SS21

**Savannah SS21** | Hybrid Skiff

# Savannah SS21 | Hybrid Skiff

Our **SS21** is built with the family and fisherman in mind. Versatility is key. We offer a full cushion package that is removable converting this model from family cruising to a fishing machine. Rod holders are strategically placed throughout and options to add even more. 9" draft allows access to skinny waters and perfect for sandbar fun with the family.

## Don't just dream about the water—dive in!

Are you ready to elevate your family outings to a whole new level? Our **SS21** hybrid skiff is crafted for the perfect blend of excitement and comfort, making every moment on the water a cherished family memory. Spacious seating, ample storage, and a user-friendly layout make our hybrid skiff perfect for families. Pack a picnic, cast a line, or simply enjoy the sun—the possibilities are endless.

A day outing with your boating family often includes loading up the whole gang including the kids and a few friends. Carrying a crowd like this regularly brings with it plenty of cargo. Room for a crowd and all of the required tackle and toys, food, drinks, towels and other sundries can be tight. With a footprint of nearly 200 square feet, the SS21 is built to handle a large group.

As a multi-function vessel, the SS21 layout is ready for you to combine the day with a taste of everything the water has to offer from equal parts cruising and fishing, to water tow sports and sandbar lounging. The SS21 can be built with a simple water ready utilitarian layout or dressed up with a host of comfort features. Each optional comfort item is designed to level up your relaxation level while enhancing your overall boating experience.

### Premium Upholstery

High-Quality Materials: We use top-tier materials such as marine-grade vinyl, UV-resistant thread, and foam padding that can resist mold and mildew.

### Positive Foam Flotation

Flotation foam is strategically placed within the hull and other compartments of the boat to displace water and provide buoyancy.

### LED Navigation Lights

LED lights are known for their energy efficiency, longer lifespan, and durability. They consume less power, making them more environmentally friendly and cost-effective for boaters.

### Self Bailing Deck

The purpose of a self-bailing deck is to automatically drain and expel water that may come on board, preventing the accumulation of water on the deck and ensuring a safer and drier environment for passengers.
