- *Headquartered in Warrendale, PA*
- *Power BI Specialists*

Team Highlights

- *Power BI Certified Professionals*
- *Proficient in Assessment Architecture, Administration, Upgrades, Performance Tuning, Migrations*
- *Over 100 Certifications*

Testimonial

"We needed help migrating our legacy platform into Power BI, but didn't have the properly trained staff to implement the change. DataStrike assessed our environment, seamlessly migrated us off-prem, and instituted a user-friendly dashboard for our entire team. Thanks to our data being in one interface, everyone is on the same page and we've reduced costs."

- Chief Information Officer

Dedicated Power BI Team

DataStrike employs Power BI experts with an emphasis on assessing environments, designing data models, crafting guidelines for data governance to maintain data integrity and compliance, and providing 24x7x365 support. We provide optimal maintenance and architect a data framework abiding by best practices.

Power BI Experts

- Proficient in Power BI, Data Governance, & Custom Report Development
- Offers 24x7x365 Power BI Visualization and Management
- Provides Solutions for Legacy Integration, Implementation & Dashboard Creation
- Implementation and Deployment
- Data Modeling and Transformation

Support and Administration

- Query Optimization Scripts
- API Integration
- 24x7x365 Support
- Constant Monitoring
- Mobile/Desktop Optimization
- High Availability and Network Performance
- Future-Proof Data Architecture
- Fine-Tuning Capabilities
- Provide Dedicated and Secure Connectivity

Expertise

- Expertise in Machine Learning and AI
- Leveraging Collaboration Features
- Data Cleansing
- Scaling Data Up/Down
- Optimal Data Storage
- SLA Management
- Flexible Contracts
- Provides Monitoring, Alerting, and Disaster Recovery
- Ensures Security, Compliance, Reporting, Analytical Insights

Summary

- Supports Legacy Platform Migrations
- Progress Tracking
- Proficient In Migrations Across Cloud Providers
- Automatic Data Refreshes
- Remote Management
- Workflow Automation
- Model Building and Deployment
- DAX Calculations
