- Real experience
- Relevant skills
- Industry network
- Employer reference
- Job interview

## HEAR FROM OUR CANDIDATES AND INDUSTRY PARTNERS

Dacreed has hired two candidates from Mission Ready, both of whom retrained from completely different careers including one of them who is a musician.

I've been very, very impressed with your process and programme throughout. I've also been recommending Mission Ready to other people wanting to retrain in Tech as well as potential employers to partner with you. It's win, win, win for everyone involved in your great programme.

**DAVID SHERWIN**  
CTO, DACREED

My new job is amazing... I was one of the top 3 candidates for a few companies - the only difference being that the other candidates had more experience. These companies... wanted me to stay connected for freelancing projects as they would like to work with me once I have gained more experience. These are all aspects I have achieved and learned through the experience I had with Mission Ready.

**KATHRYN**  
UX/UI DESIGNER, RAULAND AUSTRALIA & NEW ZEALAND

8 months after writing my first line of code with Mission Ready I was hired as a graduate software developer. Mission Ready provides the stepping stones to success, and is a breeding ground for industry expertise. If you're willing to put in the effort and push as hard as you can, Mission Ready will set you up for success.

**NICK VEALE**  
FULL STACK DEVELOPER, DACREED
