

Akamai Identity Cloud

# MIGRATION ACCELERATOR

# QUICK OVERVIEW

**No one knows Akamai  
Identity Cloud better  
than Next Reason.**

Our Migration Accelerator Service provides comprehensive strategy, execution, and support to ensure seamless migration of applications, systems, and consumers. Our team, adept in enterprise service operations and SOC 2 Type 2 compliant, works in multiple time-zones across the globe to give the most comprehensive support to teams at all technical levels.

# OUR PROCESS

## **Comprehensive Strategy and Planning**

Our seasoned experts work closely with your team to craft a tailored migration strategy that aligns with your business goals, technical requirements, and user expectations.

## **Meticulous Execution**

Whether you are moving applications, reconfiguring systems, or migrating consumer data, our experts execute the migration with precision.

## **Compliance and Security Assurance**

Our team operates in full compliance with SOC 2 Type 2 standards, adhering to stringent security protocols and ensuring the confidentiality, integrity, and availability of your data.

## **Ongoing Support and Optimization**

The Migration Accelerator service includes ongoing support to address any post-migration issues, fine-tune configurations, and optimizations.

# SOME THINGS TO KNOW

## **| Global Support Across Multiple Timezones**

Recognizing the global nature of modern enterprises, our Migration Accelerator service offers support across multiple time zones. Our dedicated team, well-versed in enterprise service operations, is strategically positioned across the globe to provide comprehensive assistance. This ensures that teams at all technical levels, regardless of their geographical location, receive prompt and effective support throughout the migration process.

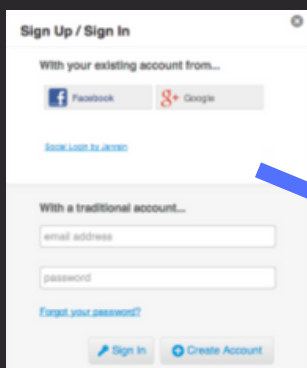

## **| Seamless Migration Pieces**

The Migration Accelerator service is an unparalleled solution tailored for organizations seeking a smooth and efficient transition within the Akamai Identity Cloud ecosystem. With Next Reason's deep expertise and unrivaled knowledge of Akamai Identity Cloud, the Migration Accelerator service goes beyond conventional migration offerings. This comprehensive service encompasses a strategic approach, meticulous execution, and unwavering support to guarantee the seamless migration of applications, systems, and, most importantly, consumers.

# MIGRATION PATHS

## | Javascript Widget or API

Next Reason's team has been architecting solutions for years using both the JS Widget and the direct Akamai (Janrain) API. We've not only built a comprehensive alternative, but understand the best-practices regarding user experience, security, and performance. We have a direct migration path from these solutions documented as part of the accelerated.

# MIGRATION PATHS

## | Hosted Login

Next Reason experts have crafted a migration path from the AIC Hosted Login solution to a CIAM solution of your choosing via OpenID Connect (OIDC). Our team has not only directly contributed to the OIDC spec, but we have built enterprise solutions on top of the protocol.

The best thing about moving from the Hosted Login solution is that there is no migration required. Apps can continue to use the integration method they use today and simply switch some basic components of URLs and credentials in order to redirect the user to Next Identity Hosted Journeys.
