## Corporate Profile

Sentry IT is a certified minority business enterprise (MBE) specializing in IT services and management consulting. We are composed of certified IT and management practitioners specializing in architecture, engineering, implementation, integration and support services across many IT and Management disciplines, with a focus on cloud computing services, cyber and information security, infrastructure management and operations, systems and application development and management consulting services. Our passion is working with our clients to solve complex business and technical challenges by providing innovative and practical solutions that can effectively increase productivity efficiency, decrease delivery costs, and ultimately help our clients be successful.

With over 20 years of experience, our consultants and experts provide solutions in digital, technology, consulting, and IT infrastructure. We partner with some of the world's most innovative technology vendors to give you the best possible solution for your organization. We are committed to helping execute business strategies that decrease complexity and increase return on investments. We provide technology infrastructure, business solutions and support to state government and private organizations nationwide.

**BIG ENOUGH TO DELIVER AND SMALL ENOUGH TO CARE**
