

Stylish Domes and Room in Room Structures for events, congresses and offices

Minimum assembly
and disassembly time

Rooms for 1 to 1000+ people

Optimal acoustics
& sound insulation

No fan noise

Sustainable and circular

THE X-WALL 6

THE X-WALL 6

General

Inflatable X-Walls are inflatable acoustic walls in X-Shape and are the ultimate for use at fairs and conferences, for example, where they can be used to create 4 separate rooms / meeting corners in an original and efficient way.

Applications

Inflatable X-Walls can be used to create 4 separate corners where, for example, meetings can take place, products can be presented, or catering can be placed.

Led and Branding

The X-Walls can be illuminated in any desired color by means of our LED bars (also remotely).

There are also different ways of branding the inflatable X-Walls. For example:

- Placing banners or TVs in and around the X-Walls.
- Hanging banners or posters (there are loops at a height of 2 meters both inside and outside the X-Walls).
- Projecting logos or other messages by means of projection technique.
- The color of the LED lighting that can display a particular theme.

Other Requirements

Only a normal power supply of 220V is required for the installation of the X-Wall.

All our domes and structures meet the requirements for fire safety according to the DIN 4102 – B1 standard. The certificate is available on request.

Installation / Dismantling

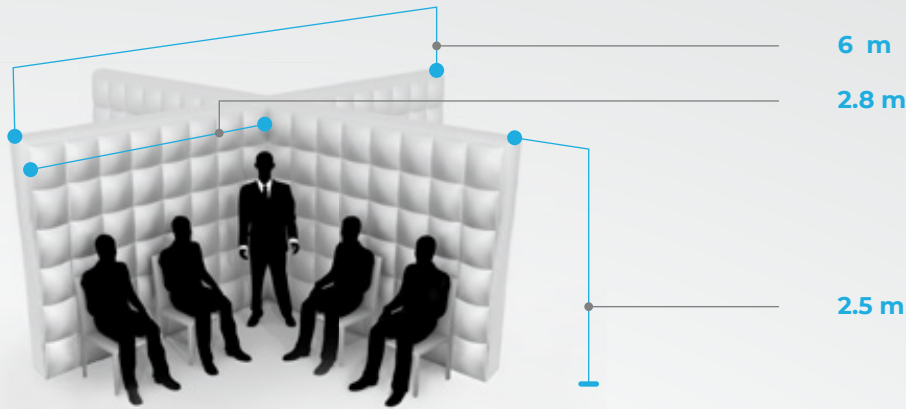

The X-Wall can be installed and dismantled quickly and easily by our team. Because this can be done so quickly, it is also possible, for example, to convert a large (plenary) hall into a hall with different rooms / walls in a short time, so that a hall can have multiple functions during an event day.

Acoustics And Soundproofing

Due to its design and insulating air layers, this X-Wall offers optimal acoustics. By using these walls, spaces can be separated from each other, whereby sound transmission is minimized.

The small blower is also completely insulated, so that it cannot be heard at all.

Length	Width	Height	Surface	Max chairs	Color	LED	Setup time	Weight	Power
6 m	6 m	2.5 m	4x7.8 m ²	NA	white	RGB bars of 1m	1.5 man hours	20 kg	220v 330w
