Singulation
Intelligent Parcel Induction

Dexterity's Singulation solution streamlines workflows by autonomously picking and inducting parcels into crossbelt or tilt tray-style sorters. The solution supports all parcel types (poly bags, flats and boxes) in any working environment, and can be installed in one day. It is production-hardened and trusted by the largest parcel carriers in the world.

Production Hardened
Millions of production picks at two of the world's largest parcel carriers with plans for further expansion.

Retrofit Ready
Compact footprint integrates into existing infrastructure with minimal hardware or workflow modifications.

Performance Transparency
6-sided barcode scanning and photo logging provides precise audit history for all packages processed.

Top-tier Support
24/7 support, guaranteeing operational continuity for your business.

Key Performance Metrics

2,000+
picks per hour

8 lb (3.6 kg)
max package weight

> 100,000
package & parcel types supported
