Going the Distance: Increasing College Success Among Nontraditional Students of Color

HELP

Dr. Rosslyn R. Knight

Ms. Linda Bridwell

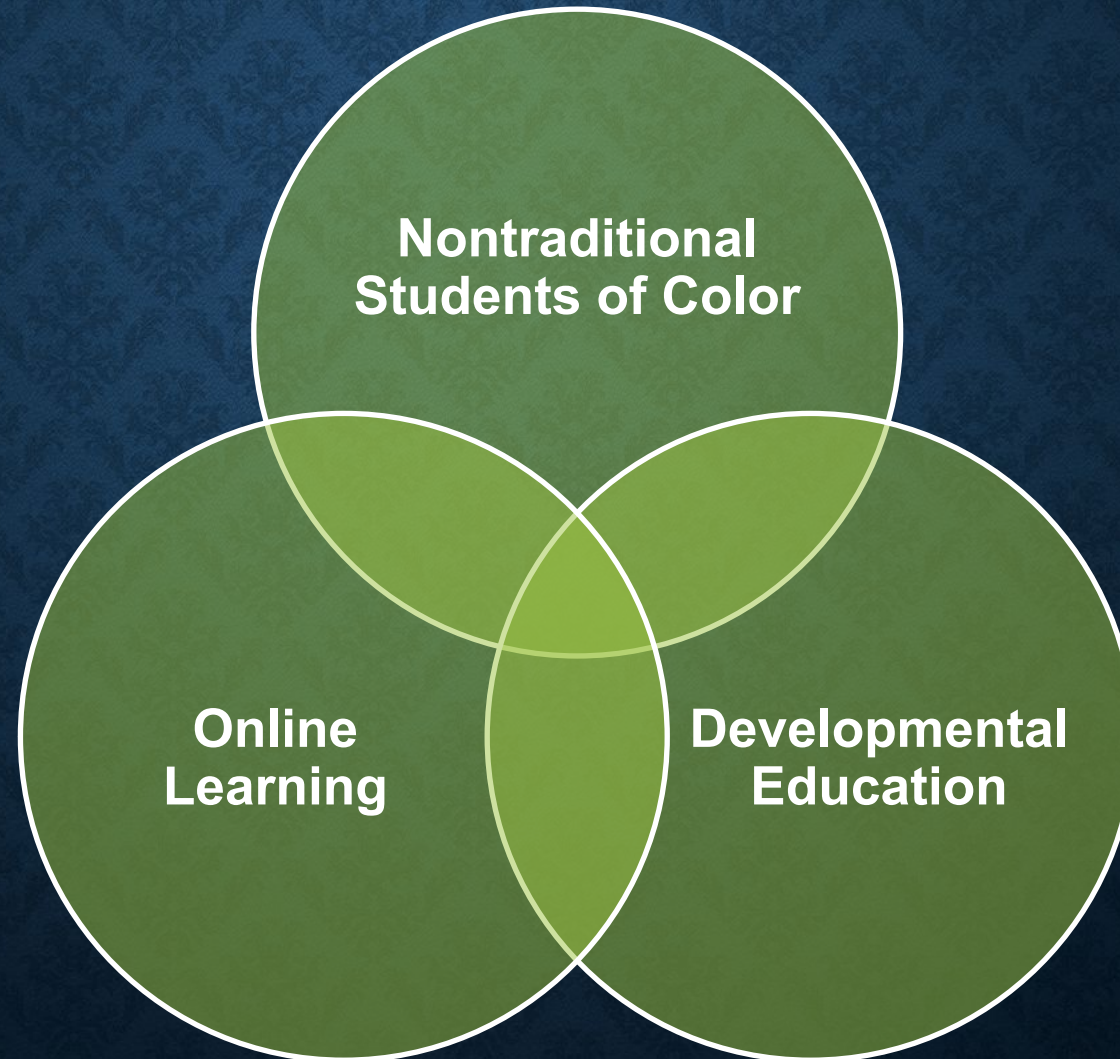

NROC Webinar

October 7, 2021

WHAT IS **YOUR** ROLE AT YOUR INSTITUTION?

Introduction

Background

- Nontraditional students are largest number of students placed into developmental education (MacDonald, 2018).
- Online education not viewed as best option for students, especially those in developmental education courses (Bawa, 2016, Xu & Jaggars, 2011).
- Students of color, a large portion of the nontraditional student population, are not addressed specifically in the literature (Flowers, et. al., 2014).

WHAT IS A CHARACTERISTIC OF A
NONTRADITIONAL STUDENT?

Research Questions

What are the instructional needs of nontraditional students of color enrolled in online developmental education courses?

How does online developmental education address the affective needs of nontraditional students of color?

How do essential components of online developmental education courses contribute to success in credit bearing courses for nontraditional students of color?

Conceptual Frameworks

Adult Learning Theory

- Adults like to direct their own learning.
- Adults have previous experiences to relate to new learning.
- Adults need relevancy.
- Adults are problem-focused.
- Adults are intrinsically motivated to learn.

Equity Mindedness

- Race Conscious
- Institutionally Focused
- Evidence Based
- Systemically Aware
- Action Oriented (Equity Advancing)

**WHICH PRINCIPLE OF EQUITYMINDEDNESS
RESONATES WITH YOU?**

Research Methods

Student Interviews

Faculty Focus Group

Document Analysis

FINDINGS

Importance of Support Systems

“I guess they gave you their opinion about what classes they thought I should do first in regards to maybe the level of how advanced certain classes were. So maybe I should start at this class first and then do that class. Also, even in just my everyday life, like things I was going through, I was talking about with my advisor and he gave his advice.”

Preparation for the Online Environment

“I knew I needed to pick and set aside time for the class away from work and away from kids.”

Understanding Nontraditional Students

“Oh, I will be late for this week, for two or three days,” and then they will say, ‘Okay,’ then they’ll move the due date to a certain time.”

Colorblindness in the Online Environment

“I would say they keep in mind the diversity of all the students and to take into account all the different backgrounds they come from, whether it's social or economical or financial, whatever. Just take into account that there's a lot of different students here who come from different countries, ages. Maybe they're single parents.”

“Your Student is a Human Being”

“I would say don't forget that your student is a human being, a person, and the personal message that they do. They always do a personal message, keep doing it because it makes your student feel like, “Oh, I can connect with them on a personal level as well.””

“I am confident now”

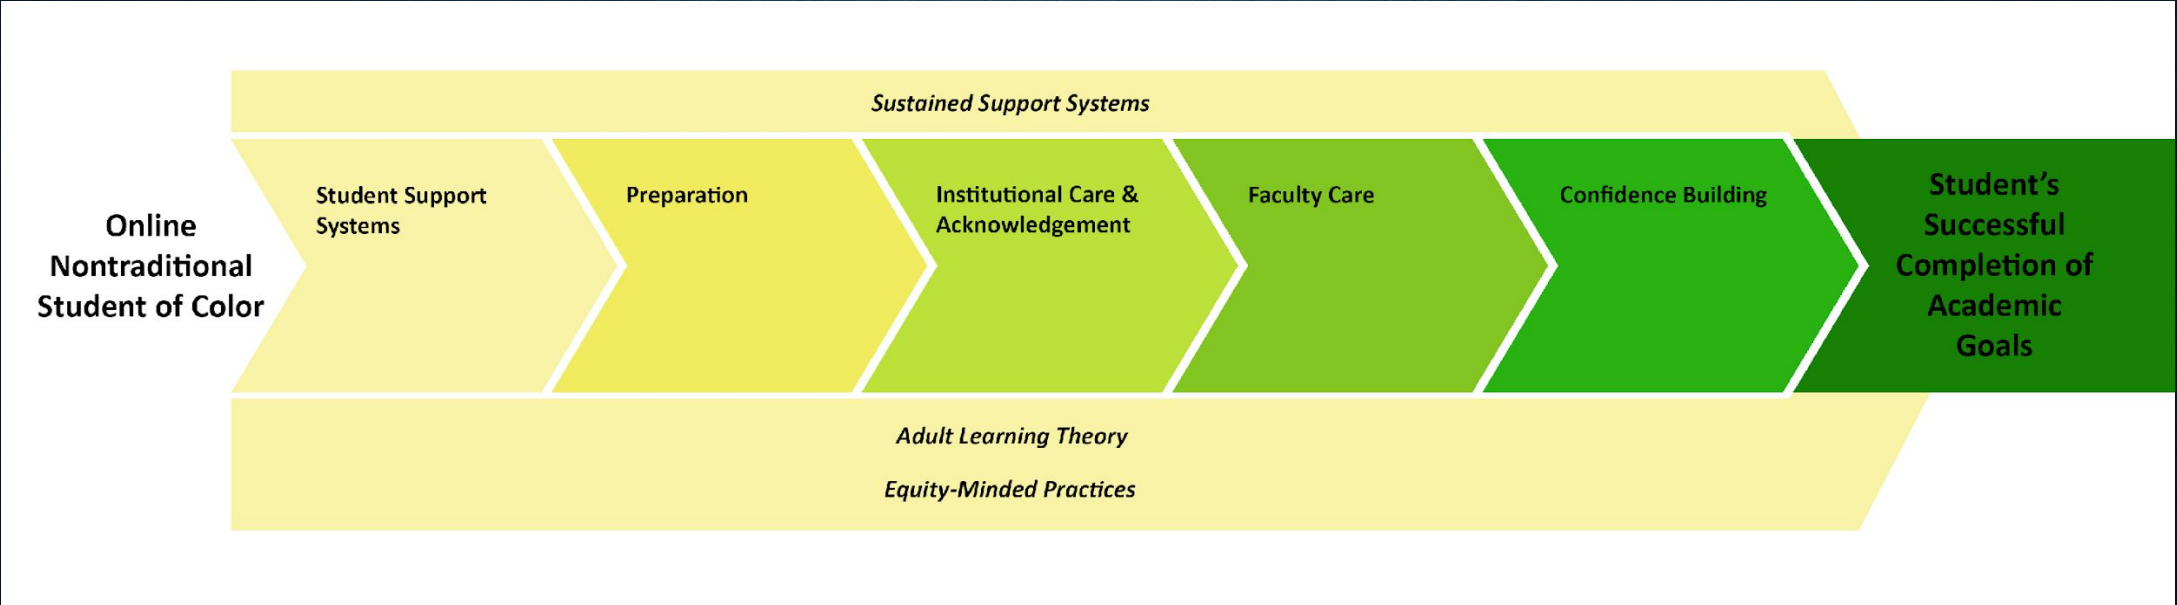

“I think those courses really helped me a lot to achieve my goal because actually... because I know I have to do everything possible in order for me to achieve my goal, but in order to do it, you have to learn. Learning English and math will give you the confidence. I am confident now.”
