

PX Series Advanced POS Terminals

Cost-effective with the compact, sleek and familiar look and feel of a tablet with 10" or 15" glass touch screen

For a lot of leading-edge food service or retail concepts, there's just no need for larger, more rugged, higher-powered terminals. Also, many existing chains are beginning to recognize a need to deploy additional terminals at some of their sites and are looking for flexibility and a compact design.

For those and other similar situations, the NCR VOYIX PX Series Advanced POS Terminal is a perfect fit. Purpose-built to handle today's most innovative POS solutions, the PX Series combines the stability and uncompromising quality of a fixed terminal with the compact, sleek and familiar look and feel of a tablet.

Versatility in a Compact Machine

The PX Series runs either Windows 10 or Android in a sleek chassis that anchors either a 10" or a 15" LED backlit LCD glass screen to deliver full HD and projected capacitive touch technology. Internally, solid-state components enable a fanless design so there are no moving parts to break. You can also mount an equally impressive 7" display on the back so your customers can visually keep track of their order as it's entered, ensuring a high level of order accuracy.

Every business is different, which is why we built the PX Series to be one of the most versatile form factors on the market. Choose the amount of RAM and SSD space that suits your specific needs. You decide whether or not to include options like a mag stripe reader, scanner, wi-fi capability, biometrics, or battery backup.
