## Every Learner Everywhere advocates for equitable outcomes in U.S. higher education through advances in digital learning.

Our mission is to help institutions use new technology to innovate teaching and learning, with the ultimate goal of improving student outcomes for Black, Latinx, and Indigenous students, poverty-affected students, and first-generation students.

Every Learner Everywhere is a network of twelve partner organizations with expertise in evaluating, implementing, scaling, and measuring the efficacy of education technologies, curriculum and course design strategies, teaching practices, and support services that personalize instruction for students in blended and online learning environments.

Our collaborative work to advance equity in higher education centers on the transformation of postsecondary teaching and learning. We build capacity in colleges and universities to improve student outcomes with digital learning through direct technical assistance, timely resources and toolkits, and ongoing analysis of institution practices and market trends.

## SOLVE by Every Learner is the home of our complete library of innovative teaching and learning resources

On this page we highlight our Pillar Resources, guides, and other materials developed by Every Learner Everywhere network partners. Our Pillar Resources are the culmination of extensive research on digital learning and improving outcomes for racialized, first-generation, and students burdened by systemic wealth inequality. Please check this page regularly, as our network is continually incubating and developing new resources designed to advance equity and student success in higher education.

Visit our Solve website to browse a complete collection of additional resources developed by Every Learner Everywhere that cover a range of topics within digital learning, e.g. equity, remote instruction, and digital learning implementation. All resources are created or vetted by network partners and designed to help improve student experiences and outcomes in gateway courses, whether delivered in-person, online, or a hybrid of the two.
