oxelta's portfolios and yours as part of the actions mentioned. The contract determines a quantity of OXLT eligible for the program.

*Example: I obtained 20,000 OXLT through an AirDrop and bought 20,000 OXLT on a DEX. The blocking plan mechanism determines that you hold 20,000 OXLT eligible for the blocking plan. If you don't reduce the quantity of eligible tokens, you'll earn:  $20,000 * 1.5 / 100 = 300$  additional OXLTs, bringing your total eligible OXLTs to 20,300, which will then become your basis for calculating the second month's interest (and so on). Your portfolio will then contain a total of 40,300 OXLTs. However, if you sell more than 20,000 OXLTs, you will reduce your eligibility for the blocking plan.*

We have calculated that if all participants follow the plan, the 10% of the total offer allocated to the blocking plan will be distributed after 24 months, provided everyone follows the plan and **Oxelta** deploys all the Tokens released.

However, it is possible that in the future not all conditions and not all participants will participate in the blocking plan over the planned period.

In this case, from January 2030 onwards, the remaining parts of the blocking plan will be returned to **Oxelta's** treasury. This means that if some participants do not maintain their tokens in accordance with the blocking plan criteria until the end, the corresponding tokens will be returned to Oxelta from the beginning of 2030.

## i) Treasury

We have reserved 15% of OXLT Tokens for our treasury, with a 12-month cliff period, followed by a 36-month vesting period. This cash is strategically positioned outside our current financial plan, and its use will be exclusively dedicated to improving the Metaverse and Oxelta and its games.

## J) Team

The **Oxelta** team's share of the allocation represents 8% and will be locked in for 16 months. This is to ensure that private sale, ICO and airdrop investors receive their tokens before the team. Team vesting will be spread over 32 months.

Our aim is to demonstrate our commitment to the preparation of the Metaverse while ensuring the transparency and trust of our community by aligning our interests with theirs.

## IV) Private sale and ICO

For the launch of the OXLT token, we will first hold a private sale. Oxelta will select investors, with a limit of 150 participants, with the aim of reaching a target of \$400,000. This money will finance the communication plan for the Oxelta project and help build the mobile application. Once the private sale is over, we'll offer an ICO (initial coin offering) to the public. This ICO aims to raise \$1,500,000.

This money will be used for the full development of phase 1:

Expenses	Amount
Technical requirements	\$100 000
Team building	\$100 000
Application	\$200 000
Sir OXO Tournament	\$100 000
P2E Mobile	\$100 000
Metaverse base	\$200 000
Marketing	\$200 000
Token Liquidity	\$500 000
<b>Total</b>	<b>\$1 500 000</b>

### 1) Private Sale

The OXLT Private Sale represents an allocation of 5% of the supply of our Token and is planned for the end of the fourth quarter of 2023, with the possibility of an extension until the beginning of the first quarter of 2024, depending on the results obtained at this stage. This private sale will be held exclusively on our Web App, accessible from the **oxelta.io** website. Please note that to participate, KYC/KYB validation will be required, guaranteeing security and compliance.

To register for the private sale, you have two options: the first is to be contacted directly by Oxelta, which will give you access to a privileged whitelist. The second option is to submit your request after registering on our website. Please note that the number of participants is limited to 150.

During the private sale, the OXLT Token will be offered at a fixed price of \$0.0008 throughout the pre-sale period. You'll have the option of buying OXLT using Fiat or USDT funds, offering payment flexibility.

In addition, a 6-month cliff will be implemented, followed by a 10-month vesting to ensure a progressive distribution of Tokens. This step will be implemented after the conclusion of our ICO, marking the start of Token issuance.

The minimum investment required to participate in the private sale is **\$800**. For more ambitious investors, a maximum investment of **\$40,000** is possible.

It is essential to note that the private sale takes place before the Token is created. By participating in this phase, investors will receive an NFT indicating the quantity of OXLT purchased. This NFT can be traded on **Oxelta's** secondary market, giving private sale investors the flexibility to decide to sell their entire investment. This NFT facilitates the transformation of an illiquid market into a liquid one by enabling the sale of the NFT on a per-to-per basis.

The NFT guarantees the private sale: at the end of the cliff, the final holder of the NFT will receive the OXLTs associated with the private sale according to the planned vesting.

Phase	Price	Cliff	Vesting	Tokens	Min.	Max.
<b>Private</b>	\$0,0008	6	10	500M	\$800	\$40 000

Cliff and vesting are expressed in months. The token is expressed in million units.

## 2) Public ICO

The total quantity of Tokens allocated to the public ICO will be 10% of the total supply. The public ICO will begin 60 days after the end of the pre-sale and will run for a period of 60 days.

Our ICO comes with 3 pricing options for the OXLT Token, depending on cliff and vesting periods. This approach will enable investors to customize their investments by choosing the structure that suits them best. In addition, a 1% increase in the ICO tier price will be applied every 6 days, i.e. more than a 10% increase, to reward early investors.

This table shows the ICO tiers and their token allocations.

Phase	Initial price	Final price	Cliff	Vesting	Tokens	Min.	Max.
<b>P1</b>	\$0,00130	\$0,00144	4	8	350M	\$100	\$5 000
<b>P2</b>	\$0,00150	\$0,00165	2	6	400M	\$100	\$5 000
<b>P3</b>	\$0,00172	\$0,0019	-	-	250M	-	\$10 000

Cliff and vesting are expressed in months. Token is expressed in million units.

## 3) ICO affiliation

For the Oxelta ICO, you can obtain an affiliate link. There are two ways to receive this affiliate link. The first is to take part in the private sale, while the second is to invest a minimum of \$500 in the ICO.

Each referral who invests in the ICO using the affiliate link will grant his or her sponsor 3% of the OXLT invested as a reward.

For the referrer, the benefit lies in the fact that the use of an affiliate link guarantees the initial unit price for his investment, avoiding the price evolution of the ICO every 6 days.

It is important to note that the 3% Tokens offered to the sponsor will be taken from the supply dedicated to Marketing and Community, and these Tokens will be immediately available on issue of the OXLT.

#### **4) Initial listing price**

The initial quotation price of the OXLT Token will therefore be set at the final value of the last public price, i.e. \$0.0019. To reach this value, we are allocating 30% of the revenues generated by the ICO to a liquidity fund, equivalent to around \$500,000. In addition, around 2.63% of the supply (taken from the "liquidity" section) will be dedicated to the creation of a liquidity pool, enabling the OXLT to be set up on a decentralized exchange (DEX).

---

## **V) NFT**

Oxelta's world places NFTs at the heart of its development. We're convinced that Web 3.0 technologies will play an essential role in the future of video games, and that's what we want to convey.

Oxo Warriors represent the main NFTs in our universe, allowing holders to access our world and enjoy the various games and events we offer. They can be customized with a variety of accessories, offering the possibility of modifying their appearance or enhancing their performance according to the games on offer.

### **1) Oxo Warriors:**

Oxo Warriors are the main NFTs in our universe. They are the entry ticket to our Metaverse, offering access to our various P2E games.

The total number of Oxo Warriors is set at 1,048,576. We've chosen this number to bring together a community that can accommodate hundreds of thousands of players from all over the world. What's more, this number is a multiple of 2 ( $2^{20}$ ), which allows us to have an even number of players when setting up tournaments, such as the Sir Oxo Tournament, or duel-based games.

### **Rarity levels:**

We've created three levels of rarity for our Oxo Warriors characters, based on visual aspects, specific quantities and design features. Each level of rarity offers a distinctive value to our characters and contributes to the diversity of our universe. Each Oxo Warrior is carefully designed to be unique and precious.

**LEGENDARY****RARE****COMMUN**

	Legendary	Rare	Commun
<b>Nbr. of "X"</b>	2	1	-
<b>Supply</b>	1 050	105 000	942 526
<b>%</b>	0,1%	10,01%	89,89%

Oxo Warriors are distinguished by their rarity, offering different advantages in certain games. The rarer the NFT, the more interesting the associated benefits. What's more, we've created 20 families of NFTs, and the number of Oxo Warriors in each family will be revealed when the packs are distributed. These families will offer specific benefits linked to their membership in the future of the project.

For the Sir Oxo Tournament, each soldier will benefit from a level of power granted according to its rarity. Legendary soldiers will have a power level of 50, rare soldiers will have a power level of 35, while common soldiers will have a power level of 25.

**2) Artifacts**

Artifacts are types of NFT designed to enhance Oxo Warriors. Each game will use artifacts in its own unique way. Each player can own an artifact, defined as a weapon or weapons. There are as many artifacts as Oxo Warriors, i.e. 1,048,576.

For the Sir Oxo Tournament, artifacts add power to the character, the legendary adds 25 power, the rare 20 and the common 15.

**LEGENDARY****RARE****COMMUN**

	Legendary	Rare	Commun
<b>Creation</b>	2 shiny weapons	2 weapons	1 weapon
<b>Supply</b>	1 050	105 000	942 526
<b>%</b>	0,1%	10,01%	89,89%

### 3) Grace of Sir OXO

The Grace of Sir Oxo is an exclusive NFT associated with the Sir Oxo Tournament. It can be attached to a selected warrior, but once attached cannot be removed. Its use is automatic and requires no intervention on your part. The sale of an Oxo Warrior equipped with this grace also entails the sale of the grace, which will be clearly indicated on our marketplace.

This NFT gives you a second chance in the Sir Oxo Tournament. If your equipped warrior loses a battle, he will be teleported to the Land of the Fallen, where he will have another opportunity to take part in the final.

Sir Oxo's Grace is specific to the Sir Oxo Tournament and cannot be used for other tournaments or games. It takes the form of a gem which changes color to indicate its status: blue for the heaven of the ascended (no defeat), red for the land of the fallen (one defeat) and black for final elimination.

**Please note that Sir Oxo's Grace, as an NFT accessory, will be burned at the end of the Sir Oxo tournament and will have no use in future Oxelta games.**

### 4) Sales

#### a) Packs

Oxelta pre-sales offer a unique opportunity for players to engage with our online game world from the very beginning. We offer 3 different packs, each with exclusive offers:

#### GOLD PACK

#### SILVER PACK

#### BRONZE PACK

	Gold pack	Silver pack	Bronze pack
OXO Warrior	1	1	1
Sir OXO's Grace	1	1	-
Artefact	1	-	-

It is important to note that purchasing a pack will allocate NFTs to you on a random basis. There will be no guaranteed rarity level when purchasing packs.

However, when our Marketplace is released, you'll be able to buy NFTs on the secondary market that have already been revealed, and for which you'll therefore know the rarity in advance.

Purchases of these packs will be made via our web app on the **oxelta.io** website and will be payable in FIAT as well as cryptocurrency; details on these points will be communicated prior to sales.

### b) Whitelist

The Whitelist offers privileged access to the most active members of the community. As well as benefiting from special rates on our packs, Whitelist members will enjoy exclusive long-term advantages such as access to private events and the chance to become beta testers.

**Here are the Whitelist pre-sale prices for our packs:**

- **Bronze Pack: \$19**
- **Silver Pack: \$29**
- **Gold Pack: \$35**

What's more, for every purchase of 5 Gold packs, we're giving away the sixth.

Access to the Whitelist will be via missions to be set up on the Discord. Interested parties will have to meet certain conditions and complete various missions to be eligible for the Whitelist. Whitelist missions and details will be announced and posted on our platform.

Being a Whitelist member has two major advantages in the first phase of **Oxelta**. You'll receive a referral link after purchasing 5 packs, and you'll be compensated for every purchase made with this link. The sponsor will receive 10% of the total amount of the sale, and the sponsored member will benefit from a 10% discount on his/her pack + for every 10 gold packs purchased by the sponsored member, one gold pack is offered to the sponsor.

Whitelist members will have access to the sale of our packs 10 days before the rest of the community. At the end of these 10 days, purchase prices will revert to those of Public Sales.

### c) Public Sales

Public Sales will be divided into two stages. The first tier takes place before Reveal, followed by tier 2 after Reveal. The purchase of 10 Gold packs offers an eleventh Gold pack and a referral link. Sponsorship for public sales is 5% for the sponsor and a 10% discount for the sponsored member + for every 10 Gold packs purchased by the sponsored member, one Gold pack is offered to the sponsor.

**Here are the prices of the different packs during these phases:**

	Range 1	Range 2
<b>Gold Pack</b>	\$45	\$55
<b>Silver Pack</b>	\$39	\$49
<b>Bronze Pack</b>	\$29	\$39

The purchase of a Bronze or Silver pack is irrevocable, and it is not possible to upgrade a pack. For each Bronze or Silver pack purchase, we offer an individual artifact at the primary sale. The price of this artifact is \$20. Sir Oxo's Grace, meanwhile, is available for purchase exclusively for holders of an Oxo Warrior NFT without Sir Oxo's Grace, and costs \$15.

Our NFT sales strategy focuses on incremental growth, highlighting special offers throughout the sales period to encourage continued participation, reflecting our ambitious vision of an ever-expanding ecosystem.

---

## VI) Support

### 1) Oxelta account

Creating an **Oxelta** account is the first step to diving into our world, where the Polygon blockchain (Matic) is at the heart of the experience. We've designed this process to give you a smooth, immersive experience. Here's what you can expect when you create your **Oxelta** account:

**Blockchain and wallet link:** **Oxelta** is based on blockchain technology, which means that every Oxelta account is automatically linked to a wallet with Magic. This integration between your account and wallet ensures seamless management of your digital assets within the Oxelta ecosystem.

**Login benefits:** By logging into an **Oxelta** account, you open the doors to our project's primary and secondary markets. What's more, you gain access to exclusive benefits, whether you're part of the Whitelist or choose to take part in our private sale. We're committed to making the **Oxelta** experience accessible to all, which is why KYC/KYB verification is only mandatory for ICO and private sale participants. You also have the option of sharing an affiliate link, offering you and your referrals benefits credited directly to your account wallet.

**Easy asset management:** Your **Oxelta** account becomes the central point for managing your Oxo Warriors and OXLTs. All our games are accessible once you're logged in, and your rewards are automatically routed to your wallet address. What's more, you enjoy the freedom to transfer your OXLT tokens to other wallets, giving you total control over your assets. The amount of blocking plan you have planned will also be shown on your account, allowing you to manage this plan. What's more, you can manage your NFTs by offering them for sale directly on **Oxelta's** secondary market.

**Personalization with Titles:** At **Oxelta**, we place great importance on expressing your individuality, which is why we've introduced "Titles". These Titles, in the form of non-transferable NFTs, allow you to personalize your **Oxelta** account and make it truly unique. To earn these Titles, you'll need to complete specific challenges. For more details, please refer to the Title Appendix section. There are 16 of these Titles, and a special reward will be awarded to the first 10 to obtain them in full.

**Advanced Security:** We take your account security seriously. As such, we offer advanced security features, such as two-factor authentication (2FA), to protect access to your account from unauthorized use.

Creating your **Oxelta** account is simple, fast and secure. It opens the door to a constantly evolving world, where your experience is our priority. Stay tuned for the latest news, updates and exciting events in our ecosystem. Join us now for a unique adventure within the **Oxelta** community.

## 2) Marketplace

The integration of a Marketplace is an essential step in our **Oxelta** project. To do this, we'll be using the BLOOM product from SmartChain, our technical partner.

The Marketplace will be a blockchain-integrated platform, guaranteeing transparency, traceability, and authentic ownership of the digital assets exchanged. Initially, the Marketplace will be available exclusively for **Oxelta** products, and will then evolve to include Metaverse items and **Oxelta**-validated collections.

### Key features of our Marketplace will include:

- **Asset listing:** Each asset will have its own characteristics, which will be shown directly in its asset data. This allows users to filter the accuracy of their needs/wants.
- **Search and discovery:** Users will be able to browse and discover the assets available on the platform using advanced search filters, such as NFT category, price, rarity, families, etc.
- **Group sales of NFTs:** Users will be able to offer group sales of NFTs, bundling their digital assets into a single lot. This offers a unique opportunity for buyers to acquire multiple NFTs in a single transaction.
- **Secure purchases:** Our Marketplace will provide a secure payment system to facilitate transactions between buyers and sellers. Security measures will be put in place to protect users against fraud and scams.

- **Diverse payment options:** Our Marketplace will offer a variety of payment methods, allowing users to choose between FIAT and cryptocurrency payments. Users will be able to transact using credit cards, e-wallets, as well as different cryptocurrencies. This diversity of payment options will offer maximum flexibility and accessibility to users.
- **Comprehensive dashboards:** Our Marketplace will integrate comprehensive dashboards offering users detailed tracking of NFTs. They will be able to view NFT price variations according to selected filters, receive customized alerts and notifications on important price changes, compare prices of similar NFTs on the market, and group all their digital assets into a global portfolio for simplified management. These dashboards will provide users with the information they need to make informed decisions and optimize their experience on our marketplace.

We are committed to making our Marketplace a vibrant place where users can find, exchange and enjoy a wide variety of digital assets. The marketplace will be accessible via our Webapp on the **oxelta.io** website, and shortly on our mobile app.

### 3) Mobile Application

Our Mobile Application will be an essential complement to our Oxelta project, offering users a convenient and immersive experience. Here are the key features of our app:

- **Marketplace:** The Application will include our Marketplace, offering users a user-friendly interface to browse, buy and sell the NFTs offered by Oxelta. This Marketplace will be adapted to the App format, retaining the same functionality as our web version for an optimal user experience.
- **Asset management :** Users will be able to efficiently manage their NFTs by putting them up for sale, viewing their special features, organizing them, equipping them with artifacts, and managing their Oxo Warriors NFTs. This functionality guarantees an optimal experience for users, who will be able to fully appreciate the special features of their digital assets.
- **Sir Oxo Tournament tracking:** The App will enable users to follow the Sir Oxo Tournament in real time. They will be able to get updates on results, rankings, upcoming competitions and special events related to the Tournament. This feature offers users total immersion in the Sir Oxo Tournament.

- **Access to mobile P2E and tracking of rankings:** Our Application will offer easy access to mobile P2E offered by Oxelta. Users will be able to take part in interactive mobile games, complete missions, collect rewards and earn Tokens or other digital assets. In addition, the application will enable users to track their ranking in mobile P2E, viewing their progress, scores, achievements and comparing their performance with other players. This feature will give users a competitive dimension and motivate them to reach new goals.

This mobile Application will be available on all major mobile platforms, such as iOS and Android, to ensure maximum accessibility for our community.

We are committed to evolving our app to accompany the Metaverse, offering new features and an immersive experience for our users.

## VII) P2E Mobile

### 1) Flappy OXO

**Game description:** Flappy Oxo is a mobile arcade game in which players guide a Flappy Oxo, the Oxo Warrior's pet, through golden pipes, avoiding touching them. By tapping on the screen, players make the Flappy Oxo fly and must pass through the pipe openings to earn points. The game is based on simple, addictive mechanics, offering an engaging gaming experience.

### 2) Rocket OXO

**Game description:** Rocket OXO is an exciting 3D mobile game in which players guide Oxo Warriors equipped with an Oxo Rocket across a constantly moving map. They must tilt their mobile device or use a cursor to avoid obstacles and cover the greatest possible distance. The game offers an immersive experience with a rapidly unfolding environment, creating a sensation of speed and adrenalin. Players need to be fast and reactive to go as far as possible. The game's simple yet addictive mechanics test players' ability to adapt to a constantly accelerating universe.

**Oxo Warriors:** Players can own and use Oxo Warriors, NFTs available in different rarities (legendary, rare and common). Each Oxo Warrior rarity allows a certain number of games per day, which will be revealed for each game upon release. Players can buy, sell and trade these NFTs. Owning several Oxo Warriors NFTs means you can accumulate the number of games available per day, and increase your chances of reaching the top of the leaderboard.

**Utility:** For the two P2E mobile games we're offering, the OXLT Token will feature special functionalities. The first use of this Token will enable players to acquire additional games. The second feature offers players the chance to buy back a life in exchange for OXLT, and can be used once per game. The quantities of Tokens required for these features will be revealed at game launch, and will be adjusted weekly to reflect the OXLT market price.

**How it works Timing:** Each day starts at a predefined time. At this time, the number of games available for each Oxo Warrior NFT is updated. If a player starts a game before this time and finishes it afterwards, the number of games will be counted for the new day. The results of games played at the end of the week will be counted towards the new week, which will start at the set time. The reference clock will be communicated at the start of the games.

**Ranking and reward mechanism:** Each week, a ranking will be updated to reward the best scores in each game. The highest scores will be recorded and displayed in the application, enabling players to track their progress and participate in the weekly ranking. The number of winners and specific rewards will be announced when the games are launched.

---

## VIII) Sir Oxo's Tournament

The Sir Oxo Tournament is a competitive event we organize to reward our community. Lasting 60 days, it is a marketing initiative where a prize of \$1,000,000 is at stake for the winner, and we offer 2% of OXLT tokenomics (supply) to participants as a reward. At the same time, this tournament allows us to raise awareness of our universe and offer an enriching P2E experience. Community tournaments will be an integral part of our approach, with future developments in our Metaverse.

The Sir Oxo Tournament is subject to a condition precedent for its launch: **minimum sales of 131,072 Packs.**

This condition precedent exists to ensure that we don't promise a reward we can't deliver. Once this number of packs sold has been reached, we will be able to guarantee payment of the final prize and development of the project. **Oxelta** will communicate monthly on pack sales via social networks, and will let you know when the tournament starts.

As soon as you purchase an Oxo Warrior NFT, it is automatically entered in the tournament. Please note that it is your Oxo Warrior NFT that is registered, not your account. Therefore, when you sell your Oxo Warrior NFT, you also transfer its place in the tournament. There are two types of pools in the tournament: the "Heaven of the Ascendants" and the "Land of the Fallen".

Purchasing a pack during the tournament will be possible if we don't sell all the packs. However, packs purchased within 10 days of the tournament launch will be allocated to the "Land of the Fallen", which requires a Sir Oxo Grace.

As stated in the Sir Oxo Tournament section of tokenomics, tokens won in the tournament will be subject to a 6-month vesting period at the end of the tournament. Tokens will be associated with your Oxo Warrior NFT and will be sent to the address of your Oxo Warrior NFT.

The Sir Oxo Tournament is based entirely on Oxo Warriors NFTs and their power, which is directly linked to their rarity. It's important to note that Team **Oxelta's** Oxo Warriors are not eligible to take part in the Tournament.

In addition, Oxo Warriors NFTs can equip artifacts to increase their power, adding a strategic dimension to the Tournament. Here's the power table detailing the values of Oxo Warriors and artifacts.

Artifacts can be equipped at any time during the Tournament. However, it is essential to note that an artifact is associated with an Oxo Warrior NFT for the duration of a tournament phase. This means that an NFT Oxo Warrior can change artifact during a given phase, but the artifact removed cannot be used by another Oxo Warrior. In addition, for each duel, it is possible to use OXLTs to increase the power of one's NFT Oxo Warrior. The maximum increase in power allowed with OXLTs is 25 points.

	Legendary	Rare	Commun
Warriors	50/50	35/50	25/50
Artefacts	25/25	20/25	15/25

What's more, we've created an NFT, Sir Oxo's Grace, exclusively for this tournament. This NFT acts as a second chance during the tournament and will be burned at the end.

For the final of the Sir Oxo Tournament, Oxelta will organize a physical event broadcast live on social networks, allowing everyone to witness the final in real time. We'll be releasing more information about this in the future.

## 1) The Heaven of Ascendants:

At the start of the tournament, Oxo Warriors are randomly distributed throughout the Sky of Ascendants, an environment made up of 4 distinct phases. The first phase begins with 32,768 arenas, each accommodating a maximum of 32 players. To enter the next phase of the Sky of Ascendants, you must win your current arena, after which you will face other arena winners in the next phase.

Only Oxo Warriors NFTs who triumph in their respective arenas have the privilege of continuing their ascent in the Sky of Ascendants. However, if you lose a duel in the Sky of Ascendants, you have two options:

- If your warrior is not equipped with Sir Oxo's Grace, he is eliminated from the tournament.
- If, on the other hand, you are equipped with Sir Oxo's Grace, you are redirected to the "Land of the Fallen".

## 2) Land of the Fallen:

The Land of the Fallen is introduced during the second phase of Sir Oxo's Tournament and consists of 5 phases. Each of these phases is deployed following a phase of the Heaven of Ascendants, offering a chance for the vanquished to redeem themselves, with the exception of the final phase of the Land of the Fallen, known as the "Fallen Challenge".

Oxo Warriors equipped with Sir OXO's Grace and defeated in the Heaven of Ascendants are automatically assigned to the Land of the Fallen. However, it is important to note that an Oxo Warrior who is not equipped with Grace must acquire it before the start of the next phase, failing which he will be eliminated.

The Land of the Fallen follows a similar pattern to that of the Heaven of the Ascendants, with arenas and duels. It's essential to stress that defeat in this phase means permanent elimination from the competition for the Oxo Warrior concerned.

	The Heaven of Ascendants	Land of the Fallen
Phase 1	X	
Phase 2		X
Phase 3	X	
Phase 4		X
Phase 5	X	
Phase 6		X
Phase 7	X	
Phase 8		X
Phase 9	Challenge of the Fallen	
Phase 10	The Grand Final	

### 3) Arenas:

Whether in the Land of the Fallen or the Sky of the Ascending, players are always divided into arenas of up to 32 participants. To progress to the next stage, you must win a maximum of 5 Duels to conquer your Arena.

Conquering an arena sends you to the next phase. It's important to understand that an arena may not be complete. This will allow you to reduce the number of duels you have to win in order to move on to the next phase.

### 4) Duels :

Once players have been assigned to an Arena, you engage in Duels. These Duels are subject to a time limit, and each Oxo Warrior can only take part in one Duel per day. The power of each Oxo Warrior NFT, which is determined by its rarity, can be increased by adding an artifact. In addition, the power of your NFT Oxo Warrior can be increased by 25 points using OXLTs.

A random factor is then applied, based on the cumulative power of the two opponents, to determine the winner using an impartial algorithm. It's important to note that having less power than your opponent reduces your chances of victory, although this doesn't automatically lead to inevitable defeat.

*Example: Let's consider an Oxo Warrior with a base power of 50, equipped with an artifact of 15 extra power points, with a boost of 25 power points using OXLTs. He faces an Oxo Warrior with 25 power points. Total points reach 115, with 90 points for Player A and 25 points for Player B. The algorithm randomly selects one point from the 115 available, and the player to whom this point is awarded is designated the winner of the duel.*

## 5) The Fallen Challenge:

The Fallen Challenge is phase 9 of the tournament and takes place in the Land of the Fallen. At this stage, we already know the finalist from Ascendant Heaven, and the final phase 8 of Fallen Earth ends with 4 winners. These will face off in two Duels to determine the finalist for the Land of the Fallen.

## 6) Temporality and Tournament Phase:

Each soldier can only play one Duel per day. Since 5 battles must be won to conquer an Arena, a phase lasts 5 days. Between each phase, we give players 2 days' rest (except at the end of the first phase, when we give them 5 days' rest) so that they can define new strategies, trade or not their soldiers on our Secondary Market, and acquire Sir Oxo's Grace if they haven't already equipped it. The Sir Oxo Tournament will last 60 days.

## 7) Sir Oxo's Treasure:

The winner between the winner of Heaven of the Ascended and Earth of the Fallen faces off in a final duel. The winner takes the Sir Oxo tournament and its Treasure, worth \$1,000,000. Payment is made in stable USDC USDT coins of the player's choice, issued on the Polygon blockchain.

In addition to rewarding the tournament winner, we have allocated 2% of the OXLT Token for the Sir Oxo tournament.

	The Heaven of Ascendants	Land of the Fallen	Timing
Phase 1	X		5 days
Repos			5 days
Phase 2		X	5 days
Phase 3	X		5 days
Repos			5 days
Phase 4		X	5 days
Phase 5	X		5 days
Repos			5 days
Phase 6		X	5 days
Phase 7	X		5 days
Repos			5 days
Phase 8		X	5 days
Repos			5 days
Phase 9	Challenge of the Fallen		5 days
Repos			5 days
Phase 10	The Grand Final		

## XI) Roadmap

### 1) Roadmap Phase 1

We presented each of the elements making up our Phase 1. We have drawn up this one-year Roadmap to prepare the Metaverse. Our main objective is to establish a solid foundation for the project. In addition, additional elements may be added to the project, and we will communicate about these.

Q1 - 2024	Private Sales	
	Communication	Air Drop
Q2 - 2024	ICO	
	OXLT on DEX	
	Whitelist NFT	
	NFT Sales 1	
Q3 - 2024	Reveal NFT + Oxo Warrior secondary market	Mobile app
		Flappy OXO
Q4 - 2024	NFT Sales 2	Rocket OXO
		Sir OXO's Tournament
		OXELTA Event

### 2) Next

In 2024, we'll lay a solid foundation for our ecosystem by introducing our tokens, games, NFTs, and launching our very first community tournament. The following year, in 2025, we aim to enhance the user experience with the launch of three distinct mobile games. In addition, this year will see the unveiling of our long-awaited Metaverse, accompanied by innovative games, propelling Oxelta to new heights. These strategic milestones will mark our continued evolution, highlighting our commitment to innovation and creating an unforgettable experience for our community.

<b>2024</b>	The foundation of the ecosystem
<b>2025</b>	Mobile games
<b>2026</b>	Metaverse and its games

### 3) Financial Roadmap:

The aim of this section is to describe **Oxelta's** management of the main investments required to ensure the solid development of the project.

We have drawn up this Roadmap to ensure a logical and coherent progression for the company. Starting with the ICO, part of the funds will be allocated to structuring the company, recruiting and marketing the **Oxelta** project.

We're starting this project with a team, a promising idea and solid foundations. The private sale plays a key role in initiating work on the application, which represents a major challenge, while helping to raise the project's profile.

The ICO, on the other hand, is designed to finance the entirety of Phase 1, which forms the basis of the project prior to the launch of the Metaverse. It also provides a solid structure for the company.

Finally, the sale of NFTs is intended to finance the development of the Metaverse and its games, a colossal task requiring considerable resources.

**Oxelta** is taking a structured and logical approach to its evolution, using different stages to cover the specific needs of the project at each phase of its development.

<b>We have</b>	<ul style="list-style-type: none"> <li>• Private Sales</li> <li>• ICO</li> <li>• NFT OXO Warriors</li> <li>• Primary/Secondary market</li> </ul>
<b>Private Sale</b>	<ul style="list-style-type: none"> <li>• Communication</li> <li>• Application</li> </ul>
<b>ICO</b>	<ul style="list-style-type: none"> <li>• Liquidity OXLT</li> <li>• Launch app</li> <li>• P2E Mobile</li> <li>• Sir OXO's Tournament</li> <li>• Metaverse</li> </ul>
<b>NFT</b>	<ul style="list-style-type: none"> <li>• Metaverse &amp; Games</li> </ul>

## X) Team & Partners

**Oxelta** is built on a team and key partnerships. We have brought together trusted professionals and organizations around the same vision to achieve our ambitious goals.

### 1) Team

#### Thomas Galante - CEO

Thomas is the man behind **Oxelta**. He laid the foundations and the vision for the project, and is now in charge of the strategy and management of the resources that will be put in place to bring it to fruition.

#### Eugène Lacaton - COO

Eugène works closely with Thomas. In charge of organizing and coordinating the various stakeholders, he supports Thomas in implementing Oxelta's strategy.

#### Laiken - Artistic Director

Adrien is **Oxelta's** chief artist. He's in charge of imagining Oxelta's entire graphic universe. His talent brings the project to life graphically.

#### Léon - Graphic Designer

Léon is one of **Oxelta's** artists. With pop-culture as his reference, he is in charge of imagining all Oxelta assets. He is the creator of the Oxo Warrior, artifacts and packs, as well as the OXLT visuals.

#### Adrien Lemaire - Collab Manager

Adrien is in charge of giving visibility to the **Oxelta** project. This ranges from making calls about the project in dedicated spaces to forming partnerships with other Web 3 projects.

#### Ilan - Collab Manager

Ilan is in charge of finding the most relevant collaborations for the project. This ranges from finding direct collaborations with other projects. He also finds the best spokespeople and ambassadors for **Oxelta**.

#### Luidji - Community Manager

Luidji is in charge of bringing our community to life on X on a daily basis. He'll be in charge of federating, animating and responding to the community throughout the day (and night).

### Stephen - Manager Discord

Stephen is a Discord expert. His job is to make sure Discord runs smoothly, and to keep the community entertained on our server.

### NETCORD - Community management

Community management specialist Oxelta on Discord to energize and federate the community.

## 2) Key Partners

### SMART CHAIN - Technical developers

Smart chain is an IT development company. Specializing in the Polygon blockchain, Oxelta's outsourced CTOs are responsible for all technical aspects (smart contracts, marketplace, etc.).

### SMOOTHY LABS - Video game studio

Smoothy Labs is a video game studio specializing in the play-to-earn concept. They are currently Oxelta's partners, supporting us in the development of our first games, Flappy Oxo and Rocket Oxo.

### HARBOR 3 - Consulting marketing

Specialized in Web3 marketing, Harbor3 works with our team to implement an effective marketing strategy to make the project known to as many people as possible.

## 3) Partners

## 2) Player titles

Titles are non-transferable NFTs that remain visually hidden and are unlocked only when players complete the challenges associated with each title. They are awarded directly to players' **Oxelta** accounts. Titles serve to demonstrate players' commitment to the **Oxelta** project. Upon receipt of a title, we also offer downloadable Twitter and Discord banners to personalize your profiles. What's more, the first 10 players to get all the titles on their **Oxelta** account will win a special reward.

<b>The Fortune</b>	This title is offered to each person who participates in the ICO and the private sale.
<b>The Shepherd</b>	This title is offered to every person who has sponsored two people during the ICO.
<b>The Determined</b>	This title is offered to every person who participated in the AirDrop and won a Token reward.
<b>The savant</b>	This title is offered to every person who has won the White List title and who has taken advantage of it by buying a cheaper status.
<b>The GodFather</b>	This title is offered when your godchildren buy 50 statuses via our link.
<b>The Collector</b>	This title is offered to everyone who has 50 oxo Warriors in their account at the same time.
<b>The faceless</b>	This title is offered to everyone who has an Oxo Warrior from each family in their account at the same time.

<b>The Valiant</b>	This title is offered to every person who has completed 1000 games of Flappy Oxo
<b>The trainer</b>	This title is offered to every person who finishes in the Top 10 in the weekly competitions.
<b>The Traveler</b>	This title is offered to anyone who has played 1,000 games of Rocket Oxo.
<b>The Explorer</b>	This title is offered to everyone who finishes in the Top 10 in weekly competitions.
<b>The Banker</b>	This title is offered to anyone who has kept 10,000,000 OXLT in their Oxelta account for 30 days.
<b>The duelist</b>	Win 20 duels in the Sir OXO Tournament
<b>The legend</b>	Have an Oxo Warrior in the Sir Oxo Tournament in phase 7 and 8.
<b>The merchant</b>	This title is offered to every person who has bought 100 Oxo Warriors in the market and sold 100 Oxo Warriors in the market.
<b>The Winner</b>	Wins 50 auctions for an Oxo Warrior

### 3) Legal note: Private Sale and ICO

#### 1. Applicable Jurisdiction Clause

##### Applicable Jurisdiction and Venue Clause

This White Paper is governed by French law and, in the event of any dispute arising out of or in connection with the terms of this document or the ICO, the parties will endeavor to reach an amicable resolution. Failing amicable resolution, and unless otherwise provided by mandatory provisions of European Union law or French law, in particular as regards consumer protection, the courts of Lyon, France, will have jurisdiction to deal with such disputes.

For participants qualified as consumers, in accordance with the provisions of Regulation (EU) No. 1215/2012, also known as the Brussels I bis Regulation, it is recognized that jurisdiction clauses may not restrict the rights they hold to bring an action before the courts of their place of habitual residence.

This clause aims to clarify the management of disputes while fully respecting consumers' rights as established by applicable laws and regulations.

#### 2. Warning of the risks associated with the unregulated nature of ICOs

We invite you to take part in a private sale and then in our ICO to develop a new Play to Earn game, with a view to its future integration in a Metaverse environment that will be enriching for our users. This project aims to combine entertainment and economic opportunities within an innovative digital ecosystem.

Although our offer is legally and diligently structured, it is important to note that we have not sought optional AMF approval. That said, we rigorously adhere to all customary standards and legal requirements, including the implementation of a reliable KYC (Know Your Customer) process.

We are committed to providing you with transparent and accurate information to enable you to make an informed decision. However, it is essential to bear in mind that an ICO involves risks and does not guarantee the success of the project. We advise investing only funds whose potential loss would not affect your overall financial stability, both in and out of the game."

#### 3. ESG commitments

##### Commitment to Sustainability and ESG Criteria

We recognize the importance of environmental, social and governance (ESG) criteria and are committed to integrating these fundamental principles into the development and operation of our Play to Earn game. We will strive to follow best practice in sustainability and social responsibility, and are committed to communicating openly about our actions and progress in these areas via our website and other communication channels.

We are also aware of the environmental impact of blockchain technology and have selected the Polygon blockchain for its more energy-efficient Proof of Stake (PoS) consensus process compared with traditional Proof of Work (PoW) consensus models.

This decision reflects our commitment to reducing our project's carbon footprint and our dedication to contributing to a more sustainable digital gaming industry.

Our team is committed to developing a detailed ESG framework and setting clear targets to align with our community's expectations and international sustainability standards.

OXELTA
