

PURPOSE

Gives the ability to pump any type of fluid desired, typically used to pump oil into wellbore directly below the stuffing box to lubricate the seals within.

ASSEMBLY PARTS

1. Fluid Chamber Body
2. Gland
3. Hand Nut
4. Bottom Union

DESCRIPTION

The Fluid Chamber incorporates a ported gland internally and a reservoir that lubricant, methanol, or any desired fluid may be pumped into to reduce icing, or line chatter, the liquid is installed via a .5" NPT port, which is connected to a hose and pump.

PRECAUTIONS

Ensure threads are not worn or damaged, it is recommended that a check valve be installed in any hose or line that may contain wellbore pressure.

Nominal Size		3.00"
Assembly Number		1301FC300A0
Item	Part Name	
1	Fluid Chamber Body	1301FC30001
2	Gland	1301FC30002
3	Hand Nut	1306HUN30001
4	Bottom Union	1306HUM30001
Upper Thread Connection		3.75" - 4 Acme
Lower Thread Connection		3.75" - 4 Acme
