General

Are you looking for an exclusive and practical temporary space for your events and conferences?

Meet the Boxer 8: an innovative square structure with an opening at the front. The Boxer lends itself perfectly to presentations or workshops with a capacity of up to 40 people seated.

The side walls of the Boxer are composed of square compartments, which not only provides a sleek and contemporary appearance, but also contributes to optimal acoustics. In addition, the openings of the Boxer structures can be fully slid together, allowing the structure to be completely closed.

Product Enhancement

Acoustics and quiet airflow

This Boxer 8 is optimized for acoustic properties, making them ideal for workshops and presentations or acoustic partitions, for example. In addition, this structure is equipped with an isolated blower system that is not audible.

Sustainability and circularity

With QuickSpace products, you don't create waste at your event. Our products are cleaned in an environmentally friendly way after use, making them new-worthy at every event. At the end of life, our products are processed into other products such as storage bags, contributing to a circular economy.

Branding

On request, this structure can be branded with your own branding, for example by theme colors, projection of logos or texts, or by means of TV screens or banners.

Led lighting

This structure can be illuminated in any color using LED modules, creating a unique ambiance. This can be set both statically and dynamically.

Boxer 8

Quick installation and dismantling

One of the benefits of QuickSpace products is the quick installation and dismantling. Hence, it is possible to install the structures at your convenient times, saving you costs and time. Our experienced teams will take care of the installation, disassembly and, if necessary, design of your event.

Safety

Fire safety certificates

All our structures have the most important fire safety certificates such as German B1, France M1 and American NFPA 701

Construction safety

QuickSpace structures guarantee safe and stable spaces. Depending on the type of structure, there are integrated truss systems that give the structure stability. Structures with (partially) closed roofs are fitted with integrated truss systems in the doorways, so that the exits always remain open in case of emergencies.

Safe, quick and easy setup and dismantling processes minimise accident risks, ensuring structures are correctly installed.
