	regarding the Services		
--	------------------------	--	--

* To increase the stability and security of our infrastructure, we use certain services of companies (and respectively its parent company) that are either located in the USA, or who have engaged subprocessors who are located in the USA. This may result in the transfer of personal data to the USA. Such transfers are based on the adequacy decision of the European Commission (Art. 45 (1) GDPR) as the service provider is registered under the EU-US Data Privacy Framework (DPF).

Even in the event that changes are made to this decision or the decision will be revoked, the transfer is secured and legitimated by contractual, technical and organizational measures according to Art. 44 et seqq. GDPR. Prior to the adequacy decision of July 10th 2023 establishing the EU-US Data Privacy Framework (DPF), No Isolation entered into signed contracts with every sub-processor according to current EU standards (EU SCC). All sub-processors have, regardless of the DPF and the SCCs, defined additional guarantees to minimize the impact of possible data transfer to US authorities, such as the utilization of the legal process in the case of inquiries. Other examples of measures and safeguards may be encryption and/or pseudonymisation of the personal data.

Transfers to third countries outside the USA will otherwise be relevant in cases where the data processor in question uses data processors who process, transfer or store personal data in third countries. The legal basis for such transfers would be the EU Commission's Standard Privacy Agreements (SCCs), or an EU Adequacy Decision when applicable. Both No Isolation, our data processors and their data processors in turn are bound by these clauses. In cases where our data processors transfer or store personal data in third countries that are not considered to provide an adequate level of protection, the standard agreements are supplemented by additional measures and guarantees that are intended to minimize the risk of a breach of your privacy.
