

CLOUD SOLUTIONS

Cloud Application Development from Concept to Production

Why Cloud Solutions

Octavian Technology Group is helping more and more organizations successfully shift into the cloud with the increased confidence of leveraging its full capabilities.

Octavian will help you create a Cloud First Application Architecture with secure, scalable, reliable, and accessible cloud technology.

Reliability

Create a custom system architecture to remain consistently accessible and fully operational

Maintainability

Designed for ease of iteration and updates to take your product into the future

Scalability

Effortlessly scale the system to meet customer demand

Security

Systems are continuously updated and monitored minimizing future risk

Impact Your Bottom Line and Competitive Advantage

Access data anytime, anywhere and reduce maintenance costs

You can access data anytime, anywhere and reduce maintenance by offloading hardware and software upkeep to the cloud provider. You'll save time and money, and you'll rest easy knowing your system is safe, accessible, and fully operational.

Save time and money using prebuilt cloud services

We'll give you a clear picture of costs, timeframes, and expected results before we begin—eliminating the headaches and frustration that can come from cloud migration.

Store information in a secure environment

Cloud technology provides your business with an intelligent, responsible, secure infrastructure. Unlike data storage of the past, cloud technology allows for superior scalability, accountability, and reliability. With today's increasingly mobile workplace, cloud services are the standard across all markets.

Octavian Cloud Services

Octavian's Cloud Technology Services Team collaborates closely with our clients to discover their most prevalent technology needs. Whether you are looking for an initial cloud technology assessment, ready for a full-fledged cloud migration, or require an architect to develop/reshape a cloud-based system, partnering with Octavian ensures a successful outcome.

Architect application as cloud native. Refactor existing architectures to leverage cloud services

Implementation collaborating with your team to execute on a cloud vision, or have Octavian completely drive the execution

Employing modern DevOps practice to productionalize your cloud applications for stability, scalability, and reliability

Focus on solving problems unique to your business domain instead for running data centers

What Can We Help You Do in The Cloud?

Cloud Assessment

We will help you plan how to modernize and help your team understand the steps they need to take to move towards being cloud native.

Cloud Migration

Following the roadmap from your assessment, we'll analyze your data and applications for a customized cloud deployment. We'll help you transition from traditional data centers to The Cloud.

Cloud Storage Optimization

We'll help you ensure that your cloud functionality is fully optimized and easy to navigate.

Cloud Architecture

Octavian will help you architect your current system to be cloud native or build a greenfield application to be cloud native.

Find Out How Cloud Solutions Can Improve Your Business

At Octavian Technology Group, we're uniquely qualified in Cloud Solutions to help you determine improve processes to get optimal results. Because we work with your team and design solutions for real world use, we avoid the typical roadblocks faced by other technology groups. At Octavian, we provide full top-to-bottom technology solutions based on your goals and needs.

As technology continues to evolve in this exciting field, let's explore how you can apply a Cloud First Application Architecture with secure, scalable, reliable, and accessible cloud technology. Reach out today and explore the future of your business!
