

Neutrals

You can't go wrong with shades of brown, beige, grey, black, white, and muted colours. They're flattering and show up the best in photos, without reflecting on your skin tone.

Classic & Comfortable

Wear what you feel the most confident and yourself in. Selecting simple, classic pieces will help your style remain timeless as you look back on your photos over the years.

Simple Patterns

Keep patterns minimal and subdued. Loud patterns are fun, but can distract from the rest of the photo. In sessions with more than one person, avoid wearing patterns that will clash.

Seasonally Practical

For Winter shoots make sure to wear something warm and bring a jacket for in between shots. For Summer look for something light and breathable. If the weather is stormy we can always reschedule.

Flowing Clothing

Clothing that shows movement will bring your photos to life. Let your hair down to blow in the breeze. Fitted clothing is also fine as long as you can sit comfortably and move around naturally.
