Spacelift Integration

Accelerate time-to-value of your Spacelift investments with real-time visualizing and alerting on the status of your Spacelift Stack Runs, Workerpools, Policy Checks, and Licensing

spacelift Integration
by rapdev

Stack locking and blocking	Stack Run statuses	Workerpool statuses	Licensing consumption

With RapDev's out-of-the-box Spacelift integration, actively monitor your CI/CD platform in minutes, not weeks.

Speed up deployments	Detect when failures happen in real-time, proactively prevent downtime Visualize important metrics on the status of Stack Runs
Identify Policy Check outcomes	Quickly determine Policy Check outcomes Confirm if Stack Runs fail your enforced policy checks
Analyze queued Workerpool runs	View pending and queued Workerpool runs in real-time Know in advance if workers are backed up so you can deploy more
Avoid surprising licensing costs	Evaluate consumption and utilization with live monitoring and alerting on billing data and gain the best value from the platform
