

Developed from the Potter planter, Slim stands out for its elegance and versatility. This two-level steel planter features two containers; one at the top and the other at the base. Both planting containers are equipped with a water reservoir, and excess water from the upper container is drained into the lower one, ensuring optimal conditions for the plants. The light-weight and light-permeable structure features an engraved graphic pattern, available in several creative designs. Thanks to its modular design, Slim lets you create complete perimeter arrangements, adding a touch of elegance and style to your outdoor space.

IT Nata dall'evoluzione della fioriera Potter, Slim si distingue per la sua eleganza e versatilità. Questa fioriera separata a due livelli, realizzata in acciaio, è composta da due vasche, una in cima e l'altra nella parte inferiore. Entrambe le vasche di coltivazione sono dotate di riserva idrica e l'eccesso d'acqua della vasca superiore viene scaricato in quella inferiore, garantendo una cura ottimale per le piante. La struttura leggera e permeabile alla luce presenta un pattern grafico intagliato, disponibile in diverse varianti creative. Grazie alla sua modularità, Slim consente la creazione di composizioni perimetrali complete, aggiungendo un tocco di eleganza e stile allo spazio outdoor.

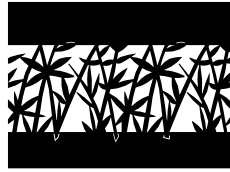

DE Der aus der Entwicklung des Pflanzgefäßes Potter hervorgegangene Slim zeichnet sich durch seine Eleganz und Vielseitigkeit aus. Dieser zwei-stöckige Pflanzkasten aus Stahl besteht aus zwei Wannen, eine oben und die andere unten. Beide Pflanzwannen sind mit einem Wasserspeicher ausgestattet. Das überschüssige Wasser aus der oberen Wanne wird in die untere abgelassen, was eine optimale Pflanzenpflege gewährleistet. Die leichte und lichtdurchlässige Struktur mit graphischem Schnitzmuster, ist in verschiedenen kreativen Varianten erhältlich. Dank seiner Modularität können mit Slim umfassende Begrenzungen umgesetzt werden, die dem Außenbereich einen Hauch von Eleganz und Stil verleihen.

FR Née de l'évolution de la jardinière Potter, Slim se distingue par son élégance et sa polyvalence. Cette jardinière-cloison à deux niveaux, réalisée en acier, est composée de deux cuves, l'une en haut et l'autre en bas. Les deux cuves de culture sont équipées d'une réserve d'eau et l'excès d'eau de la cuve supérieure est déchargé dans la cuve inférieure, garantissant des soins optimaux pour les plantes. La structure légère et perméable à la lumière présente un motif graphique sculpté, disponible en plusieurs variantes créatives. Grâce à sa modularité, Slim permet la création de compositions périmétriques complètes, ajoutant une touche d'élégance et de style à l'espace extérieur.

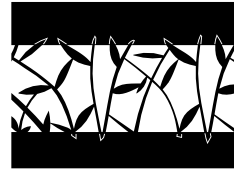

ES Nacida como evolución de la jardinera Potter, Slim destaca por su elegancia y versatilidad. Esta jardinera-separadora de dos niveles, fabricada en acero, consta de dos cubetas, una en la parte superior y otra en la inferior. Ambas cubetas de cultivo están equipadas con reserva de agua y el exceso de agua de la cubeta superior se descarga en el inferior, lo que garantiza un cuidado óptimo de las plantas. La estructura ligera y permeable a la luz presenta un patrón gráfico tallado, disponible en distintas variaciones llenas de creatividad. Gracias a su modularidad, Slim permite crear composiciones perimetrales completas, lo que añade un toque de elegancia y estilo al espacio exterior.
