**SO
CLEAN™**

PERMANENT ANTI-BACTERIAL

Antibacterial and virucidal film for touch screen technologies

Antibacterial and virucidal film SoClean™ patented and developped for touch screen technologies

Thin, clear and transparent, this film and its adhesive are specifically
suitable for the reactivity and fluidity of touch screens

Protects all your **touch equipments**

especially :

Retail

Movies & museums

Airports & stations

Self-services & kiosks

**Gas stations
& concessions**

Hotels & restaurants

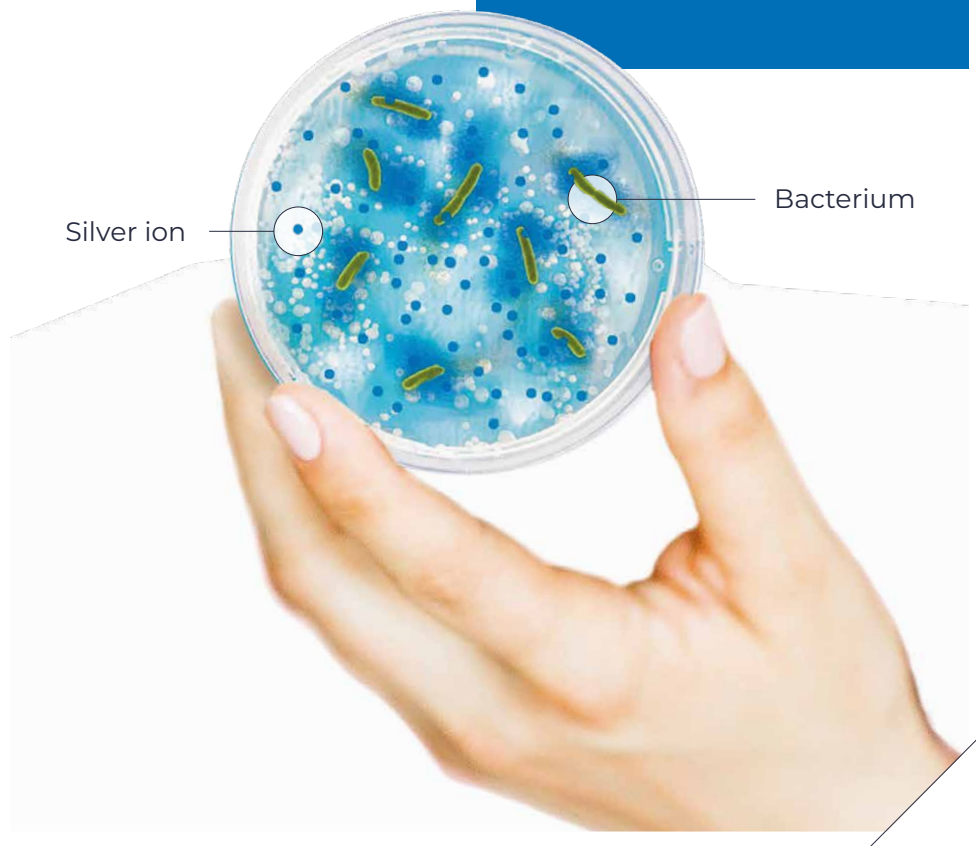

The danger of infectious agents

Bacterial micro-organisms form in the space of a few hours, requiring frequent cleaning.

Bacteria multiply and grow quickly

The SoClean™ treatment is composed of silver ions acting as a barrier to bacteria. When the ions come into contact with bacteria, they prevent them from growing and multiplying, leading to their total destruction.

Active silver ions are added to the SoClean™ treatment during manufacturing.

The antimicrobial effectiveness of silver ions ✨
