## **2019 COMMUNITY HEALTH NEEDS ASSESSMENT - FOCUS GROUP RESULTS**

---

### **INTRODUCTION**

In 2019, the Division of Healthy Living and Outreach (DHLO), on behalf of the Fort Defiance Indian Hospital Board, Inc. (FDIHB, Inc.) - Tsehootsooi Medical Center (TMC), conducted seven focus groups in communities throughout the FDIHB, Inc. Service Delivery Area to identify and prioritize community health needs.

---

---

## **BACKGROUND**

In accordance with the Affordable Care Act requirements, the Fort Defiance Indian Hospital Board, Inc. (FDIHB, Inc.) – Division of Healthy Living and Outreach (DHLO) presents the 2019 Community Health Needs Assessment (CHNA) Qualitative Report on behalf of the Tsehootsooi Medical Center (TMC) Health facility. The Qualitative report covers the qualitative methodology used to identify and prioritize community health needs in the FDIHB, Inc. Service Delivery Area (FDIHB, Inc. SDA). Focus groups utilizing the nominal group technique was the primary approach used to qualitatively identify and prioritize community health needs for each of the communities visited. Then, the results were aggregated to develop a list of prioritized needs for the entire service delivery area. The report begins describing the full qualitative approach and describes the focus group process. Lastly, the report ends with the prioritized list of needs with a short description.

## **QUALITATIVE METHODOLOGY**

Focus groups were held in seven different locations in the Fort Defiance Service Delivery Area, including the communities where FDIHB, Inc. facilities are located, Fort Defiance, AZ and Sanders, AZ. The focus group participants ranged from 5 participants to as many as 18 and were conducted using the nominal group technique, allowing for participants to brainstorm all their perceived needs. Then, the participants prioritize the needs through a voting process.

In addition to identifying and prioritizing community needs, participants also were given a chance to identify community strengths and assets. Strengths and assets are important as they can be used as leverage to improve the community's health. Further, the participants were able to identify existing resources in their community that FDIHB, Inc. - TMC can use as partners to meet the needs.

---

## Focus Groups

Focus groups were held in the following communities: Crystal, NM, Navajo, NM (Red Lake Chapter #18), Fort Defiance, Arizona, St. Michaels, AZ, Klagetoh, AZ, Sanders, AZ, and Ganado, AZ. Several community stakeholders were invited to each of the focus groups, including Navajo Housing Authority Housing Specialists, School Liaisons, Community Leaders, Chapter Officials, Navajo Nation Council Delegates, Community Members, Business Leaders, Care Providers, Hospital Patient Advocates, Public Safety Officials and members of other Community-Based Organizations. A wide range of opinions and insights were gained from the seven focus groups.

---

## RESULTS

### Focus Group Results

After transcribing and coding themes for each of the focus groups, the results were combined for an overall prioritization of needs. The results are below:

#### Prioritized Needs:

1. Behavioral Health Services (Parenting, counseling, substance abuse, etc.) <-> Unintentional Injuries (violence, vehicle accidents, falls, etc.)
2. Access to health services (Dental, Behavioral Health, Primary Care) <-> Transportation improvement (access to reliable transportation, knowledge to apply for resources, etc.)
3. Targeted health promotion disease prevention activities (youth, elders, parents, caregivers, etc.)
4. Prevention, diagnosis, and treatment of diabetes, heart disease, obesity, and other related diseases <-> Safe places to exercise and access to healthy foods.

---

***Behavioral Health Services (Parenting, counseling, substance abuse, etc.)*** <->

***Unintentional Injuries (violence, vehicle accidents, falls, etc.)*** were identified as the top need. Many identified that behavioral health issues such as substance abuse, primarily alcoholism, leads to many health issues ranging from liver cirrhosis to domestic violence. Others described unintentional injuries such as assaults, motor vehicle accidents, and other injuries that arise from the consumption of alcohol. Lastly, participants mentioned abuse arising at the beginning of every month, particularly elder abuse. At each beginning of the month, the elderly receive their benefit checks, which other family members take advantage of and use it for other purposes, like alcohol purchases.

The next prioritized need from the focus groups was ***Access to health services (Dental, Behavioral Health, Primary Care)*** <-> ***Transportation improvement (access to reliable transportation, knowledge to apply for resources, etc.)***. The participants highlighted the need to have improved roads and access to main roads as a top priority. They then associated this with access to health services and other social services. As will be noted in the quantitative report, there is a high proportion of families living below the federal poverty line. Referred to as the Social Determinants of Health, conditions in places where people live, work, and play affect a wide range of health risks and outcomes, is a predictor of health. One of the best predictors of health is poverty. Those with less financial resources often do not have the means of transportation, creating a challenge for those individuals to reach health services. Although people living in poverty have access to subsidies from Tribal, State, and Federal Governments, they lack access to retrieve these services. With difficulty finding transportation, applications are left incomplete, follow up interviews are missed, and benefits are canceled.

Further, as in many rural areas, a majority of people live on dirt roads that can get muddy when it rains or snows. These roads are often impassable when a storm hits. Many of the individuals that do live off-road are elderly, who at times need the most medical attention and qualify for the most subsidies.

The third health priority identified was the need for ***Targeted health promotion disease prevention activities (youth, elders, parents, caregivers, etc.)***. The FDIHB, Inc. SDA is a diverse service area where demographics range from communities with high proportions of youth or high proportions of elders. Community members can easily identify if there is a

---

high proportion of youth or elders in their respective communities and it was noticed when conducting the focus groups. In communities, where there was a high proportion of youth, many of the participants stressed youth-focused services and activities. In communities where there was a high proportion of elders, the participants stressed elder services and activities. Also, there were other unique population groups that were mentioned such as parents and caregivers. The participants highlighted that each group had different needs, so health promotion services and activities should be targeted for each of the populations.

Lastly, the fourth health priority was ***Prevention, diagnosis, and treatment of diabetes, heart disease, obesity and other related diseases <-> Safe places to exercise and access to healthy foods.*** At all the focus groups there was mention of needing a Wellness Center so that health promotion services can be operated out of a physical building in the local communities. Most health prevention ideas centered around diabetes and other heart-related diseases. Interventions included having safe places to exercise, community gardens, and other food security initiatives.

## CONCLUSION

In conclusion, using a qualitative approach to identify and prioritize community health needs, this report is one piece to the entire Community Health Needs Assessment. The results of the process led to four prioritized health needs, *Behavioral Health Services, Access to Health and Social Services, Targeted Health Promotion Disease Prevention Activities, and Prevention, Diagnosis, and Treatment of Diabetes, Heart Disease, Obesity, and Other Related Diseases.* The quantitative results will be added to this report upon completion.

# 2019 CHNA FOCUS GROUP RESULTS

## CRYSTAL, NM TOP NEEDS:

1. Road maintenance and road improvement for individuals to get access to care and other services
2. Emergency services such as emergency medical services and emergency public services (police, fire, medical).
3. General health of the community (nutrition, exercise, diabetes prevention), emphasis on elder health. This community has the highest number and highest proportion of elders in the FDIHB, Inc. Service Delivery Area.

## NAVAJO, NM – RED LAKE CHAPTER #18 TOP NEEDS:

1. Street improvements for public safety (crosswalks at high foot traffic areas, traffic signs for slowing down, speed bumps).
2. All purpose Resource/Wellness Center. Right now their chapter house is in portable office space. The wellness center would house youth center and senior center for health promotion activities.
3. Safe places to be physically active.

## FORT DEFIANCE, AZ

1. Family Counseling (parenting classes, how to be a parent, how to raise children, help during crisis).
2. Access to care (outreach to those that don't know that transportation is available and how to apply for benefits).
3. Safe and secure places to live (people living in dilapidated houses are getting sick from pneumonia, elders need help with fixing up their home).

## ST. MICHAELS, AZ

1. Access to healthy foods to prevent nutrition related diseases (cardiovascular disease, diabetes, etc.)
2. Safe places to exercise to increase physical activity.
3. Hospice care.

## KLAGETO, AZ

1. Places to dump trash to prevent infectious disease.
2. Prevention and management of diseases of the heart.
3. Behavioral Health Services.

## NAHATADZIL, AZ

1. Wellness Center for physical health and other services such as health promotion classes.
2. Substance abuse services. Even though the liquor store has been shut down, there are still the lingering effects on the people. They need behavioral health services.
3. Public Safety to prevent unintentional injuries.

## GANADO, AZ

1. Behavioral Health Services.
2. Access to services including health, housing, economic resources.
3. Youth activities for health promotion and prevention of disease.

## OVERALL PRIORITIZED NEEDS FOR THE FDIHB, INC. SERVICE DELIVERY AREA:

1. Behavioral Health Services (Parenting, counseling, substance abuse, etc.) <-> Unintentional Injuries (violence, vehicle accidents, falls, etc.)
2. Access to health services (Dental, Behavioral Health, Primary Care) <-> Transportation improvement (access to reliable transportation, ability to reach highways, etc.)
3. Prevention, diagnosis, and treatment of diabetes, heart disease, obesity and other related diseases <-> Safe places to exercise and access to healthy foods.
4. Targeted health promotion disease prevention activities (youth, elders, parents, care givers, etc.)

## Demographics

Current population demographics and changes in demographic composition over time play a determining role in the types of health and social services needed by communities.

### Total Population

A total of 71,511 people live in the 11,197.47 square mile report area defined for this assessment according to the U.S. Census Bureau American Community Survey 2015-19 5-year estimates. The population density for this area, estimated at 6.39 persons per square mile, is less than the national average population density of 91.93 persons per square mile.

Report Area	Total Population	Total Land Area (Square Miles)	Population Density (Per Square Mile)
Apache County, AZ	71,511	11,197.47	6.39
Arizona	7,050,299	113,590.70	62.07
United States	324,697,795	3,532,068.58	91.93

## Total Population Change, 2000 - 2010

According to the United States Census Bureau Decennial Census, between 2000 and 2010 the population in the report area grew by 2,095 persons, a change of 3.02%. A significant positive or negative shift in total population over time impacts healthcare providers and the utilization of community resources.

Report Area	Total Population, 2000 Census	Total Population, 2010 Census	Population Change, 2000-2010	Population Change, 2000-2010, Percent

### Urban and Rural Population

This indicator reports the percentage of population living in urban and rural areas. Urban areas are identified using population density, count, and size thresholds. Urban areas also include territory with a high degree of impervious surface (development). Rural areas are all areas that are not urban. Of the report areas 71,518 population, 18,551 or 25.94% of the population is classified urban while 52,967 or 74.06% is rural.

Report Area	Total Population	Urban Population	Rural Population	Urban Population, Percent	Rural Population, Percent
Apache County, AZ	71,518	18,551	52,967	25.94%	74.06%
Arizona	6,392,017	5,740,659	651,358	89.81%	10.19%

### Rural Population, Percent by Race Alone

### Median Age

Of the estimated 71,511 total population in the report area, the median age of all persons is 35.0. This indicates that the report population as a whole generally trends younger than the state, which has a median age of 37.7. These data are based on the latest U.S. Census Bureau American Community Survey 5-year estimates.

Report Area	Total Population	Median Age
Apache County, AZ	71,511	35.0
Arizona	7,050,299	37.7
United States	324,697,795	38.1

Median Age by County, ACS 2015-19

## Population Median Age by Gender

This indicator reports the median age of the population by gender.

Report Area	Male	Female
Apache County, AZ	34.3	35.5
Arizona	36.3	39.0
United States	36.8	39.4

## Population Median Age by Race Alone

This indicator reports the median age of the population by race alone.

Report Area	White	Black or African American	Native American or Alaska Native	Asian	Native Hawaiian or Pacific Islander	Some Other Race	Multiple Race
Apache County, AZ	46.8	43.2	32.0	35.5	24.0	45.2	15.6
Arizona	40.7	31.7	29.7	36.6	31.2	29.1	20.0
United States	40.7	34.1	33.0	37.2	32.2	29.9	20.3

## Population Median Age by Ethnicity

This indicator reports the median age of the population by ethnicity.

Report Area	Hispanic or Latino	Not Hispanic or Latino
Apache County, AZ	27.8	52.4
Arizona	27.6	47.4
United States	29.2	43.5

## Population Under Age 18

Of the estimated 71,511 total population in the report area, an estimated 19,551 persons are under the age of 18, representing 27.34% of the population. These data are based on the latest U.S. Census Bureau American Community Survey 5-year estimates. The number of persons under age 18 is relevant because this population has unique needs which should be considered separately from other age groups.

Report Area	Total Population	Population Age 0-17	Population Age 0-17, Percent
Apache County, AZ	71,511	19,551	27.34%
Arizona	7,050,299	1,635,344	23.20%

## Population Under Age 18 by Gender

This indicator reports the percentage of population that is under age 18 by gender.

Report Area	Male	Female	Male, Percent	Female, Percent
Apache County, AZ	9,593	9,958	27.29%	27.39%
Arizona	834,181	801,163	23.80%	22.59%
United States	37,526,534	35,902,858	23.47%	21.78%

## Population Under Age 18 by Ethnicity Alone

This indicator reports the percentage of population who are under age 18 by ethnicity alone during 2015-2019, according to the American Community Survey (ACS). Within the report area, there were 1,656 Hispanics under age 18, representing 36.55% of the total Hispanic population. There were 17,895 Non-Hispanics under age 18 in the report area, representing 26.72% of the total Non-Hispanic population. Data for this indicator is only reported for individuals where age, race, and ethnicity were identified in the American Community Survey.

Report Area	Hispanic or Latino	Not Hispanic or Latino	Hispanic or Latino, Percent	Not Hispanic or Latino, Percent
Apache County, AZ	1,656	17,895	36.55%	26.72%
Arizona	722,554	912,790	32.71%	18.85%
United States	18,456,651	54,972,741	31.56%	20.65%

## Population Under Age 18 by Ethnicity Alone

This indicator reports the percentage of population who are under age 18 by ethnicity alone during 2015-2019, according to the American Community Survey (ACS). Within the report area, there were 1,656 Hispanics under age 18, representing 8.47% of the total population under age 18. There were 17,895 Non-Hispanics under age 18 in the report area, representing 91.53% of the total population under age 18. Data for this indicator is only reported for individuals where age, race, and ethnicity were identified in the American Community Survey.

Report Area	Hispanic or Latino	Not Hispanic or Latino	Hispanic or Latino, Percent	Not Hispanic or Latino, Percent
Apache County, AZ	1,656	17,895	8.47%	91.53%
Arizona	722,554	912,790	44.18%	55.82%
United States	18,456,651	54,972,741	25.14%	74.86%

## Population Under Age 18 by Race Alone, Percent

This indicator reports the percentage of population that is under age 18 by race alone.

Report Area	White	Black or African American	Native American or Alaska Native	Asian	Native Hawaiian or Pacific Islander	Some Other Race	Multiple Race
Apache County, AZ	21.85%	1.07%	28.83%	13.41%	50.00%	9.65%	54.44%
Arizona	21.27%	26.22%	29.60%	18.94%	23.17%	28.72%	45.84%
United States	20.86%	24.94%	26.91%	19.62%	25.20%	29.48%	45.54%

## Population Under Age 18 by Race Alone, Total

This indicator reports the proportion of each race (alone) making up the population under age 18.

Report Area	White	Black or African American	Native American or Alaska Native	Asian	Native Hawaiian or Pacific Islander	Some Other Race	Multiple Race
Apache County, AZ	3,567	4	15,209	33	10	53	675

## Population with Any Disability

This indicator reports the percentage of the total civilian non-institutionalized population with a disability. The report area has a total population of 70,867 for whom disability status has been determined, of which 10,603 or 14.96% have any disability. This indicator is relevant because disabled individuals comprise a vulnerable population that requires targeted services and outreach by providers.

Report Area	Total Population (For Whom Disability Status Is Determined)	Population with a Disability	Population with a Disability, Percent
Apache County, AZ	70,867	10,603	14.96%

## Foreign-Born Population

This indicator reports the percentage of the population that is foreign-born. The foreign-born population includes anyone who was not a U.S. citizen or a U.S. national at birth. This includes any non-citizens, as well as persons born outside of the U.S. who have become naturalized citizens. The native U.S. population includes any person born in the United States, Puerto Rico, a U.S. Island Area (such as Guam), or abroad of American (U.S. citizen) parent or parents. The latest figures from the U.S. Census Bureau show that 1,005 persons in the report area are of foreign birth, which represents 1.41% of the report area population. This percentage is less than the national average of 13.55%.

Report Area	Total Population	Naturalized U.S. Citizens	Population Without U.S. Citizenship	Total Foreign-Birth Population	Foreign-Birth Population, Percent of Total Population

United States	2.15%	5.17%	7.79%	16.29%	20.13%

### Veteran Population by Age Group, Percent

## Income and Economics

Economic and social insecurity often are associated with poor health. Poverty, unemployment, and lack of educational achievement affect access to care and a community's ability to engage in healthy behaviors. Without a network of support and a safe community, families cannot thrive. Ensuring access to social and economic resources provides a foundation for a healthy community.

### Employment - Labor Force Participation Rate

The table below displays the labor force participation rate for the report area. According to the 2015 – 2019 American Community Survey, of the 54,229 working age population, 20,569 are included in the labor force. The labor force participation rate is 37.93%.

Report Area	Total Population Age 16+	Labor Force	Labor Force Participation Rate
Apache County, AZ	54,229	20,569	<b>37.93%</b>
Arizona	5,600,921	3,326,563	59.39%
United States	259,662,880	163,555,585	62.99%

Note: This indicator is compared to the state average.

## Employment - Unemployment Rate

Total unemployment in the report area for the current month equals 1,266, or 6.6% of the civilian non-institutionalized population age 16 and older (non-seasonally adjusted). This indicator is relevant because unemployment creates financial instability and barriers to access including insurance coverage, health services, healthy food, and other necessities that contribute to poor health status.

Report Area	Labor Force	Number Employed	Number Unemployed	Unemployment Rate
Apache County, AZ	19,057	17,791	1,266	<b>6.6%</b>
Arizona	3,672,504	3,555,059	117,445	3.2%

### Income - Inequality (GINI Index)

This indicator reports income inequality using the Gini coefficient. Gini index values range between zero and one. A value of one indicates perfect inequality where only one house-hold has any income. A value of zero indicates perfect equality, where all households have equal income.

Index values are acquired from the 2015-19 American Community Survey and are not available for custom report areas or multi-county areas.

Report Area	Total Households	Gini Index Value
Apache County, AZ	20,867	<b>0.50</b>
Arizona	2,571,268	0.47
United States	120,756,048	0.48

#### Income Inequality (GINI), Index Value by County, ACS 2015-19

## Income - Median Household Income

This indicator reports median household income based on the latest 5-year American Community Survey estimates. This includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income. There are 20,867 households in the report area, with an average income of \$44,477 and median income of \$32,508.

Report Area	Total Households	Average Household Income	Median Household Income
Apache County, AZ	20,867	\$44,477	<b>\$32,508</b>
Arizona	2,571,268	\$80,779	\$58,945
United States	120,756,048	\$88,607	\$62,843

## Poverty - Children Eligible for Free/Reduced Price Lunch

Free or reduced price lunches are served to qualifying students in families with income between under 185 percent (reduced price) or under 130% (free lunch) of the US federal poverty threshold as part of the federal National School Lunch Program (NSLP).

Out of 12,957 total public school students in the report area, 9,137 were eligible for the free or reduced price lunch program in the latest report year. This represents 70.5% of public school students, which is higher than the state average of 46.9%.

Report Area	Total Students	Students Eligible for Free or Reduced Price Lunch	Students Eligible for Free or Reduced Price Lunch, Percent
Apache County, AZ	12,957	9,137	70.5%
Arizona	1,147,415	538,134	46.9%

### Children Eligible for Free or Reduced Price Lunch by Eligibility

The table below displays the number and percentage of students eligible for free or reduced price lunch by income eligibility category. Percentages in the table below are out of the total student population.

Report Area	Free Lunch, Total	Free Lunch, Percent	Reduced Lunch, Total	Reduced Lunch, Percent
Apache County, AZ	8,895	68.7%	230	1.8%
Arizona	459,026	40.0%	79,045	6.9%
United States	21,723,889	43.0%	2,626,076	5.2%

The chart below displays the percentage of the students in each eligibility category out of the total number of students eligible for free or reduced price lunch.

### Poverty - Population Below 100% FPL

Poverty is considered a *key driver* of health status.

Within the report area 35.46% or 24,963 individuals are living in households with income below the Federal Poverty Level (FPL). This indicator is relevant because poverty creates barriers to access including health services, healthy food, and other necessities that contribute to poor health status.

Report Area	Total Population	Population in Poverty	Population in Poverty, Percent
Apache County, AZ	70,403	24,963	35.46%
Arizona	6,891,224	1,043,764	15.15%
United States	316,715,051	42,510,843	13.42%

Apache County, AZ

## Education

This category contains indicators that describe the education system and the educational outcomes of report area populations. Education metrics can be used to describe variation in population access, proficiency, and attainment throughout the education system, from access to pre-kindergarten through advanced degree attainment. These indicators are important because education is closely tied to health outcomes and economic opportunity.

### Access - Preschool Enrollment (Age 3-4)

This indicator reports the percentage of the population age 3-4 that is enrolled in school. This indicator helps identify places where pre-school opportunities are either abundant or lacking in the educational system.

Report Area	Population Age 3-4	Population Age 3-4 Enrolled in School	Population Age 3-4 Enrolled in School, Percent
Apache County, AZ	2,069	928	44.85%
Arizona	183,386	71,233	38.84%
United States	8,151,928	3,938,693	48.32%

## Attainment - High School Graduation Rate

The adjusted cohort graduation rate (ACGR) is a graduation metric that follows a “cohort” of first-time 9th graders in a particular school year, and adjust this number by adding any students who transfer into the cohort after 9th grade and subtracting any students who transfer out, emigrate to another country, or pass away. The ACGR is the percentage of the students in this cohort who graduate within four years. In the report area, the adjusted cohort graduation rate was 78.7% during the most recently reported school year. Students in the report area performed worse than the state, which had an ACGR of 88.5%.

Report Area	Adjusted Student Cohort	Number of Diplomas Issued	Cohort Graduation Rate
Apache County, AZ	742	584	78.7%
Arizona	45,596	40,371	88.5%
United States	3,095,240	2,715,610	87.7%

Note: This indicator is compared to the state average.

## Attainment - Overview

Educational Attainment shows the distribution of the highest level of education achieved in the report area, and helps schools and businesses to understand the needs of adults, whether it be workforce training or the ability to develop science, technology, engineering, and mathematics opportunities. Educational attainment is calculated for persons over 25, and is an estimated average for the period from 2014 to 2019.

For the selected area, 7.7% have at least a college bachelor's degree, while 32.2% stopped their formal educational attainment after high school.

Report Area	No High School Diploma	High School Only	Some College	Associates Degree	Bachelors Degree	Graduate or Professional Degree
Apache County, AZ	<b>19.60%</b>	32.2%	28.2%	7.6%	7.7%	4.6%

## Housing and Families

This category contains indicators that describe the structure of housing and families, and the condition and quality of housing units and residential neighborhoods. These indicators are important because housing issues like overcrowding and affordability have been linked to multiple health outcomes, including infectious disease, injuries, and mental disorders. Furthermore, housing metrics like home-ownership rates and housing prices are key for economic analysis.

### Households - Overview

This indicator reports the total number and percentage of households by composition (married couple family, nonfamily, etc.). According to the American Community Survey subject definitions, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption\*. A non-family household is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

*\*Family households and married-couple families do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption.*

Report Area	Total Households	Family Households	Family Households, Percent	Non-Family Households	Non-Family Households, Percent
Apache County, AZ	20,867	13,816	66.21%	7,051	33.79%

Households with Children by Composition and Relationship to Householder, Total

Apache County, AZ

## Evictions

This indicator reports information about formal evictions based on court records from 48 states and the District of Columbia, compiled by the Eviction Lab. The number evictions and eviction filings within the report area is shown in below. The “filing rate” is the ratio of the number of evictions filed in an area over the number of renter-occupied homes in that area. An “eviction rate” is the subset of those homes that received an eviction judgment in which renters were ordered to leave. For the year 2016, the Eviction Lab reports that, of 6,491 homes in the report area, there were 8 eviction filings, for an eviction filing rate of 0.12%. 8 of the eviction filings ended in an eviction, for an eviction rate of 0.12%.

Note: Not all counties have data that has been provided. Indicator data do not include information about "informal evictions", or those that happen outside of the courtroom.

Report Area	Renter Occupied Households	Eviction Filings	Evictions	Eviction Filing Rate	Eviction Rate
Apache County, AZ	6,491	8	8	0.12%	0.12%
Arizona	212,626	12,132	8,339	5.71%	3.92%
United States	38,372,860	2,350,042	898,479	6.12%	2.34%

Note: This indicator is compared to the state average.

### Eviction Filing Rate by Neighborhood Predominant Race/Ethnicity, 2016

Rates by race/ethnicity are calculated by aggregating data on evictions in census block groups with a majority of the population (over 50%) belonging to a specific race/ethnicity. Reported race/ethnicity categories include: Non-Hispanic White; Black or Africa American; Asian, and Hispanic or Latino. In some counties there are no majority Black, Asian, or Hispanic census block groups.

Note: Not all counties or states have data that has been provided.

Report Area	Non-Hispanic White	Non-Hispanic Black	Asian	Hispanic or Latino
Apache County, AZ	0.33%	No data	No data	0.00%
Arizona	0.57%	0.00%	No data	0.51%
United States	1.50%	0.80%	0.01%	0.39%

### Eviction Filings by Neighborhood Predominant Race/Ethnicity, 2016

Totals by race/ethnicity are calculated by aggregating data on evictions in census block groups with a majority of the population (over 50%) belonging to a specific race/ethnicity. Reported race/ethnicity categories include: Non-Hispanic White; Black or Africa American; Asian, and Hispanic or Latino. In some counties there are no majority Black, Asian, or Hispanic census block groups.

Note: Not all counties or states have data that has been provided.

Report Area	Non-Hispanic White	Non-Hispanic Black	Asian	Hispanic or Latino
Apache County, AZ	5	No data	No data	0
Arizona	3,252	0	No data	2,924
United States	405,649	217,305	1,960	105,380

### Housing Costs - Cost Burden (30%)

This indicator reports the percentage of the households where housing costs are 30% or more of total household income. This indicator provides information on the cost of monthly housing expenses for owners and renters. The information offers a measure of housing affordability and excessive shelter costs. The data also serve to aid in the development of housing programs to meet the needs of people at different economic levels. Of the 20,867 total households in the report area, 2,830 or 13.56% of the population live in cost burdened households.

Report Area	Total Households	Cost Burdened Households (Housing Costs Exceed 30% of Income)	Cost Burdened Households, Percent
Apache County, AZ	20,867	2,830	13.56%
Arizona	2,571,268	764,319	29.73%
United States	120,756,048	37,249,895	30.85%

Note: This indicator is compared to the state average.

#### Cost Burdened Households (Housing Costs Exceed 30% of Household Income), Percent by County, ACS 2015-19

### Cost Burdened Households by Tenure, Total

These data show the number of households that spend more than 30% of the household income on housing costs. In the report area, there were 2,830 cost burdened households according to the U.S. Census Bureau American Community Survey (ACS) 2015-2019 5-year estimates. The data for this indicator is only reported for households where household housing costs and income earned was identified in the American Community Survey.

Report Area	Cost Burdened Households	Cost Burdened Rental Households	Cost Burdened Owner Occupied Households (With Mortgage)	Cost Burdened Owner Occupied Households (With No Mortgage)
Apache County, AZ	2,830	924	863	1,043
Arizona	764,319	407,143	291,009	66,167
United States	37,249,895	20,002,945	13,400,012	3,846,938

Cost Burdened Households by Tenure, Total  
Apache County, AZ

### Cost Burdened Households by Tenure, Percent

These data show the percentage of households by tenure that are cost burdened. Cost burdened rental households (those that spent more than 30% of the household income on rental costs) represented 20.98% of all of the rental households in the report area, according to the U.S. Census Bureau American Community Survey (ACS) 2015-2019 5-year estimates. The data for this indicator is only reported for households where tenure, household housing costs, and income earned was identified in the American Community Survey.

Report Area	Rental Households	Percentage of Rental Households that are Cost Burdened	Owner Occupied Households (With Mortgage)	Percentage of Owner Occupied Households w/ Mortgages that are Cost Burdened	Owner Occupied Households (No Mortgage)	Percentage of Owner Occupied Households w/o Mortgages that are Cost Burdened
Apache County, AZ	4,405	20.98%	3,345	25.80%	13,117	7.95%
Arizona	914,512	44.52%	1,056,797	27.54%	599,959	11.03%
United States	43,481,667	46.00%	48,416,627	27.68%	28,857,754	13.33%

## Housing Quality - Substandard Housing

This indicator reports the number and percentage of owner- and renter-occupied housing units having at least one of the following conditions: 1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with 1 or more occupants per room, 4) selected monthly owner costs as a percentage of household income greater than 30%, and 5) gross rent as a percentage of household income greater than 30%. Selected conditions provide information in assessing the quality of the housing inventory and its occupants. This data is used to easily identify homes where the quality of living and housing can be considered substandard. Of the 20,867 total occupied housing units in the report area, 7,019 or 33.64% have one or more substandard conditions.

Report Area	Total Occupied Housing Units	Occupied Housing Units with One or More Substandard Conditions	Occupied Housing Units with One or More Substandard Conditions, Percent
Apache County, AZ	20,867	7,019	33.64%
Arizona	2,571,268	819,492	31.87%
United States	120,756,048	38,530,862	31.91%

Occupied Housing Units with One or More Substandard Conditions, Percent

## Substandard Housing: Number of Substandard Conditions Present

Report Area	No Conditions	One Condition	Two or Three Conditions	Four Conditions
Apache County, AZ	66.36%	21.86%	11.69%	0.09%
Arizona	68.13%	29.59%	2.28%	0.00%
United States	68.09%	30.03%	1.87%	0.01%

Substandard Housing: Number of Substandard Conditions Present

Apache County, AZ

## Substandard Housing: Households Lacking Complete Plumbing Facilities

Complete plumbing facilities include: (a) hot and cold running water, (b) a flush toilet, and (c) a bathtub or shower. All three facilities must be located inside the house, apartment, or mobile home, but not necessarily in the same room. Housing units are classified as lacking complete plumbing facilities when any of the three facilities is not present.

Report Area	Occupied Housing Units	Housing Units Lacking Complete Plumbing Facilities	Housing Units Lacking Complete Plumbing Facilities, Percent
Apache County, AZ	20,867	2,957	14.17%
Arizona	2,571,268	17,093	0.66%
United States	120,756,048	468,497	0.39%

### Substandard Housing: Households Lacking Complete Kitchen Facilities

A unit has complete kitchen facilities when it has all three of the following facilities: (a) a sink with a faucet, (b) a stove or range, and (c) a refrigerator. All kitchen facilities must be located in the house, apartment, or mobile home, but they need not be in the same room. A housing unit having only a microwave or portable heating equipment such as a hot plate or camping stove should not be considered as having complete kitchen facilities. An icebox is not considered to be a refrigerator.

Report Area	Occupied Housing Units	Housing Units Lacking Complete Kitchen Facilities	Housing Units Lacking Complete Kitchen Facilities, Percent
Apache County, AZ	32,891	7,071	21.50%
Arizona	3,003,286	60,984	2.03%
United States	137,428,986	3,840,988	2.79%

### Substandard Housing: Households Lacking Telephone Service

A telephone must be in working order and service available in the house, apartment, or mobile home that allows the respondent to both make and receive calls. Households that have cell-phones (no land-line) are counted as having telephone service available. Households whose service has been discontinued for nonpayment or other reasons are not counted as having telephone service available.

Report Area	Housing Units Lacking Telephone Service	Housing Units Lacking Telephone Service	Owner-Occupied Units Lacking Telephone Service	Owner-Occupied Units Lacking Telephone Service	Renter-Occupied Units Lacking Telephone Service	Renter-Occupied Units Lacking Telephone Service
Apache County, AZ	2,246	10.76%	1,997	12.13%	249	5.65%
Arizona	57,737	2.25%	27,403	1.65%	30,334	3.32%
United States	2,317,813	1.92%	987,063	1.28%	1,330,750	3.06%

## Housing Stock - Age

This indicator reports, for a given geographic area, the median year in which all housing units (vacant and occupied) were first constructed. The year the structure was built provides information on the age of housing units. These data help identify new housing construction and measures the disappearance of old housing from the inventory, when used in combination with data from previous years. This data also serves to aid in the development of formulas to determine substandard housing and provide assistance in forecasting future services, such as energy consumption and fire protection. There are a total 32,891 housing units in the report area, and the median year built is 1986.

Report Area	Total Housing Units	Median Year Structures Built
Apache County, AZ	32,891	1986
Arizona	3,003,286	1990
United States	137,428,986	1978

Apache County, AZ

## Other Social & Economic Factors

Economic and social insecurity often are associated with poor health. Poverty, unemployment, and lack of educational achievement affect access to care and a community's ability to engage in healthy behaviors. Without a network of support and a safe community, families cannot thrive. Ensuring access to social and economic resources provides a foundation for a healthy community.

### Area Deprivation Index

This indicator reports the average (population weighted) Area Deprivation Index (ADI) for the selected area. The Area

Deprivation Index ranks neighborhoods and communities relative to all neighborhoods across the nation (National Percentile) or relative to other neighborhoods within just one state (State Percentile). The ADI is calculated based on 17 measures related to four primary domains (Education; Income & Employment; Housing; and Household Characteristics). The overall scores are measured on a scale of 1 to 100 where 1 indicates the lowest level of deprivation (least disadvantaged) and 100 is the highest level of deprivation (most disadvantaged).

Report Area	Total Population	State Percentile	National Percentile
Apache County, AZ	71,511	92	90
Arizona	6,886,358	No data	49
United States	320,934,417	No data	No data

## Households with No Motor Vehicle by Tenure

Report Area	Owner-Occupied Households	Owner-Occupied Households, Percent	Renter-Occupied Households	Renter-Occupied Households, Percent
Apache County, AZ	2,149	13.05%	527	11.96%
Arizona	41,829	2.52%	116,710	12.76%
United States	2,414,113	3.12%	7,981,600	18.36%

## Insurance - Uninsured Population (ACS)

The lack of health insurance is considered a *key driver* of health status.

In the report area 25.09% of the total civilian non-institutionalized population are without health insurance coverage. The rate of uninsured persons in the report area is greater than the state average of 10.42%. This indicator is relevant because lack of insurance is a primary barrier to healthcare access including regular primary care, specialty care, and other health services that contributes to poor health status.

Report Area	Total Population (For Whom Insurance Status is Determined)	Uninsured Population	Uninsured Population, Percent
Apache County, AZ	70,867	17,782	25.09%
Arizona	6,941,028	723,547	10.42%

## SNAP Benefits - Population Receiving SNAP (SAIPE)

The Supplemental Nutrition Assistance Program, or SNAP, is a federal program that provides nutrition benefits to low-income individuals and families that are used at stores to purchase food. This indicator reports the average percentage of the population receiving SNAP benefits during the month of July during the most recent report year.

Report Area	Total Population	Population Receiving SNAP Benefits	Population Receiving SNAP Benefits, Percent
Apache County, AZ	71,545.00	23,469	32.8%
Arizona	7,048,876.00	861,445	12.2%
United States	325,147,121.00	40,771,688	12.5%

Note: This indicator is compared to the state average.

United States	9.1%	10.4%	12.6%	14.1%	14.8%	15.1%	14.8%	14.4%	13.9%	13.2%	12.5%

## Social Vulnerability Index

The degree to which a community exhibits certain social conditions, including high poverty, low percentage of vehicle access, or crowded households, may affect that community's ability to prevent human suffering and financial loss in the event of disaster. These factors describe a community's social vulnerability.

The social vulnerability index is a measure of the degree of social vulnerability in counties and neighborhoods across the United States, where a higher score indicates higher vulnerability. The report area has a social vulnerability index score of 0.99, which is which is greater than the state average of 0.72.

Report Area	Total Population	Socioeconomic Theme Score	Household Composition Theme Score	Minority Status Theme Score	Housing & Transportation Theme Score	Social Vulnerability Index Score
Apache County, AZ	71,522	0.98	0.80	0.98	0.91	<b>0.99</b>
Arizona	6,946,685	0.52	0.45	0.91	0.79	0.72
United States	322,903,030	0.30	0.32	0.76	0.62	0.40

Note: This indicator is compared to the state average.

## Teen Births

This indicator reports the seven-year average number of births per 1,000 female population age 15-19. Data were from the National Center for Health Statistics - Natality files (2013-2019) and are used for the 2021 County Health Rankings.

In the report area, of the 20,075 total female population age 15-19, the teen birth rate is 34.0 per 1,000, which is greater than the state's teen birth rate of 24.7.

Note: Data are suppressed for counties with fewer than 10 teen births in the time frame.

Report Area	Female Population Age 15-19	Teen Births, Rate per 1,000 Female Population Age 15-19
Apache County, AZ	20,075	<b>34.0</b>
Arizona	3,171,226	24.7
United States	144,319,360	20.9

## Teen Birth Rate per 1,000 Female Population Age 15-19 by Race / Ethnicity

This indicator reports the 2013-2019 seven-year average teen birth rate per 1,000 female population age 15-19 by race / ethnicity.

Report Area	Non-Hispanic White	Non-Hispanic Black	Hispanic or Latino
Apache County, AZ	23.4	No data	35.1
Arizona	13.5	26.8	34.8
United States	13.6	30.3	32.1

## Violent Crime - Total

Violent crime includes homicide, rape, robbery, and aggravated assault.

Within the report area, the 3 year total of reported violent crimes was 6,320, which equates to an annual rate of 2,914.60 crimes per 100,000 people, higher than the statewide rate of 482.60.

Report Area	Total Population	Violent Crimes, 3-year Total	Violent Crimes, Annual Rate (Per 100,000 Pop.)
Apache County, AZ	72,278	6,320	2,914.60
Arizona	6,945,628	100,571	482.60
United States	366,886,849	4,579,031	416.00

Note: This indicator is compared to the state average.

Violent Crimes, All, Rate (Per 100,000 Pop.) by County, FBI UCR 2014; 2016

## Property Crime - Total

This indicator reports the rate of property crime offenses reported by law enforcement per 100,000 residents. Property crimes include burglary, larceny-theft, motor vehicle theft, and arson. This indicator is relevant because it assesses community safety.

In the report area, 72,039 property crimes occurred in 2014 and 2016 (two years). The property crime rate of 362 per 100,000 residents is lower than the statewide rate of 208,156 per 100,000.

Note: Data are suppressed for counties if, for both years of available data, the population reported by agencies is less than 50% of the population reported in Census or less than 80% of agencies measuring crimes reported data.

Report Area	Total Population	Property Crimes, Annual Average	Property Crimes, Annual Rate (Per 100,000 Pop.)
Apache County, AZ	72,039	362	503.20
Arizona	6,831,275	208,156	3,047.10
United States	321,015,117	7,915,583	2,466.10

## Voter Participation Rate

This indicator reports the percentage of the adult population that voted in the national elections on November 2, 2020. Results are preliminary as of December 14, 2020. Voter participation rates are calculated as a percentage of the voting age population (age 18+) and not as a percentage of registered voters. In the 2020 election, of the report area's 51,465 voting age population, 35,183 or 68.4% have cast a vote.

Report Area	Total Citizens Age 18+	Total Votes Cast	Voter Participation Rate
Apache County, AZ	51,465	35,183	68.4%
Arizona	4,920,449	3,387,326	68.8%
United States	230,428,731	158,433,557	68.8%

## Physical Environment

A community's health also is affected by the physical environment. A safe, clean environment that provides access to healthy food and recreational opportunities is important to maintaining and improving community health.

### Air & Water Quality - Particulate Matter 2.5

This indicator reports the percentage of days with particulate matter 2.5 levels above the National Ambient Air Quality Standard (35 micrograms per cubic meter) per year, calculated using data collected by monitoring stations and modeled to include counties where no monitoring stations occur. This indicator is relevant because poor air quality contributes to respiratory issues and overall poor health.

Report Area	Total Population (2010)	Average Daily Ambient Particulate Matter 2.5	Days Exceeding Emissions Standards	Days Exceeding Standards, Percent (Crude)	Days Exceeding Standards, Percent (Weighted)
Apache County, AZ	71,518	4.77	0	0.00	0.00%

## Built Environment - Liquor Stores

This indicator reports the number of establishments in the report area primarily engaged in retailing packaged alcoholic beverages, such as ale, beer, wine, and liquor. The number of liquor stores per 100,000 population provides a measure of environmental influences on dietary behaviors and the accessibility of healthy foods. Note this data excludes establishments preparing and serving alcohol for consumption on premises (including bars and restaurants) or which sell alcohol as a secondary retail product (including gas stations and grocery stores).

Report Area	Total Population (2010)	Number of Establishments	Establishments, Rate per 100,000 Population
Apache County, AZ	71,518	Suppressed	Suppressed
Arizona	6,392,017	206	3.22

## Climate & Health - Drought Severity

Drought is defined as a moisture deficit bad enough to have social, environmental or economic effects. The Drought Monitor map identifies areas of drought and labels them by intensity<sup>1</sup>. D1 is the least intense level and D4 the most intense. In the report area, 61.68% of weeks during the 2017-2019 period were spent in drought (any level). An additional 19.77% of weeks were categorized spent in "abnormally dry conditions" (D0) indicating that drought could occur, or that the area is recovering from drought but are not yet back to normal.

Report Area	Time Period	Weeks in D0 (Abnormally Dry), Percent	Weeks in D1 (Moderate Drought), Percent	Weeks in D2 (Severe Drought), Percent	Weeks in D3 (Extreme Drought), Percent	Weeks in D4 (Exceptional Drought), Percent	Weeks in Drought (Any), Percent

## Food Environment - Fast Food Restaurants

This indicator reports the number of fast food restaurants per 100,000 population. The prevalence of fast food restaurants provides a measure of both access to healthy food and environmental influences on dietary behaviors. Fast food restaurants are defined as limited-service establishments primarily engaged in providing food services (except snack and nonalcoholic beverage bars) where patrons generally order or select items and pay before eating.

Report Area	Total Population (2010)	Number of Establishments	Establishments, Rate per 100,000 Population
Apache County, AZ	71,518	14	19.58
Arizona	6,392,017	4,941	77.30
United States	308,745,538	253,841	82.22

## Food Environment - Food Desert Census Tracts

This indicator reports the number of neighborhoods in the report area that are within food deserts. The USDA Food Access Research Atlas defines a food desert as any neighborhood that lacks healthy food sources due to income level, distance to supermarkets, or vehicle access. The report area has a population of 45,141 living in food deserts and a total of 10 census tracts classified as food deserts by the USDA.

Report Area	Total Population (2010)	Food Desert Census Tracts	Other Census Tracts	Food Desert Population	Other Population
Apache County, AZ	71,518	10	6	45,141	12,033
Arizona	6,392,017	257	1,263	1,049,466	1,636,106

## Food Environment - Grocery Stores

Healthy dietary behaviors are supported by access to healthy foods, and Grocery Stores are a major provider of these foods. There are 7 grocery establishments in the report area, a rate of 9.79 per 100,000 population. Grocery stores are defined as supermarkets and smaller grocery stores primarily engaged in retailing a general line of food, such as canned and frozen foods; fresh fruits and vegetables; and fresh and prepared meats, fish, and poultry. Delicatessen-type establishments are also included. Convenience stores and large general merchandise stores that also retail food, such as supercenters and warehouse club stores, are excluded.

Report Area	Total Population (2010)	Number of Establishments	Establishments, Rate per 100,000 Population
Apache County, AZ	71,518	7	9.79

### Food Environment - SNAP-Authorized Food Stores

This indicator reports the number of SNAP-authorized food stores as a rate per 10,000 population. SNAP-authorized stores include grocery stores as well as supercenters, specialty food stores, and convenience stores that are authorized to accept SNAP (Supplemental Nutrition Assistance Program) benefits. The report area contains a total of 51 SNAP-authorized retailers with a rate of 7.10.

Report Area	Total Population (2020)	Total SNAP-Authorized Retailers	SNAP-Authorized Retailers, Rate per 10,000 Population
Apache County, AZ	71,875	51	7.10
Arizona	7,390,116	3,852	5.21

### Clinical Care and Prevention

A lack of access to care presents barriers to good health. Supply of facilities and physicians, the rate of uninsurance, financial hardship, transportation barriers, cultural competency, and coverage limitations affect access.

Rates of morbidity, mortality, and emergency hospitalizations can be reduced if community residents access services such as health screenings, routine tests, and vaccinations. Prevention indicators can call attention to a lack of access or knowledge regarding one or more health issues and can inform program interventions.

### Cancer Screening - Mammogram (Medicare)

This indicator reports the percentage of female Medicare beneficiaries age 35 and older who had a mammogram in most recent reporting year. The American Cancer Society recommends that women age 45 to 54 should get a mammogram every

year, and women age 55 and older should get a mammogram every other year.

Report Area	Medicare Beneficiaries	Female Beneficiaries with Recent Mammogram, Percent
Arizona	1,247,585	30%
United States	57,235,207	33%

## Diabetes Management - Hemoglobin A1c Test

This indicator reports the percentage of diabetic Medicare patients who have had a hemoglobin A1c (hA1c) test, a blood test which measures blood sugar levels, administered by a health care professional in the past year. This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator can also highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

Report Area	Medicare Enrollees with Diabetes	Medicare Enrollees with Diabetes with Annual Exam	Medicare Enrollees with Diabetes with Annual Exam, Percent
Apache County, AZ	1,515	432	28.51%

## Hospitalizations - Preventable Conditions

This indicator reports the preventable hospitalization rate among Medicare beneficiaries for the latest reporting period. Preventable hospitalizations include hospital admissions for one or more of the following conditions: diabetes with short-term complications, diabetes with long-term complications, uncontrolled diabetes without complications, diabetes with lower-extremity amputation, chronic obstructive pulmonary disease, asthma, hypertension, heart failure, bacterial pneumonia, or urinary tract infection. Rates are presented per 100,000 beneficiaries. In the latest reporting period there were 10,956 Medicare beneficiaries in the report area. The preventable hospitalization rate was 2,962. The rate in the report area was

higher than the state rate of 2,032 during the same time period.

Report Area	Medicare Beneficiaries	Preventable Hospitalizations, Rate per 100,000 Beneficiaries

Report Area	Non-Hispanic White	Black or African American	Hispanic or Latino
Apache County, AZ	0	No data	0
Arizona	2,020	3,661	2,033
United States	2,754	4,914	3,014

## Health Behaviors

Health behaviors such as poor diet, a lack of exercise, and substance abuse contribute to poor health status.

### Alcohol - Heavy Alcohol Consumption

In the report area, 10,933, or 15.22% adults self-report excessive drinking in the last 30 days, which is less than the state rate of 18.13%. Data for this indicator were based on survey responses to the 2018 Behavioral Risk Factor Surveillance System (BRFSS) annual survey and are used for the 2021 County Health Rankings.

Excessive drinking is defined as the percentage of the population who report at least one binge drinking episode involving five or more drinks for men and four or more for women over the past 30 days, or heavy drinking involving more than two drinks per day for men and more than one per day for women, over the same time period. Alcohol use is a behavioral health issue that is also a risk factor for a number of negative health outcomes, including: physical injuries related to motor vehicle accidents, stroke, chronic diseases such as heart disease and cancer, and mental health conditions such as depression and suicide. There are a number of evidence-based interventions that may reduce excessive/binge drinking; examples include raising taxes on alcoholic beverages, restricting access to alcohol by limiting days and hours of retail sales, and screening and counseling for alcohol abuse (Centers for Disease Control and Prevention, Preventing Excessive Alcohol Use, 2020).

Report Area	Total Population (2018)	Adults Reporting Excessive Drinking	Percentage of Adults Reporting Excessive Drinking
Apache County, AZ	71,818	10,933	15.22%
Arizona	7,171,646	1,299,997	18.13%
United States	327,167,434	62,733,046	19.17%

## Alcohol - Binge Drinking

This indicator reports the percentage of adults age 18 and older who report having five or more drinks (men) or four or more drinks (women) on an occasion in the past 30 days.

Within the report area there are 13.60% adults who reported having four or more drinks in the last month of the total population.

Report Area	Total Population (2019)	Percentage of Adults Binge Drinking in the Past 30 Days
Apache County, AZ	71,887	13.60%
Arizona	7,278,717	15.8%
United States	328,239,523	16.7%

Note: This indicator is compared to the state average.

## Binge Drinking - Disparity Report

The table and chart below display the median and interquartile ranges for census tract values related to the indicator.

Report Area	1st Quartile	Median	4th Quartile
Apache County, AZ	13.80%	14.30%	14.60%
Arizona	14.50%	16.40%	18.20%

## Physical Inactivity

Within the report area, 12,252 or 23.7% of adults aged 20 and older self-report no active leisure time, based on the question: "During the past month, other than your regular job, did you participate in any physical activities or exercises such as running, calisthenics, golf, gardening, or walking for exercise?" This indicator is relevant because current behaviors are determinants of future health and this indicator may illustrate a cause of significant health issues, such as obesity and poor cardiovascular health.

*Note: In 2021, the CDC updated the methodology used to produce estimates for this indicator. Estimated values for prior years (2004 - 2017) have been updated in this platform to allow comparison across years. Use caution when comparing with saved assessments generated prior to November 10, 2021.*

## HIV Prevalence Rate by Year

The table below displays trends in the prevalence rate for HIV/AIDS for years 2009 through 2018. Rates are expressed per 100,000 population age 13 and older.

Report Area	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018
Apache County, AZ	111.0	124.0	No data	128.0	140.1	No data	194.5	195.3	208.3	210.3
Arizona	220.5	235.3	237.1	242.7	248.7	262.8	270.0	266.0	271.2	276.9
United States	322.2	329.7	336.8	343.5	353.2	355.8	362.3	361.1	367.0	372.8

## Tobacco Usage - Current Smokers

This indicator reports the percentage of adults age 18 and older who report having smoked at least 100 cigarettes in their lifetime and currently smoke every day or some days.

Within the report area there are 23.00% adults who have smoked or currently smoke of the total population.

Report Area	Total Population (2019)	Adult Current Smokers (Crude)	Adult Current Smokers (Age-Adjusted)
Apache County, AZ	71,887	<b>23.00%</b>	23.90%
Arizona	7,278,717	14.8%	15.2%
United States	328,239,523	15.3%	15.7%

Note: This indicator is compared to the state average.

Data Source: Centers for Disease Control and Prevention, [Behavioral Risk Factor Surveillance System](#). Accessed via the [500 Cities Data Portal](#). 2019.

## Insufficient Sleep

This indicator reports the percentage of adults age 18 and older who report usually getting insufficient sleep (<7 hours for those aged ≥18 years, on average, during a 24-hour period).

Within the report area there are 38.70% adults sleeping less than 7 hours on average of the total population of the total population.

Report Area	Total Population (2018)	Adults Sleeping Less Than 7 Hours on Average (Crude)	Adults Sleeping Less Than 7 Hours on Average (Age-Adjusted)
Apache County, AZ	71,818	38.70%	39.60%
Arizona	7,171,646	34.5%	35.4%
United States	327,167,434	35.7%	36.2%

Note: This indicator is compared to the state average.

## Health Outcomes

Measuring morbidity and mortality rates allows assessing linkages between social determinants of health and outcomes. By comparing, for example, the prevalence of certain chronic diseases to indicators in other categories (e.g., poor diet and exercise) with outcomes (e.g., high rates of obesity and diabetes), various causal relationship may emerge, allowing a better understanding of how certain community health needs may be addressed.

### Cancer Incidence - All Sites

This indicator reports the age adjusted incidence rate (cases per 100,000 population per year) of cancer (all sites) adjusted to 2000 U.S. standard population age groups (Under age 1, 1-4, 5-9, ..., 80-84, 85 and older).

Within the report area, there were 212 new cases of cancer reported. This means there is a rate of 270.7 for every 100,000 total population.

Report Area	Estimated Total Population	New Cases (Annual Average)	Cancer Incidence Rate (Per 100,000 Population)
Apache County, AZ	78,315	212	270.7
Arizona	8,393,829	32,375	385.7
United States	379,681,007	1,703,249	448.6

## Medicare Population with Asthma, Percentage by Age

This indicator reports the prevalence of asthma among Medicare beneficiaries by age.

Report Area	65 Years and Older	Less than 65 Years
Apache County, AZ	5.3%	7.0%
Arizona	5.2%	7.0%
United States	4.5%	7.5%

## Chronic Conditions - Diabetes (Adult)

This indicator reports the number and percentage of adults age 20 and older who have ever been told by a doctor that they have diabetes. This indicator is relevant because diabetes is a prevalent problem in the U.S.; it may indicate an unhealthy lifestyle and puts individuals at risk for further health issues.

Within the report area, 7,474 of adults age 20 and older have diabetes. This represents 13.1% of the total survey population. *Note: In 2021, the CDC updated the methodology used to produce estimates for this indicator. Estimated values for prior years (2004 - 2017) have been updated in this platform to allow comparison across years. Use caution when comparing with saved assessments generated prior to November 10, 2021.*

Report Area	Population Age 20+	Adults with Diagnosed Diabetes	Adults with Diagnosed Diabetes, Age-Adjusted Rate
Apache County, AZ	50,500	7,474	13.1%
Arizona	5,446,755	520,446	8.4%

This indicator reports the prevalence of high blood pressure among Medicare beneficiaries by age.

Report Area	65 Years and Older	Less than 65 Years
Apache County, AZ	48.7%	39.0%
Arizona	54.1%	36.0%
United States	59.8%	42.4%

### Low Birth Weight (CDC)

This indicator reports the percentage of live births where the infant weighed less than 2,500 grams (approximately 5 lbs., 8 oz.). These data are reported for a 7-year aggregated time period. Data were from the National Center for Health Statistics - Natality Files (2013-2019) and are used for the 2021 County Health Rankings.

Within the report area, there were 517 infants born with low birth weight. This represents 7.3% of the total live births. *Note: Data are suppressed for counties with fewer than 10 low birthweight births in the reporting period.*

Report Area	Total Live Births	Low Birthweight Births	Low Birthweight Births, Percentage
Apache County, AZ	7,061	517	7.3%
Arizona	1,167,796	84,716	7.3%
United States	54,416,819	4,440,508	8.2%

## Low Birth Weight, Percent by Race / Ethnicity

This indicator reports the 2013-2019 seven-year average percentage of live births with low birthweight (< 2,500 grams) by race and by Hispanic origin.

Report Area	Non-Hispanic White	Non-Hispanic Black	Hispanic or Latino
Apache County, AZ	8.1	No data	8.8
Arizona	6.7	12.0	7.0
United States	6.8	13.5	7.3

## Mortality - Cancer

This indicator reports the 2015-2019 five-year average rate of death due to malignant neoplasm (cancer) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummairized for report areas from county level data, only where data is available. This indicator is relevant because cancer is a leading cause of death in the United States.

Within the report area, there are a total of 479 deaths due to cancer. This represents an age-adjusted death rate of 118.8 per every 100,000 total population.

*Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.*

Report Area	Total Population, 2015-2019 Average	Five Year Total Deaths, 2015-2019 Total	Crude Death Rate (Per 100,000 Population)	Age-Adjusted Death Rate (Per 100,000 Population)

## Mortality - Coronary Heart Disease

This indicator reports the 2015-2019 five-year average rate of death due to coronary heart disease (ICD10 Codes I20-I25) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummized for report areas from county level data, only where data is available. This indicator is relevant because coronary heart disease is a leading cause of death in the United States.

Within the report area, there are a total of 346 deaths due to coronary heart disease. This represents an age-adjusted death rate of 90.0 per every 100,000 total population.

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

Report Area	Total Population, 2015-2019 Average	Five Year Total Deaths, 2015-2019 Total	Crude Death Rate (Per 100,000 Population)	Age-Adjusted Death Rate (Per 100,000 Population)
Apache County, AZ	71,979	346	96.1	90.0
Arizona	7,045,154	38,301	108.7	86.1
United States	325,134,494	1,822,811	112.1	92.6

## Mortality - Poisoning

This indicator reports the 2015-2019 five-year average rate of death due to poisoning (including drug overdose) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because poisoning deaths, especially from drug overdose, are a national public health emergency.

Within the report area, there are a total of 137 deaths due to poisoning. This represents an age-adjusted death rate of 40.5 per every 100,000 total population.

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

Report Area	Total Population, 2015-2019 Average	Five Year Total Deaths, 2015-2019 Total	Crude Death Rate (Per 100,000 Population)	Age-Adjusted Death Rate (Per 100,000 Population)
Apache County, AZ	71,979	137	38.1	40.5
Arizona	7,045,154	8,571	24.3	24.8
United States	325,134,494	350,184	21.5	21.6

Note: This indicator is compared to the state average.

#### Poisoning Mortality, Age Adj. Rate (Per 100,000 Pop.) by County, CDC NVSS 2015-19

## Poisoning Mortality, Age-Adjusted Rate (Per 100,000 Pop.) by Gender

This table reports the age-adjusted rate of death due to poisoning (including drug poisoning) per 100,000 people by gender.

Report Area	Male	Female
Apache County, AZ	66.1	15.3
Arizona	33.4	16.1
United States	29.1	14.2

## Poisoning Mortality, Age-Adjusted Rate (Per 100,000 Pop.) by Race / Ethnicity

This table reports the age-adjusted rate of death due to poisoning (including drug poisoning) per 100,000 people by race and Hispanic origin.

Report Area	Non-Hispanic White	Non-Hispanic Black	Asian or Pacific Islander	American Indian or Alaskan Native	Hispanic or Latino
Apache County, AZ	No data	No data	No data	48.6	No data
Arizona	28.1	26.3	5.9	35.1	17.0
United States	26.9	20.3	4.1	20.8	11.4

## Mortality - Homicide

This indicator reports the 2015-2019 five-year average rate of death due to assault (homicide) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummairized for report areas from county level data, only where data is available. This indicator is relevant because homicide rate is a measure of poor community safety and is a leading cause of premature death.

Within the report area, there are a total of 56 deaths due to homicide. This represents an age-adjusted death rate of 16.6 per every 100,000 total population.

*Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.*

Report Area	Total Population, 2015-2019 Average	Five Year Total Deaths, 2015-2019 Total	Crude Death Rate (Per 100,000 Population)	Age-Adjusted Death Rate (Per 100,000 Population)

## Mortality - Lung Disease

This indicator reports the 2015-2019 five-year average rate of death due to chronic lower respiratory disease per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummized for report areas from county level data, only where data is available. This indicator is relevant because lung disease is a leading cause of death in the United States.

Within the report area, there are a total of 123 deaths due to lung disease. This represents an age-adjusted death rate of 30.2 per every 100,000 total population.

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

Report Area	Total Population, 2015-2019 Average	Five Year Total Deaths, 2015-2019 Total	Crude Death Rate (Per 100,000 Population)	Age-Adjusted Death Rate (Per 100,000 Population)

## Mortality - Motor Vehicle Crash

This indicator reports the 2015-2019 five-year average rate of death due to motor vehicle crash per 100,000 population, which include collisions with another motor vehicle, a nonmotorist, a fixed object, and a non-fixed object, an overturn, and any other non-collision. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. This indicator is relevant because motor vehicle crash deaths are preventable and they are a cause of premature death.

Within the report area, there are a total of 234 deaths due to motor vehicle crash. This represents an age-adjusted death rate of 70.0 per every 100,000 total population.

*Note: Fatality counts are based on the location of the crash and not the decedent's residence.*

Report Area	Total Population, 2015-2019 Average	Five Year Total Deaths, 2015-2019 Total	Crude Death Rate (Per 100,000 Population)	Age-Adjusted Death Rate (Per 100,000 Population)

## Mortality - Premature Death

This indicator reports the Years of Potential Life Lost (YPLL) before age 75 per 100,000 population for all causes of death. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. YPLL measures premature death and is calculated by subtracting the age of death from the 75 year benchmark. Data were from the National Center for Health Statistics - Mortality Files (2017-2019) and are used for the 2021 County Health Rankings. This indicator is relevant because a measure of premature death can provide a unique and comprehensive look at overall health status.

Within the report area, there are a total of 1,333 premature deaths. This represents an age-adjusted death rate of 15,486 per every 100,000 total population.

*Note: Data are suppressed for counties with fewer than 20 deaths in the three-year time frame.*

Report Area	Premature Deaths, 2017-2019	Years of Potential Life Lost, 2017-2019 Average	Years of Potential Life Lost, Rate per 100,000 Population
Apache County, AZ	1,333	31,257	15,486
Arizona	163,276	2,831,057	7,121
United States	7,697,253	126,961,190	6,943

*Note: This indicator is compared to the state average.*

## Mortality - Stroke

This indicator reports the 2015-2019 five-year average rate of death due to cerebrovascular disease (stroke) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because stroke is a leading cause of death in the United States.

Within the report area, there are a total of 140 deaths due to stroke. This represents an age-adjusted death rate of 37.1 per every 100,000 total population.

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

Report Area	Total Population, 2015-2019 Average	Five Year Total Deaths, 2015-2019 Total	Crude Death Rate (Per 100,000 Population)	Age-Adjusted Death Rate (Per 100,000 Population)

## Mortality - Suicide

This indicator reports the 2015-2019 five-year average rate of death due to intentional self-harm (suicide) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because suicide is an indicator of poor mental health.

Within the report area, there are a total of 110 deaths due to suicide. This represents an age-adjusted death rate of 33.3 per every 100,000 total population.

Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

Report Area	Total Population, 2015-2019 Average	Five Year Total Deaths, 2015-2019 Total	Crude Death Rate (Per 100,000 Population)	Age-Adjusted Death Rate (Per 100,000 Population)

## Unintentional Injury (Accident) Mortality, Age-Adjusted Rate (Per 100,000 Pop.), Yearly Trend

This indicator reports the age-adjusted rate of death due to unintentional injury (accident) per 100,000 people over time.

Report Area	2004	2005	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019
Arizona	49.3	54.7	56.0	51.9	47.3	45.5	46.7	46.8	45.1	48.6	47.0	49.2	54.2	56.2	55.4	58.7
United States	38.1	39.5	40.2	40.4	39.3	37.5	38.0	39.1	39.1	39.4	40.5	43.2	47.4	49.4	48.0	49.3

Note: No county data available. See data source and methodology for more details.

## Obesity

This indicator reports the number and percentage of adults aged 20 and older self-report having a Body Mass Index (BMI) greater than 30.0 (obese). Respondents were considered obese if their Body Mass Index (BMI) was 30 or greater. Body mass index (weight [kg]/height [m]<sup>2</sup>) was derived from self-report of height and weight. Excess weight may indicate an unhealthy lifestyle and puts individuals at risk for further health issues.

Within the report area, there are a total of 17,995 adults age 20 and older who self-reported having a BMI greater than 30.0. This represents a 36.4% of the survey population.

Note: In 2021, the CDC updated the methodology used to produce estimates for this indicator. Estimated values for prior years (2004 - 2017) have been updated in this platform to allow comparison across years. Use caution when comparing with saved

assessments generated prior to November 10, 2021.

Report Area	Population Age 20+	Adults with BMI > 30.0 (Obese)	Adults with BMI > 30.0 (Obese), Percent
Apache County, AZ	50,406	17,995	36.4%
Arizona	5,435,188	1,574,263	29.0%
United States	243,082,729	67,624,774	27.6%

Note: This indicator is compared to the state average.

## Special Topics - COVID-19

Indicators in this section are part of a series of rotating special topics. These indicators are publicly available to all users to help inform response to current events.

### COVID-19 - Confirmed Cases

This indicator reports incidence rate of confirmed COVID-19 cases per 100,000 population. Data for this indicator are updated

daily and derived from the Johns Hopkins University data feed.

In the report area, there have been 20,499 total confirmed cases of COVID-19. The rate of confirmed cases is 28,542.98 per 100,000 population, which is greater than the state average of 26,083.89. Data are current as of 02/01/2022.

Report Area	Total Population	Total Confirmed Cases	Confirmed Cases, Rate per 100,000 Population	Last Update
Apache County, AZ	71,818	20,499	28,542.98	02/01/2022
Arizona	7,171,646	1,870,644	26,083.89	02/01/2022
United States	326,262,499	73,469,622	22,518.56	02/01/2022

## Social Distancing - Mobility Reports (Google)

This indicator displays data from the Google mobility reports. These reports show how visits and length of stay at different places change compared to a baseline. The baseline is the *median* value, for the corresponding day of the week, during the 5-week period Jan 3–Feb 6, 2020. Google prepared this report to help you and public health officials understand responses to social-distancing guidance related to COVID-19.

Report Area	Report Date	Retail and recreation	Grocery and pharmacy	Parks	Transit stations	Workplaces	Residential
Apache County, AZ	1/25/2022 12:00:00 AM	7%	No data	-13%	-12%	-26%	5%
Arizona	1/25/2022 12:00:00 AM	-13%	-7%	-18%	-16%	-27%	8%
United States	1/25/2022 12:00:00 AM	-17%	-6%	-15%	-32%	-25%	8%

## Overall Mobility Trends

The chart below displays the percentage change in mobility (time and frequency of visits) in the report area compared to the January 3 - February 6, 2020 baseline.

### Retail and Recreation, Daily Mobility Trends

The chart below displays daily mobility trends for places like restaurants, cafes, shopping centers, theme parks, museums, libraries, and movie theaters.

### Grocery and Pharmacy, Daily Mobility Trends

The chart below displays daily mobility trends for places like grocery markets, food warehouses, farmers markets, specialty food shops, drug stores, and pharmacies.

### Parks, Daily Mobility Trends

The chart below displays daily mobility trends for places like national parks, public beaches, marinas, dog parks, plazas, and public gardens.

### Transit Stations, Daily Mobility Trends

The chart below displays daily mobility trends for places like public transport hubs such as subway, bus, and train stations.

### Workplaces, Daily Mobility Trends

The chart below displays daily mobility trends for places of work.

## Places of Residence, Daily Mobility Trends

The chart below displays daily mobility trends for places of residence.

## COVID-19 Fully Vaccinated Adults

This indicator reports the percent of adults fully vaccinated for COVID-19. Data is updated daily from the CDC API. Vaccine hesitancy is the percent of the population estimated to be hesitant towards receiving a COVID-19 vaccine. The Vaccine Coverage Index is a score of how challenging vaccine rollout may be in some communities compared to others, with values ranging from 0 (least challenging) to 1 (most challenging).

Report Area	Percent of Adults Fully Vaccinated	Estimated Percent of Adults Hesitant About Receiving COVID-19 Vaccination	Vaccine Coverage Index	Last Update
Apache County, AZ	95.0%	21.05%	1.00	01/31/2022
Arizona	69.9%	14.35%	0.83	01/31/2022
United States	71.7%	10.29%	0.44	01/31/2022

Note: This indicator is compared to the state average.

Data Source: Centers for Disease Control and Prevention and the National Center for Health Statistics, CDC - GRASP, 2021.
