

## Stylish Domes and Room in Room Structures for events, congresses and offices

Minimum assembly  
and disassembly time

Rooms for 1 to 1000+ people

Optimal acoustics  
& sound insulation

No fan noise

Sustainable and circular

THE DOME 8

# THE DOME 8

## General

This very striking inflatable igloo-shaped Dome forms a unique subspace for workshops or sub-sessions at conferences and events. The height and design make this a real eye-catcher. The Dome 8m can accommodate up to 45-50 theater-style seats. The Dome 8m is equipped with ventilation holes, so that the ventilation inside is optimal. The dense and round design guarantees optimal acoustics and soundproofing.

## Installation / Dismantling

The Dome 8m can be quickly installed and disassembled by our team. For example, it is also possible to convert a large plenary hall into a hall with different break-out areas in a short time (for example lunch break), so that a hall can have multiple functions during an event day.

## Acoustics And Soundproofing

Due to the round and closed design of the Dome 8m and the different insulating air layers, this structure has optimal acoustics and soundproofing. This also allows multiple Domes to be placed next to each other, without sound transmission between the meetings. The Dome 8m is equipped with ventilation holes, so that the climate inside the dome remains the same as the climate outside the dome.

The small blower is also completely insulated, so that it cannot be heard at all.

## Other Requirements

Only a normal power supply of 220V is required for the installation of the Dome 8m.

All our domes and structures meet the requirements for fire safety according to the DIN 4102 – B1 standard. The certificate is available on request.

## Applications

The Dome 8m diameter is very suitable for groups up to 45 – 50 people (seated in theater style). The Dome 8m can be used, for example, as a break-out space at conferences or trade fairs, or as a presentation space.

## Led and Branding

The Inflatable Dome 8m can be illuminated in any desired color by means of our LED bars (also remotely).

There are also different ways of branding the Dome 8m. For example:

- Placing banners or TVs in and around the Dome 8m.
- Hanging banners or posters (there are loops at a height of 2 meters both inside and outside the Dome 8m).
- Projecting logos or other messages by means of projection technique.
- The color of the LED lighting that can display a particular theme.
